Awakening our Faith in the Future Peter T. Dunlap,2015-12-22 What transformation would happen if we could combine the best of liberal politics with psychology *Awakening our Faith in the Future* investigates the avenues for creating a new branch of psychology a transformative political psychology In the past political psychology has focused directly on

analysis and knowledge acquisition rather than on interventions that transform self and culture A transformative political psychology combines the best of traditional social science with the transformative intent of clinical psychology in order to create a new political culture Peter T Dunlap suggests that while liberals focus intently outside of themselves on changing the world those with psychological interests focus much more internally on changing themselves In this book he argues that by combining political liberalism and psychology and encouraging psychologists to develop cultural learning practices based on ideas of self knowledge there is opportunity to transform our political culture Divided into five parts this book explores stories of political destiny questions of development opportunities for political development a speculative theory of cultural evolution practices of a political psychologist This scholarly text uses personal experiences and the stories of progressive political leaders as pathways for addressing political problems making it ideal reading for professionals and students in the fields of both politics and psychology as well as for activists interested in the future of liberalism **Reality and Other**

Nelson, 2014-01-21 Narratives have always played a prominent role in both bioethics and medicine the fields have attracted much storytelling ranging from great literature to humbler stories of sickness and personal histories And all bioethicists work with cases from court cases that shape policy matters to case studies that chronicle sickness But how useful are these various narratives for sorting out moral matters What kind of ethical work can stories do and what are the limits to this work The new essays in *Stories and Their Limits* offer insightful reflections on the relationship between narratives and ethics

most widely read literary works Kissed by a Fox Priscilla Stuckey, 2012-09-01 Drawing inspiration from sources as varied as ancient philosophers and contemporary biologists *Kissed by a Fox* challenges readers to enact a different story of nature one in which people and place are not separate where other creatures respond to human need and where humans and all others together create the world Dissatisfaction with nature flows throughout Western civilization as deep as its blood as abiding as its bones Convinced to the marrow that something is deeply wrong with nature the Western world tries to remake it into something better For Priscilla Stuckey this is a fundamental and heartbreaking misconception that nature can be fixed exploited or simply ignored Modern societies try to bend nature to human will instead of engaging in give and take with a living breathing land community Using her personal experiences as the cornerstone Stuckey explores the depth of relationship possible with the birch tree in our backyard the nearby urban creek the dog who settles on our bed each night With the eloquence of the great nature writers before her Stuckey encourages us to open ourselves to the unlimited possibilities of a truly connected life Restoring the Story Anne van Gend, 2024-03-29 Are we getting too squeamish about the atonement There is a quiet crisis of confidence in many Western churches Confusion debates and changing sensibilities have thrown doubt on whether one of our central doctrines can be reliably communicated as good news today This book approaches atonement through story allowing imagination to illuminate the multi faceted meanings in Christ s atoning work and exploring how those rich stories can be good news for the complex issues of our day *Dear Science and Other Stories* Katherine McKittrick, 2020-12-14 In *Dear Science and Other Stories* Katherine McKittrick presents a creative and rigorous study of black and anticolonial methodologies Drawing on black studies studies of race cultural geography and black feminism as well as a mix of methods citational practices and theoretical frameworks she positions black storytelling and stories as strategies of invention and collaboration She analyzes a number of texts from intellectuals and artists ranging from Sylvia Wynter to the electronica band Drexciya to explore how narratives of imprecision and relationality interrupt knowledge systems that seek to observe index know and discipline blackness Throughout McKittrick offers curiosity wonder citations numbers playlists friendship poetry inquiry song grooves and anticolonial chronologies as interdisciplinary codes that entwine with the academic form Suggesting that black life and black livingness are in themselves rebellious methodologies McKittrick imagines without totally disclosing the ways in which black intellectuals invent ways of living outside prevailing knowledge systems *Bioethics* Nancy S. Jecker, Professor Nancy S Jecker, Ph.D., Albert R. Jonsen, Robert A. Pearlman, 2011-02-15 *Bioethics An Introduction to the History Methods and Practice* Third Edition provides readers with a modern and diverse look at bioethics while also looking back at early bioethics cases that set ethical standards in healthcare It is well suited for advanced undergraduate and graduate students who plan to pursue careers in nursing allied health or medicine as well as professionals seeking a comprehensive reference in the field The authors retain the unique three pronged approach discussing the history the methods and the practice of bioethics This approach provides students with a breadth of

information focusing on all sides of the issue which will allow them to think critically about current bioethical topics The third edition is updated throughout with new information and cases including the latest on genetics and reproductive technology physician assisted suicide as well as numerous new cases

Shulman, 2021-12-16 First published in 2002 in this innovative book two leading practitioners tell the stories of the people they have met as clients and how they as therapists tried to help them Through compelling case studies Peven and Shulman invite the reader into their thoughts and feelings about their clients their processes and treatment techniques and their subsequent successes and failures The authors describe a cognitive constructivist interpersonal dynamic approach based primarily on the principles of Alfred Adler's Individual Psychology The case studies represent several different DSM IV diagnostic categories and the authors offer their own theoretical perspectives and treatment methods for each category With compassion insight and skill the authors take complicated material and present it in a clearly written and easy to understand fashion

Interpretative Identity and Hermeneutical Community Mi-Rang Kang, 2011 In this study Mi Rang Kang 1969 in Seoul investigates the role of women in Korean church life and society and shows possibilities for their empowerment By transposing Paul Ricoeur's hermeneutics into her own context she wants to contribute to the formation of Korean Christian women's identity Along the lines of the book of Ruth she develops a Bible didactical theory for her own church At the same time the book will also give Western readers an insight into one of the major Presbyterian denominations in Korea little known so far

V. S. Naipaul of Trinidad Nivedita Misra, 2024-01-09 The book is about V S Naipaul who was born in Trinidad in 1932 At the age of 18 Naipaul left Trinidad on a scholarship to study literature at Oxford He never returned to live in Trinidad His first book was published in 1956 and by the time Trinidad achieved political independence in 1962 he had published four books and was firmly established as a writer in England By the time Trinidad became a republic in 1976 Naipaul had written 13 books and had travelled through much of the postcolonial world This book highlights how Trinidad and Naipaul were bound in a love hate relationship where Naipaul continued to pass Trinidad off as a cynical island where nothing was created while Trinidad had its share by laying back a claim on him and his writing It is generally perceived that Naipaul shunned his place of birth as he called his birth in Trinidad a mistake Trinidad an unimportant uncreative cynical place and the Caribbean as the Third World's Third World His refusal to acknowledge Trinidad in his initial response to receiving the Nobel Prize added insult to injury Yet he was deeply bound to the island of Trinidad and his roots in the Indo Trinidadian community This book makes Naipaul's connection to Trinidad more than evident and as such adds to the present body of knowledge

Ambiguity and Narratology Simon Grund, Robert Kirstein, Julian Wagner, 2024-10-21 As a well known phenomenon in everyday communication ambiguity has increasingly become the subject of interdisciplinary research in recent years However within this context it has been observed that words or expressions situated within the artistic framework of storytelling have not yet been at the centre of research interest This book aims to bridge this gap by examining

the phenomenon of ambiguity from the perspective of narratology understood as a general theory of narration and narrative communication The volume pursues two goals Firstly it seeks to demonstrate that the interdisciplinary combination of linguistics cultural history and narratology enriches the field of literary studies significantly This focus not only highlights how narrative techniques often rely on everyday language conventions but also explores how various textual features narrative devices or even entire storylines can be affected by phenomena or lead to experiences of ambiguity These ambiguities often serve as poetic strategies that are deliberately set in the communicative process of text and reader to achieve certain narrative goals Secondly ambiguity as a characteristic of narrative communication serves as a linking element across different fictional and factual text types and genres throughout time and cultures The collected essays cover a wide range of narrative texts from Roman comedy to funerary reliefs from historiographical writings to utopian tales from Goethe's novels to contemporary fantasy literature In its broad approach the volume thus contributes to the project of diachronic narratology which like the research on ambiguity in literary and cultural studies has recently gained increasing momentum The combined consideration of ambiguity and narratology not only raises awareness of phenomena of ambiguity in narrative texts but also encourages reflection on the theoretical foundations of narrative particularly on the methods and devices used to describe these ambiguous structures Overall the volume represents an exploration of a relatively unexplored interdisciplinary field aiming to stimulate further research

Technical Artefacts: Creations of Mind and Matter Peter Kroes, 2012-05-24 This book presents an attempt to understand the nature of technical artefacts and the way they come into being Its primary focus is the kind of technical artefacts designed and produced by modern engineering In spite of their pervasive influence on human thinking and doing and therefore on the modern human condition a philosophical analysis of technical artefacts and engineering design is lacking Among the questions addressed are How do technical artefacts fit into the furniture of the universe In what sense are they different from objects from the natural world or from the social world What kind of activity is engineering design and what does it mean to say that technical artefacts are the embodiment of a design Does it make sense to consider technical artefacts to be morally good or bad by themselves because of the way they influence human life The book advances the thesis that technical artefacts conceived of as physical constructions with a technical function have a dual nature they are hybrid objects combining physical and intentional features It proposes a theory of technical functions and technical artefact kinds that does justice to this dual nature analyses engineering design from the dual nature point of view and argues that technical artefacts because of their dual nature have inherent moral significance
