Council for the extension of this special protection and of the multilateral register to industries which are of interest to developing countries primarily agriculture The so called extension question is the central feature of the Doha Development Agenda at both the WTO and World Intellectual Property Organization This book provides some empirical evidence and applied legal and economic reasoning to this debate It provides both a general review of the key issues and a series of case studies from six Anglophone and four Francophone countries in Africa These focus on major agricultural commodities such as coffee cotton cocoa and tea as well as more specific and local products such as Argan oil and Oku white honey

Waste and Environmental Policy Massimiliano Mazzanti, Anna Montini, 2011 This research deals with the increasingly complex issues of waste generation waste management and waste disposal that in less developed industrialised countries present diverse but critical concerns It takes a socio economic and policy oriented perspective and provides empirical evidence at EU and regional level The EU and Italy are taken as relevant case studies given the disparities in environmental performances between less and more developed areas The rich and various empirical evidence shows that a robust delinking between waste generation and economic growth is still not present thus future policies should directly address the problem at the source by targeting waste generation in EU countries Some structural factors like population density and urbanisation present themselves as relevant drivers of both waste management and landfill diversion Nevertheless economic and structural factors alone are not sufficient to improve waste performances Though waste policies are to be redesigned by covering the entire area of waste management some first signals of policy effectiveness are arising This work will be of most interest to those students of environmental economics and environmental sciences as well as policy makers waste utility managers and companies in the waste management sector

Global Burden of Armed Violence 2015 Geneva Declaration Secretariat, 2015-04-16 The 2015 edition of the Global Burden of Armed Violence provides a wealth of data relevant to security and the post 2015 sustainable development framework It estimates that 508 000 people died violently in both conflict and non conflict settings every year in 2007 12 down from 526 000 in 2004 09 This trend is visible in non conflict settings where the proportion of women and girls is also slightly reduced from 17 to 16 per cent Yet the number of direct conflict deaths is on the rise from 55 000 to 70 000 per year over the same periods Firearms are used in close to half of all homicides committed and in almost one third of direct conflict deaths Nearly USD 2 trillion in global homicide related economic losses could have been saved if the homicide rate in 2000 10 had been reduced to the lowest practically attainable levels between 2 and 3 deaths per 100 000 population

Cooperation Networks and Economic Development Andrés Cárdenas O'Farrill, 2021-02-11 For most Western audiences Cuba is a touristic paradise stuck in time and virtually detached from world technology networks by the US embargo anything but a hub of industrial innovation and high value added biotechnology However a closer look reveals more subtle but equally powerful stories that challenge the homogenizing assumptions of conventional economics and open up scope for more sophisticated reflections on Cuban economy and industry

From this kind of enquiry emerges the case of the internationally respected Cuban biotech industry as the most successful case of science and technology policy in the country's economic history. The book takes an interdisciplinary approach exploring issues such as interdependency, purpose and history as natural constituencies of the innovation process. It also examines the dynamic and crucial role played by the state in the formation of innovative business enterprises. This book will be of interest to academic researchers in the fields of innovation and economic development. **Handbook of Asian**

Education Yong Zhao, Jing Lei, Guofang Li, Ming Fang He, Kaori Okano, Nagwa Megahed, David Gamage, Hema Ramanathan, 2010-11-30. Comprehensive and authoritative, this Handbook provides a nuanced description and analysis of educational systems, practices and policies in Asian countries and explains and interprets these practices from cultural, social, historical and economic perspectives. Using a culture-based framework, the volume is organized in five sections, each devoted to educational practices in one civilization in Asia: Sinic, Japanese, Islamic, Buddhist and Hindu. Culture and culture identities essentially are civilization identities; the major differences among civilizations are rooted in their different cultures. This framework offers a novel approach to capturing the essence of the diverse educational systems and practices in Asia. Uniquely combining description and interpretation of educational practices in Asia, this Handbook is a must-have resource for education researchers and graduate students in international and comparative education, globalization and education, multicultural education, sociocultural foundations of education and Asian studies, and for educational administrators and education policy makers. **21st-Century Statecraft** Nayef Al-Rodhan, 2022-07-28. From civilisational frontier risks

associated with new challenges like disruptive technologies to the shifting nature of great power conflicts and subversion, the 21st century requires a new approach to statecraft. In *21st Century Statecraft*, Professor Nayef Al-Rodhan proposes five innovative statecraft concepts. He makes the case for a new method of geopolitical analysis called meta geopolitics and for dignity-based governance. He shows how, in an interdependent and interconnected world, traditional thinking must move beyond zero-sum games and focus on multi-sum and symbiotic realist interstate relations. This requires a new paradigm of global security premised on five dimensions of security and a new concept of power: just power, which highlights the centrality of justice to state interests. These concepts enable states to balance competing interests and work towards what the author calls reconciliation statecraft. Throughout, Professor Al-Rodhan brings his philosophical and neuroscientific expertise to bear, providing a practical model for conducting statecraft in a sustainable way. Enhancing Productivity
