Information Retrieval Technology Sung Hyon Myaeng, Ming Zhou, Kam-Fai Wong, Hong-Jiang Zhang, 2007-05-25 The Asia Information Retrieval Symposium AIRS was established by the Asian information retrieval community after the successful series of Information retrieval with Asian Languages IRAL workshops held in six different locations in Asia starting from 1996 While the IRAL workshops had their focus on information retrieval problems involving Asian languages AIRS covers

a wider scope of applications systems technologies and theory aspects of information retrieval in text audio image video and multimedia data This extension of the scope reflects and fosters increasing research activities in information retrieval in this region and the growing need for collaborations across subdisciplines We are very pleased to report that we saw a sharp increase in the number of submissions and their quality compared to the IRAL workshops We received 106 papers from nine countries in Asia and North America from which 28 papers (26%) were presented in oral sessions and 38 papers in poster sessions (36%) It was a great challenge for the Program Committee to select the best among the excellent papers The low acceptance rates witness the success of this year's conference After a long discussion between the AIRS 2004 Steering Committee and Springer the publisher agreed to publish our proceedings in the Lecture Notes in Computer Science LNCS series which is SCI indexed We feel that this strongly attests to the excellent quality of the papers

Invitation to Oceanography Paul R. Pinet, 2009 Thoroughly updated to include the most recent and fascinating discoveries in oceanography the Fifth Edition takes great strides to be the most up to date comprehensive and student friendly resource available today Its content continues to span the four major divisions of ocean science geology chemistry physics and biology while maintaining the conversational voice for which it is acclaimed The Fifth Edition boasts many exciting updates including a new chapter on global climate change that educates students on global warming in the 21st century and its likely impact on ocean systems With new end of chapter questions new color photographs and illustrations and an expanded assortment of Selected Readings Invitation to Oceanography is a must have in any marine science classroom
