Global Cities and Urban Theory Donald McNeill, 2016-12-13 *Global Cities and Urban Theory* provides an innovative set of approaches to understanding some of the

Seoul Yu-Min Joo, 2018-12-14. In Asia there are a growing number of gigantic megacities accompanied by a series of speculative and extravagant megaprojects. Amid the fast-paced urban and development challenges many Asian governments have been searching for replicable and inspirational cases. In Asia, South Korea and its capital city Seoul are among frequently referenced models. However, South Korea's economic miracle in the late twentieth century has been mostly studied through an economic policy lens. This book revisits the development of South Korea by looking at its urban dimension and exploring the city of Seoul as a developmental megaproject. Offering an alternative to the focus on economic policies when it comes to explaining South Korea's development successes, Joo looks at the urbanization that took place under the guidance of the strong developmental state. She provides empirical evidence of the property state at work both complementing and supporting the developmental state. She also analyzes why and how Seoul was able to emerge as an important Asian global city and a global front runner in terms of ambitious and pioneering urban investments despite its relatively recent history marked by massive slums and urban poverty. This book provides an analytical framework for studying South Korea's modern development under capitalism as a precursor to East Asian urbanism and development. It paints a comprehensive story of how cities have been politically and economically important to Korea's development experience and are increasingly becoming a new mode of development. **Shanghai Future** Anna Greenspan, 2014. Charts the changing landscape of Shanghai as it embraces modernity. **Smart Urbanism** Simon Marvin, Andrés Luque-Ayala, Colin McFarlane, 2015-12-14.

Smart Urbanism SU: the rebuilding of cities through the integration of digital technologies with buildings, neighbourhoods, networked infrastructures and people is being represented as a unique emerging solution to the majority of problems faced by cities today. SU discourses enacted by technology companies, national governments and supranational agencies alike claim a supremacy of urban digital technologies for managing and controlling infrastructures, achieving greater effectiveness in managing service demand and reducing carbon emissions, developing greater social interaction and community networks, providing new services around health and social care etc. Smart urbanism is being represented as the response to almost every facet of the contemporary urban question. This book explores this common conception of the problematic of smart urbanism and critically addresses what new capabilities are being created by whom and with what exclusions, how these are

being developed and contested where is this happening both within and between cities and with what sorts of social and material consequences The aim of the book is to identify and convene a currently fragmented and disconnected group of researchers commentators developers and users from both within and outside the mainstream SU discourse including several of those that adopt a more critical perspective to assess what problems of the city smartness can address The volume provides the first internationally comparative assessment of SU in cities of the global north and south critically evaluates whether current visions of SU are able to achieve their potential and then identifies alternative trajectories for SU that hold radical promise for reshaping cities *Urban Restructuring, Power and Capitalism in the Tourist City* Khalid

Urban Comics Dominic Davies, 2019-02-21 *Urban Comics* Infrastructure and the Global City in Contemporary Graphic Narratives makes an important and timely contribution both to comics studies and urban studies offering a decolonisation and reconfiguration of both of these already interdisciplinary fields With chapter length discussions of comics from cities such as Cairo Cape Town New Orleans Delhi and Beirut this book

shows how artistic collectives and urban social movements working across the global South are producing some of the most exciting and formally innovative graphic narratives of the contemporary moment Throughout the author reads an expansive range of graphic narratives through the vocabulary of urban studies to argue that these formal innovations should be thought of as a kind of infrastructure This infrastructural form allows urban comics to reveal that the built environments of our cities are not static banal or depoliticised but rather highly charged material spaces that allow some forms of social life to exist while also prohibiting others Built from a formal infrastructure of grids gutters and panels and capable of volumetric multi scalar perspectives this book shows how urban comics are able to represent repair and even rebuild contemporary global cities toward more socially just and sustainable ends Operating at the intersection of comics studies and urban studies and offering large global surveys alongside close textual and visual analyses this book explores and opens up the fascinating relationship between comics and graphic narratives on the one hand and cities and urban spaces on the other

Refractions of the National, the Popular and the Global in African Cities Simon Bekker, Sylvia Croese, 2021-02-26 Case studies of metropolitan cities in nine African countries from Egypt in the north to three in West and Central Africa two in East Africa and three in Southern Africa make up the empirical foundation of this publication The interrelated themes addressed in these chapters the national influence on urban development the popular dynamics that shape urban development and the global currents on urban development make up its framework All authors and editors are African as is the publisher The only exception is Gran Therborn whose recent book *Cities of Power* served as motivation for this volume Accordingly the issue common to all case studies is the often conflictual powers that are exercised by national global and popular forces in the development of these African cities Rather than locating the case studies in an exclusively African historical context the focus is on the trajectories of the postcolonial city with the important exception of Addis Ababa with a non colonial history that has granted it a special place in African consciousness These trajectories enable comparisons with those of postcolonial cities on other continents This in turn highlights the fact that Africa today the least urbanised continent on an increasingly urbanised globe is in the thick of processes of large scale urban transformation illustrated in diverse ways by the case studies that make up the foundation of this publication

On the Edge Franck Billé, Caroline

Humphrey, 2021-11-30 A pioneering examination of history current affairs and daily life along the Russia China border one of the world's least understood and most politically charged frontiers The border between Russia and China winds for 2 600 miles through rivers swamps and vast taiga forests It's a thin line of direct engagement extraordinary contrasts frequent tension and occasional war between two of the world's political giants Franck Bill and Caroline Humphrey have spent years traveling through and studying this important yet forgotten region Drawing on pioneering fieldwork they introduce readers to the lifeways politics and history of one of the world's most consequential and enigmatic borderlands It is telling that along a border consisting mainly of rivers there is not a single operating passenger bridge Two different worlds have emerged On the Russian side in territory seized from China in the nineteenth century defense is prioritized over the economy leaving dilapidated villages slumbering amid the forests For its part the Chinese side is heavily settled and increasingly prosperous and dynamic Moscow worries about the imbalance and both governments discourage citizens from interacting But as Bill and Humphrey show cross border connection is a fact of life whatever distant authorities say There are marriages friendships and sexual encounters There are joint businesses and underground deals including no shortage of smuggling Meanwhile some indigenous peoples persecuted on both sides seek to revive their own alternative social groupings that span the border And Chinese towns make much of their proximity to Europe building giant Russian dolls and replicas of St Basil's Cathedral to woo tourists Surprising and rigorously researched On the Edge testifies to the rich diversity of an extraordinary world haunted by history and divided by remote political decisions but connected by the ordinary imperatives of daily life
