Understanding the Trans-Pacific Partnership

Jeffrey J. Schott, Barbara Kotschwar, Julia Muir, 2013 The Trans Pacific Partnership TPP is a big deal in the making With the Doha Round of multilateral trade negotiations at an impasse the TPP negotiations have taken center stage as the most significant trade initiative of the 21st century As of December 2012 negotiators have made extensive progress in 15 negotiating rounds since the talks began in March 2010 though hard work remains to finish the deal in the coming year or so Despite this effort however the TPP is not well understood In part the reason lies in the dynamism of the TPP initiative Unlike other free trade pacts the growing membership as the talks have proceeded and the broad range complexity and novelty of the issues on the agenda have made it difficult to track the substantive detail and progress of the talks This Policy Analysis aims to remedy this problem by providing a reader's guide to the TPP initiative It first assesses how much the TPP countries are alike and like minded in their pursuit of a comprehensive trade deal It then examines the current status of the talks the

major substantive sticking points and the implications of Canada and Mexico joining the talks as well as prospective membership of other countries The Policy Analysis then looks ahead to how the TPP could advance economic integration in the Asia Pacific region and the implications for trade relations with China

Development in Latin America Víctor Ramiro Fernández, Gabriel Brondino, 2018-07-27 This edited volume discusses the development theory advanced by the Economic Commission for Latin America and the Caribbean ECLAC in the 1940s and its transformations through the second half of the twentieth century In this time frame the authors identify two approaches structuralism 1950 1980 and neo structuralism 1980 onwards The contributors describe the transition in terms of economic theory and policy the conceptualization of the State and the consideration of space on regional and global scales They argue that structuralism is still relevant for understanding the current problems of development if a careful and appropriate recovery and update of its main ideas and concepts is made in relation to the current context of globalization and internationalization of production and finance

Understanding Mega Free Trade Agreements Jean-Baptiste Velut, Louise Dalingwater, Vanessa Boulet, Valérie Peyronel, 2017-08-23 The rise of cross regional trade agreements is a defining trend of the current international trade system as shown by the signing of the

Trans Pacific Partnership TPP in 2015 the negotiations for the Transatlantic Trade and Investment Partnership TTIP between the USA and the EU as well as the Regional Comprehensive Economic Partnership RCEP between countries in Asia and Oceania These differ from previous agreements in their economic significance and large geographic scale and the wide scope of trade related issues The current rise of nationalist and isolationist ideologies across Europe and the USA has raised questions on the future of cross regional trade deals and made the need to understand their implications for economic and political governance ever more urgent Two main forms of governance that are central to this volume are the democratic tensions over new generation trade deals on the one hand and their geopolitical ramifications on the other which have come into collision to herald the advent of a highly uncertain period of world politics Many of the questions tackled in this volume surrounding the democratic governance of trade agreements whether long held debates on the inclusion of workers voices controversies on intrusive behind the border provisions undermining national sovereignty and local autonomy or new questions on digital rights are crucial to understand the ebbing popular support for far reaching trade agreements This book will be a useful learning tool for students and scholars in a wide range of fields including Globalisation Global Governance International Political Economy International Trade and Investment and International Law and should also be of interest to EU trade negotiators international policymakers and business associations

Global Port Cities in North America Boris Vormann, 2014-11-27 As the material anchors of globalization North America's global port cities channel flows of commodities capital and tourists This book explores how economic globalization processes have shaped these cities political institutions social structures and urban identities since the mid 1970s Although the impacts of financialization on global cities have been widely discussed it is curious that how the global integration of commodity chains actually happens spatially creating a quantitatively new global organization of production distribution and consumption processes remains understudied The book uses New York City Los Angeles Vancouver and Montreal as case studies of how once redundant spaces have been reorganized and crucially reinterpreted so as to accommodate new flows of goods and people and how in these processes social environmental and security costs of global production networks have been shifted to the public
