Modern World History California Edition Roger B. Beck, Linda Black, Larry S. Krieger, 2002-03-11 Modern World History California Edition Roger B. Beck, Linda Black, Larry S. Krieger, 2005-01-07 The Middle East in Modern World History Ernest Tucker, 2019-01-30 The Middle East in Modern World History examines how global trends over the last 200 years have shaped the Middle East and how these trends were affected by the region's development. Covering a key period in the history of the Middle East, this book highlights three major trends within the region's development over the past two centuries: the role of the region as a strategic conduit between East and West; the development of the region's natural resources, especially oil; and the impact of a rapidly globalizing world economy on the Middle East. This new edition extends coverage to the present day and includes more thematic and interpretive discussion on the impact of global migration and the evolution of the roles of women. It also provides more theoretical insights into current historical research and recent developments in the region, firmly placing these developments within their historical context. Clearly written and supported throughout by maps, images, discussion questions, and suggestions for further reading, as well as including a comprehensive chronology and glossary that enable readers to develop a clearer picture of political, economic, social, and cultural life within the region, *The Middle East in Modern World History* is the perfect textbook for all students of the history of the modern Middle East within a global context. The Origins of the Modern World Robert Marks, 2007 Robert B. **World History - Modern Times, California Edition** Martin H. Manser, 2006 World History Steven Wallech, Touraj Daryaei, Craig Hendricks, Anne Lynne Negus, Peter P. Wan, Gordon Morris Bakken, 2013-01-22 *World History: A Concise Thematic Analysis* presents the highly anticipated second edition of the most affordable and accessible survey of world history designed for use at the college level. An engaging narrative that contextualizes history and does not drown students in a sea of facts, it offers a comparative analysis of the great civilizations of Eurasia, Africa, and the Americas. Addresses themes of population dynamics, food production, challenges, disease, history, warfare, and other major issues for civilizations. Features new interior design and organization to enhance user experience. Instructor's test bank available online at www.wiley.com/go/wallech. The Environment and World History Edmund Burke III, Kenneth Pomeroy, 2009-04-08 Since around 1500 C.E., humans have shaped the global environment in ways that were previously unimaginable. Bringing together leading environmental historians and world historians, this book offers an overview of global environmental history throughout this remarkable 500-year period. In eleven essays, the contributors examine the connections between environmental change and other major topics of early modern and modern world history: population growth, commercialization, imperialism, industrialization, the fossil fuel revolution, and more. Rather than attributing environmental change largely to European science, technology, and capitalism, the essays illuminate a series of culturally distinctive yet often parallel developments arising in many parts of the world, leading to intensified exploitation of land and water. The wide range of regional studies, including some in Russia, China, the

Middle East India Southeast Asia Latin America Southern Africa and Western Europe together with the book's broader thematic essays makes *The Environment and World History* ideal for courses that seek to incorporate the environment and environmental change more fully into a truly integrative understanding of world history

dissemination of ideas **What Is Global History?** Sebastian Conrad,2016-01-12 The first comprehensive overview of the innovative new discipline of global history Until very recently historians have looked at the past with the tools of the nineteenth century But globalization has fundamentally altered our ways of knowing and it is no longer possible to study nations in isolation or to understand world history as emanating from the West This book reveals why the discipline of global history has emerged as the most dynamic and innovative field in history one that takes the connectedness of the world as its point of departure and that poses a fundamental challenge to the premises and methods of history as we know it What Is Global History provides a comprehensive overview of this exciting new approach to history The book addresses some of the biggest questions the discipline will face in the twenty first century How does global history differ from other interpretations of world history How do we write a global history that is not Eurocentric yet does not fall into the trap of creating new centrism How can historians compare different societies and establish compatibility across space What are the politics of global history This in depth and accessible book also explores the limits of the new paradigm and even its dangers the question of whom global history should be written for and much more Written by a leading expert in the field What Is Global History shows how by understanding the world s past as an integrated whole historians can remap the terrain of their discipline for our globalized present **Sacred Kingship in World History** A. Azfar Moin,Alan Strathern,2022-05-10

Sacred kingship has been the core political form in small scale societies and in vast empires for much of world history This collaborative and interdisciplinary book recasts the relationship between religion and politics by exploring this institution in long term and global comparative perspective Editors A Azfar Moin and Alan Strathern present a theoretical framework for understanding sacred kingship which leading scholars reflect on and respond to in a series of essays They distinguish between two separate but complementary religious tendencies immanentism and transcendentalism which mold kings into divinized or righteous rulers respectively Whereas immanence demands priestly and cosmic rites from kings to sustain the flourishing of life transcendence turns the focus to salvation and subordinates rulers to higher ethical objectives Secular modernity does not end the struggle between immanence and transcendence flourishing and righteousness but only displaces it from kings onto nations and individuals After an essay by Marshall Sahlins that ranges from the Pacific to the

Arctic the book contains chapters on religion and kingship in settings as far flung as ancient Egypt classical Greece medieval Islam Mughal India modern European drama and ISIS Sacred Kingship in World History sheds new light on how religion has constructed rulership with implications spanning global history religious studies political theory and anthropology

Teaching the World's Teachers Lauren Lefty, James W. Fraser, 2020-07-07 Examining teacher education in an international context this book captures the diversity of the world's educators Many countries confront surprisingly similar challenges in preparing K 12 educators for success while national contexts also make for surprising differences In Teaching the World's Teachers education historians Lauren Lefty and James W Fraser and their contributors make a convincing case for approaching these shared challenges from a more global and historically minded perspective Written by education scholars from eleven different countries Argentina Brazil Catalonia Spain China England Finland Ghana Israel Singapore South Africa and the United States this book provides histories of teacher education reforms between roughly 1980 and 2020 The authors show how international trends that emerged during this period collided with national and regional contexts to produce unique teacher education systems in different nations While in some countries the embrace of markets and competition led to a deregulation of the teacher preparation field in others teaching became a highly regulated and centralized affair At the same time ideas and structural models cross borders and education leaders borrow from each other while reshaping plans in each place Opening with a broad historical overview of global teacher education models beginning in the late eighteenth century Teaching the World's Teachers argues that the field has long been characterized by cross border connections but shaped by geopolitical hierarchies of power In an era when teacher quality is widely recognized as one of the most important factors in a child's education this volume encourages dialogue among teacher educators and policymakers around the world By understanding the context and contingency of where we have been the authors hope that readers will walk away with a more empowered sense of where we are headed in the all important task of teaching the world's teachers Contributors Kwame Akyeampong Richard Andrews Azeem Badroodien Maria In's G F Marcondes de Souza Gustavo E Fischman James W Fraser Guangwei Hu Arie Kizel Jari Lavonen Lauren Lefty Wei Liao Jason Loh Silvana Mesquita Hannele Niemi Lily Orland Barak Paula Razquin Carol Anne Spreen Eduard Vallory Yisu Zhou **California in a Time of Excellence** James Andrew LaSpina, 2009-02-26 Follows California's efforts at reforming the public school system from 1983 to the present **Library of Congress Subject Headings** Library of Congress. Commercial Cosmopolitanism? Felicia Gottmann, 2021-03-30 This book showcases the wide variety of commercial cosmopolitan practices that arose from the global economic entanglements of the early modern period Cosmopolitanism is not only a philosophical ideal for many centuries it has also been an everyday practice across the globe The early modern era saw hitherto unprecedented levels of economic interconnectedness States societies and individuals reacted with a mixture of commercial idealism and commercial anxiety seeking at once to exploit new opportunities for growth whilst limiting its

disruptive effects In highlighting the range of commercial cosmopolitan practices that grew out of early modern globalisation the book demonstrates that it provided robust alternatives to the universalising western imperial model of the later period Deploying a number of interdisciplinary methodologies the kind of methodological cosmopolitanism that Ulrich Beck has called for chapters provide agency centred evaluations of the risks and opportunities inherent in the ambiguous role of the cosmopolitan who often playing on and mobilising a number of identities operated in between and outside of different established legal social and cultural systems The book will be important reading for students and scholars working at the intersection of economic global and cultural history
