Feed the Baby Hummus Lisa Lewis,2018-03-01 Parenting practices vary widely between countries and cultures For example in countries such as the Philippines breastfeeding after age one year is common and parents can make their own decision about what is right for their family In Korea babies eat a variety of spices and flavors helping them develop a diverse palate and healthy eating habits And in Italy parents prevent separation anxiety by taking their babies to markets restaurants and churches and passing them around from person to person Feed the Baby Hummus teaches parents to confidently incorporate various multicultural practices into their own caretaking plan Pediatrician Lisa Lewis offers the wisdom and proven caretaking practices of the cultures of the world drawn from her own training research travel and clinical experience Although certain standards of care must exist for babies to thrive and be happy Feed the Baby Hummus offers a variety of cross cultural parenting information and baby care guidance from a trusted source

How Children Experience Trauma and How Parents Can Help Them Cope Meg Fargher,Helen Dooley,2012-09-28 For a parent there are few things more frightening than the thought of one s child or a close family member becoming the victim of trauma How do I help them cope Can I help them cope What if I m not even able to cope myself These are some of the automatic responses that could flash through a parent s mind at the prospect of having to deal with an unexpected painful or traumatic experience or with the fear or threat of such trauma becoming a reality These experiences can be damaging and life changing on many levels and in many societies they have indeed become an everyday reality The chapters in How Children Experience Trauma And How Parents Can Help Them Cope address a number of different types of trauma and they offer sound and tested advice on each one Among others they deal with trauma related to crime to accidents untimely death and devastating loss They cover peer group and relationship issues including bullying and abuse and each one presents a number of illustrative case studies to help parents relate to and understand what they and their children might be experiencing internally The authors explain some typical emotional and physiological reactions that may arise during immediately after and some time after the trauma

They provide parents and caregivers with the theoretical as well as some practical tools to guide their children and themselves towards recovery and healing. All trauma although accompanied by loss often terrifying and terrible loss gives us an opportunity to put life into perspective encourages us to evaluate relationships and possibly to shed that which is toxic or unhelpful and to retain that which is healthy. By presenting the theory and examining the therapeutic options available Meg Fargher and Helen Dooley draw on their extensive training and experience in this field to help parents and children access the resilience that is part of every human being allowing them to heal and move on different but potentially stronger.

Parental Engagement and Early Childhood Education Around the World Susanne Garvis, Sivanes Phillipson, Heidi Harju-Luukkainen, Alicja Renata Sadownik, 2021-12-23 Exploring the importance of parental engagement in early childhood education this book delves into research and practices in 25 countries to bring students researchers teachers and policy makers insights into working families around the world. The incorporation and consideration of parental engagement and involvement in early childhood education are a new phenomenon to many countries. Yet increasing research recognises the importance of parental engagement and involvement in early childhood education services and the role both parents and teachers play to support children's learning and

development Using a range of materials from curriculum to policy documents Garvis et al demonstrate differences in practices and terminologies pertaining to the topic and provide an international perspective on the importance of parental involvement and engagement in early childhood education services The content covers a range of countries as well as countries beyond an Anglo Saxon perspective The different policy settings across these countries highlight how countries work with and involve parents differently which is useful for jurisdictions where early childhood education is a developing aspect of a country s education system Looking at cultural influences partnership approaches parental collaboration institutional dominance and child involvement in parent meetings the content offers readers real understanding of parental engagement and involvement in different settings The readership includes students in early childhood education and researchers teachers policy makers and general members of the public interested in parental engagement or involvement in early childhood education across the globe *Parenting and the Child's World* John G. Borkowski, Sharon Landesma Ramey, Marie Bristol-Power, 2001-10-01 Stimulated by the publication of *The Nurture Assumption* by Judith Rich Harris *Parenting and the Child s World* was conceived around the notion that there are multiple sources of influence on children s development including parenting behavior family resources genetic and other biological factors as well as social influences from peers teachers and the community at large The text s 39 contributors search for when where and how parenting matters and the major antecedents and moderators of effective parenting The chapters focus on the major conceptual issues and empirical approaches that underlie our understanding of the importance of parenting for child development in academic socio emotional and risk taking domains Additional goals are to show how culture and parenting are interwoven to chart future research directions and to help parents and professionals understand the implications of major research findings

Parents, Help Your Child Say No to Drugs Norman Leibrock, 2002-08-07 Books are like people each one has its own story My book is a story about teenagers with an addiction for drugs and the adverse effects these addictions have on their parents My hope is that this book will present a picture of the many changes that can present themselves in the lives of young people and parents in their battle with mind altering drugs Many parents unfortunately are lost in the complexities of our everyday busy lives and their minds are clouded to the problems that are developing before them Many of us are either oblivious to the problem of drugs or are too afraid to admit to ourselves that we do not know what to do if it happens in our families Parents are sadly convinced that drug addiction can never happen to their children My wife Jane and I had to face that sudden realization that drugs were destroying the life of our son I believe that my book when read in its entirety will give you the guidance and insight to help all parents and their children to fight drug addiction and to render proper guidance to those already in the grip of mind altering drugs This book will help to illuminate those hidden changes that drugs can bring into the lives of our children and teenagers and with it the effects it will have on those around them I hope and pray that the sharing of this valuable information along with my own experiences will be a positive force in the thinking of our teenagers and their

loving parents My fellow parents it is of the utmost importance that no matter what happens and how tough it may get remember there is no other way but up Wherever you are and whatever the problem dont ever stop the fight against drug addiction I am aware that in the hard nosed world we live in there are a multitude of self help books and numerous concepts and scientific theories on how to successfully face your problems and bring about changes in your life But I have written my book for this reason that parents can be hopeful in a time of adversity suffering from a family drug addiction problem Let faith and understanding change your life around As parents we often read about drugs and the effects they have upon our children Invariably our many conversations will drift to the topic of drug addiction and whether our children are in fact using drugs and what we can do about it I remember sitting with a group of parents discussing drugs Although we all agreed that the rapid introduction of mind altering substances was a critical problem to our children not everyone was in agreement what we should and could do about this problem if it affects our family Some parents told us our family is very content since all our children are young this problem doesnt pertain to us at this time Some parents sat back and told me that their teenage children have never taken drugs They never had to discuss drugs with their children because they knew they would never touch them A third group of parents were honest enough to admit that their teenage son was a drug addict for years and they didnt know it and when they found out about it they didnt know what to do about it Parents do these statements sound familiar Perhaps something you have heard before but shrugged it off as something you would never have to worry about I realize that this is a sad scenario but very true Too many parents are not taking the time to talk to their children and establish a drug free family when they are young and vulnerable The result has been too many young people becoming drug addicts Some of them could have been prevented or helped at a young age That initial help must come from us as their parents We must have a constant sense of awareness of this problem facing our children today Remember parents we cannot change the nature of the drug addict or his addiction but we can help
