 Jakab,Sohel Saikat,Duncan Selbie,Saqif Mustafa,Yu Zhang,Geraldine McDarby,Mila Petrova,Redda Seifeldin,2023-07-10 The
 COVID 19 pandemic has caused unprecedented disruption worldwide highlighting once again the interdependency of health
 and socioeconomic development and the global lack of health systems resilience Two years into the pandemic most countries
 report sustained disruptions across service delivery platforms and health areas with a profound impact on health outcomes
 The impact of these disruptions is magnified within marginalized communities and in countries experiencing protracted
 conflict There is an urgent need to focus on recovery through investment in the essential public health functions EPHFs and
 the foundations of health systems with a focus on primary health care and whole of government and society engagement The
 aim of this Research Topic is to gather transfer and promote operationalization of key experiences from COVID 19 to inform
 global and country level recovery that better promote health guide policy direction towards building health systems
 resilience and thereby ensure economic and social prosperity Experience with COVID 19 has demonstrated that traditional
 approaches to health system strengthening have failed to achieve the complementary goals of Universal Health Coverage
 UHC and health security with the divide between the most vulnerable and well off only widening Much of what had been
 learned from previous experiences such as Ebola in West Africa has not been widely applied This has left health and
 economic systems vulnerable to 21 st century public health challenges ranging from conflict and natural disasters to aging
 demographics and rising rates of non communicable and communicable diseases and antimicrobial resistance These
 challenges require intentional focus and investment as well as whole of government and society engagement with health to
 build health system resilience Greater action is needed to prevent the devastating effects of war and conflict on the health of
 the most vulnerable This Research Topic will convene the knowledge and practices of leaders in public health health systems
 and humanitarian and development sectors This is to ensure lessons from COVID 19 inform the recovery agenda and promote
 sustainable health and socioeconomic recovery for all Lest we forget and find ourselves again unprepared and vulnerable in
