Why the Lean Start-Up Changes Everything

by Steve Blank

Harvard Business Review

Launching a new enterprise—whether it's a tech start-up, a small business, or an initiative within a large corporation—has always been a hit-or-miss proposition. According to the decades-old formula, you write a business plan, pitch it to investors, assemble a team, introduce a product, and start selling as hard as you can. And somewhere in this sequence of events, you'll probably suffer a fatal setback. The odds are not with you: As new research by Harvard Business School's Shikhar Ghosh shows, 75% of all start-ups fail.

But recently an important countervailing force has emerged, one that can make the process of starting a company less risky. It's a methodology called the "lean start-up," and it favors experimentation over elaborate planning, customer feedback over intuition, and iterative design over traditional "big design up front" development. Although the methodology is just a few years old, its concepts—such

as "minimum viable product" and "pivoting"—have quickly taken root in the start-up world, and business schools have already begun adapting their curricula to teach them.

The lean start-up movement hasn't gone totally mainstream, however, and we have yet to feel its full impact. In many ways it is scougly where the big data movement was five years ago—consisting mainly of a buzzword that's not yet widely understood, whose implications companies are just beginning to grasp. But as its practices spread, they're turning the conventional wisdom about entrepreneurship on its head. New ventures of all kinds are attempting to improve their chances of success by following its principles of failing fast and continually learning. And despite the methodology's name, in the long term some of its biggest payoffs may be gained by the large companies that embrace it.

In this article I'll offer a brief overview of lean start-up techniques and how they've evolved. Most important, I'll explain how, in combination with other business trends, they could ignite a new entrepreneurial economy.

Understanding New Power Harvard Business Review:

Catastrophe and Systemic Change: Learning from the Grenfell Tower Fire and Other Disasters Gill Kernick, 2021-05-27

The Grenfell Tower tragedy was the worst residential fire in London since World War II. It killed seventy-two people in the richest borough of one of the wealthiest countries in the world. Like other catastrophic events before it and since, it has the power to bring about lasting change. But will it? The historical evidence is weighed against lessons being learned in a meaningful or enduring way. In an attempt to understand why, despite enormous efforts, we persistently fail to learn from catastrophic events, this book uses the details of the Grenfell fire as a case study to consider why we don't learn and what it would take to enable real systemic change. The book explores the myths, the key challenges, and the conditions that inhibit learning and identifies opportunities to positively disrupt the status quo. It offers an accessible model for systemic change, not as a definitive solution but rather as a framework to evoke reflection, enquiry, and proper debate. *Catastrophe and Systemic Change* is a must-read book for a wide range of readers, including those interested in change management, leadership, policy making, law, housing, construction, and public safety.

Afro-global Management Innovation Practices

Marius Ungerer, with contributions by Johan Herholdt and Anton Schlechter, 2021-11-15. This book represents views, frameworks, and practices on stimulating and realising our optimal potential as human beings in the context of a workplace where there is a desire to achieve shared goals and aspirations in order to accomplish positive economic, societal, and environmental impacts and outcomes. It describes a vision of how life and work in organisations could be. We describe a new kind of organisation. Being a good person and doing good things while making profit are a real possibility for those management innovators who think beyond immediate trade-offs. In this book, we explore management innovation as a core study field and arena for re-inventing and re-imagining how people in organisations could execute management activities such as planning, organising, leading, and controlling for multiple stakeholder satisfaction and benefits. Work can be much more joyful and fulfilling than we think, but it requires courage from us to take responsibility when freedom is offered.

Beyond Expertise Alan Berrey, 2021-08-31. Subject matter experts are the most valuable members of any organization. They establish vision, forge paths, create products, solve problems, sell, customers, define policies, and cure ailments. Companies cannot prosper without them, since unlike non-experts, they provide the scaffolding upon which all other functions of the organization depend. They hold the jewels of knowledge in their organizations and are typically the top performers in their fields. But few company leaders ensure their experts are thoroughly developed as experts and often leave their effectiveness to chance. Alan Berrey addresses the challenges that confront experts and explores the techniques of top performers, including how they apply their expertise and maximize their power. Have you ever wondered how people judge your expertise and why it matters in your career? *Beyond Expertise* is about the craft of the expert, the artful application of expertise. It is about bringing your expertise out of the dark and maximizing your impact. It is about honing your influence.

with clients and boosting your authority with colleagues In short it is about becoming a compelling agent of change in any environment and with any audience Alan Berrey is the founder of Expert Dig Inc a research and training venture committed to the advancement of corporate experts With decades long experience as a subject matter expert he was CEO of multiple start ups and vice president of business development at multiple technology companies He has served clients in high tech manufacturing financial services telecommunications transportation health care and government **Independent Luxury**

On the Nature of Human Resource Development Monica Lee,2016-03-31 The nature of

human resource development HRD has been and remains a contested topic the debate was sparked in part by Monica Lee's seminal 2001 paper which refused to define the discipline of HRD but has been accentuated by increasing globalization political unrest inequality and the erosion of boundaries Should HRD now be seen as more than training or a sub function of large western bureaucracy This book represents a very wide view of HRD that it is at the core of our selves and our relationships and that we continually co create ourselves our organisations and societies These ideas are hung upon a model of Holistic Agency and supported from sources as diverse as evolutionary psychology science fiction the challenges of transitional economies and the structural uncertainties of contemporary society Examining the tensions between self and other agency and structure the book draws inspiration from an almost autoethnographic approach This yields a text that is personal entertaining and easier to read than many academic tomes yet considers the depth and development of the human condition and locates HRD within that

Journeying in the Wilderness Terri Martinson Elton, 2020-02-04 In *Journeying in the Wilderness* author Terri Martinson Elton observes that faith formation in the church setting is contextual and multiple forces are coming together today to create seismic contextual changes at record speed These changes are disrupting aspects of our lives challenging assumptions and dislodging personal and communal practices For the church to take seriously its call to form faith in each generation it must be attentive to current contextual realities Elton places confessional understanding of faith in dialogue with five contextually altering forces in order to provide a pathway for congregations to reimagine faith formation in the midst of

twenty first century realities The use of stories nontechnical language and biblical perspectives make this work accessible for congregational leaders and others who seek to explore new directions in forming faith Processes and practices are offered to help both leaders and congregations contextualize their approach to their particular settings Each chapter includes leadership competencies shared practices and group discussion questions *Quantum Leadership: Creating Sustainable Value in Health Care* Porter-O'Grady, Kathy Malloch, 2017-03 Quantum Leadership Creating Sustainable Value in Health Care Fifth Edition provides students with a solid overview and understanding of leadership in today s complex healthcare delivery system Important Notice The digital edition of this book is missing some of the images or content found in the physical edition **Platform Economics** Cristiano Codagnone, Athina Karatzogianni, Jacob Matthews, 2018-11-23 Platform Economics tackles head on the rhetoric surrounding the so called sharing economy which has muddled public debate and has contributed to a lack of policy and regulatory intervention *Beyond Networks - Interlocutory Coalitions, the European and Global Legal Orders* Gianluca Sgueo, 2016-04-06 This book explores the activism promoted by organised networks of civil society actors in opening up possibilities for more democratic supranational governance It examines the positive and negative impact that such networks of civil society actors named interlocutory coalitions may have on the convergence of principles of administrative governance across the European legal system and other supranational legal systems The book takes two main controversial aspects into account the first relates to the convergence between administrative rules pertaining to different supranational regulatory systems Traditionally the spread of methods of administrative governance has been depicted primarily against the background of the interactions between the domestic and the supranational arena both from a top down and bottom up perspective However the exploration of interactions occurring at the supranational level between legal regimes is still not grounded on adequate empirical evidence The second controversial aspect considered in this book consists of the role of civil society actors operating at the supranational level In its discussion of the first aspect the book focuses on the relations between the European administrative law and the administrative principles of law pertaining to other supranational regulatory regimes and regulators including the World Bank the International Monetary Fund the World Trade Organization the United Nations the Organization for Economic Cooperation and Development the Asian Development Bank and the Council of Europe The examination of the second aspect involves the exploration of the still little examined but crucial role of civil society organised networks in shaping global administrative law These interlocutory coalitions include NGOs think tanks foundations universities and occasionally activists with no formal connections to civil society organisations The book describes such interlocutory coalitions as drivers of harmonized principles of participatory democracy at the European and global levels However interlocutory coalitions show a number of tensions e g the governability of coalitions the competition among them that may hamper the impact they have on the reconfiguration of individuals rights entitlements and responsibilities in the global arena Organizational Behaviour David A.
