Social Studies in an Age of High-Stakes Testing Elizabeth Anne Yeager, O. L. Davis, 2005-08-01 The chapters in this volume illustrate how teachers are bringing creativity higher order thinking and meaningful learning activities into particular school settings despite pressures of standards and testing We chose the word wise for the title of this book and we use it frequently to describe the pedagogical practices we have identified The words powerful and ambitious are used as well The larger point as Keith C Barton makes in his chapter is that there is no necessary connection between content standards and high stakes tests on the one hand and lowlevel rote instruction on the other He reminds us as Thornton 1991 and Wiggins 1987

previously have argued that teachers play a crucial role in mediating educational policy and their intentions and interpretations have at least as much influence on classroom practice as does the content of standards and highstakes tests Barton also asserts that this makes it all the more crucial to identify the wisdom of practice that enables teachers to engage students in powerful educational experiences

Student Edition 2003c ,2002 **From Expert Student to Novice Professional** Anna Reid,Madeleine Abrandt

Dahlgren,Lars Owe Dahlgren,Peter Petocz,2011-01-04 Students entering higher education expect their studies to lead them towards some specific form of professional career But in this age complex internationalized professions are the main source of work for graduates so students need to prepare themselves for a future that can be volatile changeable and challenging This book shows how students navigate their way through learning and become effective students it details how to shift the focus of their learning away from the formalism associated with the university situation towards the exigencies of working life It is in this sense that the book explores how people move from being expert students to novice professionals This book presents a model of professional learning fashioned out of a decade of research undertaken in countries half a world away from each other Sweden and Australia It uses empirical research gathered from students and teachers to show how students negotiate the forms of professional knowledge they encounter as part of their studies and how they integrate their

understandings of a future professional world with professional knowledge and learning It reveals that as students move from seeing themselves as learners they take on more of a novice professional identity which in turn provides a stronger motivation for their formal studies
