Many of us take our mental health for granted, so when we are confronted by mental illness in friends or family members or in ourselves, we can be overwhelmed. *Understanding Troubled Minds* is a calm and authoritative guide that takes us through the full range of mental illnesses and their treatments, emphasising the value of partnerships between psychiatrists, patients and their families. There are chapters that deal with mental illnesses afflicting children and adolescents, women and the elderly, as well as covering eating disorders, self-harm, gender identity and alcohol and drug dependence. Sidney Bloch, an eminent academic psychiatrist of many years' clinical experience, highlights the place of hope and optimism throughout, pointing to the great strides being made in the understanding and treatment of mental illnesses. Acknowledging the complexity of human nature, Professor Bloch weaves stories of real people and the insights of many writers and artists throughout the text. Balanced, humanistic and thoroughly readable, this updated edition of *Understanding Troubled Minds* serves as a practical guide to mental illness and its treatment.

**Bipolar and the Art of Roller-coaster Riding** Madeleine Kelly, 2005. *The Lived Experience in Mental Health* Gary Morris, 2016-09-15. The importance of recognising the knowledge and the needs of service users and engaging them more proactively within the care process is now widely acknowledged, but it is not always clear how this can come about. *The Lived Experience of Mental Health* highlights individuals' own lived and felt mental health experience in order to share their expertise about mental health problems and the care offered. This text begins by exploring the importance of engaging with the internal world of those living with various mental health problems and reflecting upon personal narratives as means of expressing and sharing experience, as well as the status of these narratives as evidence. The central section of the book looks at five commonly experienced mental health states: anxiety problems, depression, mood extremes, states of altered reality (linked for example with psychosis and schizophrenia) and impaired cognition (linked for example with dementia). The chapters look at how the mental state in question is experienced, including the experience of it in the context of the wider world where health and social care services and the responses of other people play a part. Drawing on personal narratives from a wide range of sources, this text foregrounds the voices of experts by experience and relates them to the academic literature. The narratives collectively convey a breadth of experience, including both concepts of struggling and living well with mental health issues. The book ends by outlining resources where a range of first-person narratives can be accessed, from online forums to films, and providing a strategy for teaching and learning associated with the exploration of lived experience narratives. Designed for health professionals working with people experiencing mental health problems, this illuminating text uses personal narratives to emphasise the importance of person-centred care and participation by service users in their own care. It will also be an interesting read for experts by experience themselves, as well as their families and

friends      **Mental Health and Spirituality in Later Life** Elizabeth MacKinlay, 2014-01-02 Explore pastoral strategies for dealing with mental health problems Mental health is increasingly being recognized as an important issue in later life This valuable book will help you examine this dimension of aging in the context of pastoral spiritual and cultural issues It explores the relationship between mental health spirituality and religion in later life including the search for meaning cultural issues spiritual issues depression dementia and issues of suicide in older people The first part of Mental Health and Spirituality in Later Life focuses on theology ethics and cultural issues in mental health and aging The second part addresses issues of multidisciplinary practice including a challenging chapter written by a woman with early onset dementia Alzheimer s and other chapters that present perspectives on the uses and meanings of ritual and symbolism in mental health and pastoral approaches to care Part one of Mental Health and Spirituality in Later Life deals with issues of theology culture and mental health in later life focusing on the importance of a richly textured understanding of personhood as a prerequisite for constructing a picture of late life mental health in the context of theology the relationship between culture spirituality and meaning for older immigrants and their effects on mental health the adverse effects of a mental health system that reflects only the dominant culture of a society leaving minority cultures vulnerable to misdiagnosis and inappropriate treatments that can do more harm than good a wholistic picture of aging that moves beyond the biomedical paradigm and demonstrates the power and potential of the human spirit in adjusting to and moving beyond suffering Part two of this valuable book addresses issues of concern to practitioners in mental health and spirituality for the aging including disruptive behavior among nursing home residents and common practices that fail to identify its causes or address the problem how some staff resident interactions can produce suffering for all concerned with case study outlines that illustrate the point memory loss and its effect on spirituality self worth and the faith community pastoral care for people suffering with dementia with practical information on helping them to make use of the power of prayer and to deal with loneliness fear and disempowerment an insightful look at a recent major study of residents in aged care facilities in Australia that explores the link between depression and spirituality risk and protective factors associated with suicide in later life and the treatment of depression pastoral interventions for depression and dementia      **Motherhood and Postnatal Depression** Carolyn Westall, Praneet Liamputtong, 2011-07-21 Globally postnatal depression PND is a growing public health problem PND affects 10 to 15% of women in Western society It caused by a combination of biological psychological and social factors Two models have attempted to define and explain PND the biomedical and the sociological models The traditional biomedical model views PND as a medical condition which implies there is individual pathology and abnormality Whilst the biomedical model has been the dominant model in treating PND it has been criticized by feminist sociologists and psychologists for its rigidity in defining and explaining PND In contrast the psychosocial model of health acknowledges the biological factors that impact on emotional well being but places more emphasis on the personal and social factors that impact on emotional well being but

places more emphasis on the personal and social factors that contribute to depressive symptoms such as gender poverty social disadvantage and social class The central argument throughout this book is the importance of support before and after the birth for women s emotional well being This book will also include women s journeys through pregnancy childbirth motherhood postnatal depression and resolution To date literature has focused on women s lived experiences of PND rather than their personal journeys through pregnancy childbirth and early motherhood Additionally the adjustment to fatherhood has received less attention For example little is known about the impact of postnatal depression on the partner what support partners offer when women with the intention to fill the gap in knowledge of cultural and social issues relating to pregnancy childbirth and motherhood for woman who were diagnosed with and had resolved PND
