*Ancient Civilizations of the World* Denny Rose & Rowan Allen, 2018-05-08 About 5 000 years ago the first urban societies developed laying the foundations for the first civilizations Nearly all civilizations share the same few features they have abundant food surpluses contained cities political bureaucracies armies defined religious and social hierarchies and long distance trading Ancient Egyptian culture flourished between c 5500 BCE with the rise of technology as evidenced in the glass work of faience and 30 BCE with the death of Cleopatra VII the last Ptolemaic ruler of Egypt It is famous today for the great monuments which celebrated the triumphs of the rulers and honored the gods of the land The culture is often misunderstood as having

been obsessed with death but had this been so it is unlikely it would have made the significant impression it did on other ancient cultures such as Greece and Rome Neolithic means a new stone age even though agriculture was the crowning achievement of the period Civilizations started out small Agriculture at first tended to tie only small groups together These groups also all settled along rivers important as a reliable and predictable source of water As time passed families usually worked the same plot of land over successive generations leading to the concept of ownership Ancient mortars and grinding tools unearthed in a large mound in the Zagros Mountains of Iran reveal that people were grinding wheat and barley about 11 000 years ago Grass pea wild wheat wild barley and lentils were found throughout the site including some of the earliest known samples This was much further east than most sites known for early agriculture This book furnishes with utmost facility to all classes of readers the needed information on ancient civilization The unusual variety of the subject makes this a work of endless fascination

History of Civilizations Mayson Kirby,2018-08-11 The History of Civilizations traces the history of man in this vast region from the Palaeolithic beginnings to circa 700 B C when the foundations for the formation of the great Empire were laid Many different elements must come together before a human community develops to the level of sophistication commonly referred to as civilization The first is the existence of settlements classifiable as towns or cities This requires food production to be efficient enough for a large minority of the community to be engaged in more specialized activities such as the creation of imposing buildings or works of art the practice of skilled warfare and above all the administration of a centralized bureaucracy capable of running the machinery of state Despite the major role played by Central Asia in shaping the history of the past and of today this vast region stretching from the Caspian Sea to Mongolia and western China had not been studied as a whole cultural entity in time and space This multi volume History of Civilizations of Central Asia published in English is the first attempt to present a comprehensive picture of the cultures that flourished and vanished at the heart of the Eurasian continent from the dawn of civilization to the present day The book is an engaging and thought provoking philosophical account that demonstrates that critical inquiry is an ongoing process with strains of continuity and evolution of Civilizations
