More Than Free James Jensen, 2023-11-29 About the Book *More Than Free* Exposing the Lies Hidden in History is a unique look at 4000 years of history through the eyes of the author's family tree This text builds the case for a new world view whose foundation is that of truth and morality never described in another publication It shows us that our history is not what we've been taught and indoctrinated to believe In fact we are supposed to believe that we don't know where we came from and who our ancient forefathers and mothers really were People are hungry for the truth and this book delivers plenty of it We have to ask ourselves why Why was our history disconnected to anything that was taught to us in high school and college What is the root cause of hiding and obfuscating our past And who did these things How did the settlement of Europe happen and where did these people originate Why did they migrate and who expelled or chased them How did America become the land of exceptional people with a unique and free perspective Where did the idea of personal freedoms originate and how did the people of America regather in this land This book explores all of these questions and upon exhaustive examination research and sagacity a mind open to connecting the dots has found and documented the answers About the Author James Jensen was born in Rapid city South Dakota He currently resides in Weatherford Texas where he runs a small hay farm He is also an archer upland game hunter a researcher and a writer Jensen has four children and eight grandchildren He is retired from the practice of landscape architecture in a global engineering and environmental consulting business focusing on utility scale electrical projects Jensen achieved technical writing expertise in preparing dozens of Environmental Impact Statements and related public review documents

MACHINE LEARNING FOR NATURAL LANGUAGE PROCESSING: INSIGHTS INTO TEXT AND SPEECH ANALYSIS Mr. Harish Reddy Gantla, Dr. Nancy Arya, Dr. Divyanshu Sinha, Dr. Rakhi Mutha, 2024-05-16 The fourth industrial revolution according to the World Economic Forum is about to begin This will blend the physical and digital worlds in ways we couldn't imagine a few years ago Advances in machine learning and AI will help usher in these existing changes Machine learning is transformative which opens up new scenarios that were simply impossible a few years ago Profound gaining addresses a significant change in perspective from

customary programming improvement models Instead of having to write explicit top down instructions for how software should behave deep learning allows your software to generalize rules of operations Deep learning models empower the engineers to configure characterized by the information without the guidelines to compose Deep learning models are conveyed at scale and creation applications for example car gaming medical services and independent vehicles Deep learning models employ artificial neural networks which are computer architectures comprising multiple layers of interconnected components By avoiding data transmission through these connected units a neural network can learn how to approximate the computations required to transform inputs to outputs Deep learning models require top notch information to prepare a brain organization to carry out a particular errand Contingent upon your expected applications you might have to get thousands to millions of tests This chapter takes you on a journey of AI from where it got originated It does not just involve the evolution of computer science but it involves several fields say biology statistics and probability Let us start its span from biological neurons way back in 1871 Joseph von Gerlach proposed the reticulum theory which asserted that the nervous system is a single continuous network rather than a network of numerous separate cells According to him our human nervous system is a single system and not a network of discrete cells Camillo Golgi was able to examine neural tissues in greater detail than ever before thanks to a chemical reaction he discovered He concluded that the human nervous system was composed of a single cell and reaffirmed his support for the reticular theory In 1888 Santiago Ramon y Cajal used Golgi s method to examine the nervous system and concluded that it is a collection of distinct cells rather than a single cell
