The Politics of Global Competitiveness Paul Cammack, 2022 Marx predicted in Capital 1867 that as capitalism became global patterns of work would be transformed and workers would need to develop versatility flexibility and mobility This general law of social production as he called it is now in evidence all around us in global value chains zero hours contracts and contract work organised through digital platforms It results from competition between capitalists scientific and technological revolutions in production and incessant advances in the division of labour as production processes are broken down into ever smaller steps This book documents the leading roles of the Paris based Organisation for Economic Cooperation and Development and the

Washington based World Bank as advocates of these developments They do not as generally supposed simply represent the interests of the advanced economies or the West and their transnational corporations They promote a single global model of capitalist development without limits and on a genuinely global scale It calls upon all states to adjust continually to the structural and social demands of competitiveness which they see as essential to the global hegemony of capital over labour The OECD and the World Bank propose policies that give girls and women equal access to education and paid work reform welfare to make work pay introduce flexible labour contracts that make hiring and firing easier focus education on skills that boost employability and draw workers in the developing world from the informal sector into the formal sector where they can be more productive This is the politics of global competitiveness

Ethics, Hunger and Globalization Per Pinstrup-Andersen, Peter Sandøe, 2007-07-20 Ethics Hunger and Globalization adds an ethics dimension to the debate and research about poverty hunger and globalization Outstanding scholars and practitioners from several disciplines discuss what action is needed for ethics to play a bigger role in action by governments civil society and the private sector to reduce poverty and hunger within the context of globalization The book concludes that much of the rhetoric by policy makers is not followed up with appropriate action and discusses the role of ethics in attempts to match action with rhetoric The book also concludes that a better understanding of the values underlying both public and private sector action towards the alleviation of poverty and hunger would lead to more enlightened policies and greater success in attempts to achieve the Millennium Development Goals The interaction between ethical economic and policy aspects is discussed and scholars and experienced practitioners from several disciplines suggest how such integration may be promoted

Rethinking Democracy Promotion in International Relations Jessica Schmidt, 2015-08-20 This book

traces and conceptualises the changing notion of democracy and demonstrates how democracy promotion finds itself at the heart of contemporary international discourses and policies Democracy promotion is widely considered to constitute a hypocritical and failed grand international narrative of the 1990s and has allegedly been replaced by other more pressing and academically more captivating concerns such as conflict management statebuilding and climate change This book challenges this position and argues that the core notions of democracy promotion such as empowerment inclusion and responsiveness are a key concern of contemporary international policymakers Drawing on the work of Michel Foucault Hannah Arendt as well as John Dewey it investigates the notion of democracy and modality of its promotions through the policy fields of conflict management statebuilding and climate change The central development the book observes is the reconceptualisation of democracy from the constituted sphere of the public to the lived relations of the social The book argues that the novel rationality of democracy and its promotion offers a particular solution to governing impasses in a world perceived to be globalised and complex which accounts for democracy s current but neglected centrality This book will be of much interest to students of democracy intervention statebuilding global governance and IR in general **Social**
