The background of the slide is a deep blue with a textured, almost nebular appearance. Several bright white and light blue streaks or filaments of light sweep across the frame from the upper left towards the lower right, creating a sense of dynamic movement. In the lower-middle section, there is a small, isolated purple hexagonal shape. The overall aesthetic is scientific and ethereal.

Unified Field Theory Two Jonathan G Randy:

Unified Field Theory II John Hildreth Atkins, Jonathan G. Randy, 2012-03-21 Atkins takes up where he left off more than five years ago Many of his theories then in their infancy stage have now progressed to an astonishing conclusion His COW formula explains why planets orbit the sun Magnetic Reconnection interacting with the Earth's plasma field propels us towards the sun And he explains why planets rotate or not on their axis The end result is that he proves beyond any shadow of a doubt that gravitational attraction is a myth it just isn't needed And Astrophysics as we know it today is obsolete An asteroid is said to be heading our way in February of 2013 Scientists are uncertain if it will strike us or not Since the event is so close to the infamous Mayan date of December 21 2012 Atkins insists that we take a closer look at it He even explains that we have the technology to foil this event by a temporal time technique Using the natural engine of the asteroid we can speed it up or slow it down so that it isn't here when we are Pretty clever

OFF THE WALL Prison Art & Humor Jonathan G. Randy, 2007-03 I wanted to show the world that rehabilitation of criminals is a reality and not just a dream Since most are in prison for property crimes which stem from living in poverty it just did not seem smart to lock them up a few years and then kick them out just as poor as they went in Off The Wall will enable me to hire convicts by buying their art and prose It will be therapy for some and more money for
