questioning managerial organization business culture industrial relations restrictive practices and multinational business This book offers a comprehensive account of a company and its industry but pursues themes and seeks to answer areas of debate illuminating the ways in which marketing contributed to the growth of an enterprise **Formulating development**

Lola Wilhelm, 2025-09-02 In the 1970s Nestl became a lightning rod for criticism against the food industry s negative impacts on humans and their environment especially in the Global South But what has so far eluded historical scrutiny is that the picture was more nuanced This book tells the exclusive story of how the Swiss food giant and more broadly corporate capitalism have shaped the aid industry since the late nineteenth century It follows Nestl s bid for a share of the humanitarian market brokered by the Red Cross in wartime Europe of its clinical trials in Swiss and Senegalese maternities and of its agricultural modernisation schemes in Mexico India and the Ivory Coast Based on extensive research in the firm s own historical archives and the records of national and international aid agencies the volume interrogates the legacies of this long history for international development today **History of Soymilk and Other Non-Dairy Milks (1226-2013)**

Global Business Mark Casson, 2023-09-06 This fascinating book examines international business and multinational enterprise as part of a bigger picture considering the importance of two main components space and time Summarising the past five years Mark Casson reviews the changing role of multinational enterprises within the global economy and how leading firms have generated profitability and growth not only from innovations in technology and marketing but also by exploiting legal loopholes in tax and regulatory systems [The Visible Hand](#) Alfred D. Chandler Jr., 1993-01-01 The role of large scale business enterprise big business and its managers during the formative years of modern capitalism from the 1850s until the 1920s is delineated in this pathmarking book Alfred Chandler Jr the distinguished business historian sets forth the reasons for the dominance of big business in American transportation communications and the central sectors of production and distribution *The History of Foreign Investment in the United States to 1914* Mira Wilkins, 1989 From the colonial era to 1914 America was a debtor nation in international accounts owing more to foreigners than foreigners owed to us By 1914 it was the world s largest debtor nation Mira Wilkins provides the first complete history of foreign investment in the United States during that period The book shows why the United States was attractive to foreign investors and traces the changing role of foreign capital in the nation s development covering both portfolio and direct investment The immense new wave of foreign investment in the United States today and our return to the status of a debtor nation once again the world s largest debtor nation makes this strong exposition far more than just historically interesting Wilkins reviews foreign portfolio investments in government securities federal state and local and in corporate stocks and bonds as well as foreign direct investments in land and real estate manufacturing plants and even such service sector activities as accounting insurance banking and mortgage lending She finds that between 1776 and 1875 public sector securities principally federal and state

securities drew in the most long term foreign investment whereas from 1875 to 1914 the private sector was the main attraction. The construction of the American railroad system called on vast portfolio investments from abroad. There was also sizable direct investment in mining, cattle ranching, the oil industry, the chemical industry, flour production and breweries as well as the production of rayon thread and even submarines. In addition, there were foreign stakes in making automobiles and electrical and nonelectrical machinery. America became the leading industrial country of the world at the very time when it was a debtor nation in world accounts.

Multinationals and Global Capitalism Geoffrey Jones, 2005. This book provides a unique contribution to contemporary globalization debates by providing an accessible survey of the growth and role of multinational enterprises in the world economy over the last two hundred years. The author shows how entrepreneurs built a global economy in the nineteenth century by creating firms that pursued resources and markets across borders. It demonstrates how multinationals shifted strategies as the first global economy disintegrated in the political and economic chaos between the two world wars and how they have driven the creation of the contemporary global economy. Many of the issues of the global economy have been encountered in the past. This book shows how entrepreneurs and managers met the political, ethical, cultural and organizational challenges of operating across national borders at different times and in different environments. The role of multinationals is placed within their wider political and economic context. There are chapters on the impact of multinationals and on relations with governments. The focus on the shifting roles of firms and industries over time rather than abstract trade and capital flows provides compelling evidence on the diversity and discontinuities of the globalization process. The book explains the history of multinationals across a wide spectrum of manufacturing, service and natural resource industries from an international perspective which ranges widely across different countries. It provides an essential historical framework for understanding global business. An accessible survey of the history of international business worldwide, this book will be key reading for students taking courses in International Business, Business History, Multinationals and Entrepreneurship and of interest to academics and researchers working in these areas.

Creating Global Capitalism Espen Storli, Marten Boon, 2024-10-04. This book provides a unique insight into the world of commodity trading companies, often depicted as the hidden companies of the global economy and showcases how they were instrumental in bringing about the economic integration of new commodities and far flung regions into the first global economy in the late nineteenth and early twentieth century. The late nineteenth century witnessed an unprecedented phase of global economic integration. As organisers of global trade, trading companies specialising in commodities were instrumental in creating this first global economy. From soybeans to cultural artefacts, from seal hides to rubber, trading companies connected far flung regions at or beyond the frontier of empires to a growing global market for these commodities. Satisfying the insatiable appetite for commodities of industrializing economies in North America, Europe and East Asia, their nimble organisations and specialised trading skills allowed trading companies to harness imperial geopolitics, latch onto local networks and move across borders.

This book brings together a collection of case studies of commodity trading companies across a range of commodities and regions between the 1870s and the 1930s Through the lens of global value chains the contributions showcase how these companies continuously adapted their businesses to a world that was at once economically more integrated but politically increasingly competitive in this age of high imperialism and national competition The chapters in this book were originally published as a special issue of Business History

Mothers and Medicine Rima D. Apple,1987-12-16 In the nineteenth century infants were commonly breast fed by the middle of the twentieth century women typically bottle fed their babies on the advice of their doctors In this book Rima D Apple discloses and analyzes the complex interactions of science medicine economics and culture that underlie this dramatic shift in infant care practices and women s lives As infant feeding became the keystone of the emerging specialty of pediatrics in the twentieth century the manufacture of infant food became a lucrative industry More and more mothers reported difficulty in nursing their babies While physicians were establishing themselves and the scientific experts and the infant food industry was hawking the scientific bases of their products women embraced scientific motherhood believing that science could shape child care practices The commercialization and medicalization of infant care established an environment that made bottle feeding not only less feared by many mothers but indeed natural and necessary Focusing on the history of infant feeding this book clarifies the major elements involved in the complex and sometimes contradictory interaction between women and the medical profession revealing much about the changing roles of mothers and physicians in American society The strength of Apple s book is her ability to indicate how the mutual interests of mothers doctors and manufacturers led to the transformation of infant feeding Historians of science will be impressed with the way she probes the connections between the medical profession and the manufacturers and with her ability to demonstrate how medical theories were translated into medical practice Janet Golden Isis

Leviathans Alfred D. Chandler,Bruce Mazlish,2005-01-17 A ground breaking 2005 exploration of multinational corporations that differs from other books on the subject by offering the reader a totally global perspective of multinationals without portraying them simply as economic entities Written by experts on various aspects of the history development cultural and social implications of the multinational corporation the book paints a compelling and coherent picture of the way these businesses affect almost all areas of our existence As we might expect the multinational company is shown to play a major role in the globalization that is reshaping so much of our lives
