Bicycle Justice and Urban Transformation Aaron Golub, Melody L. Hoffmann, Adonia E. Lugo, Gerardo F. Sandoval, 2016-07-15 As bicycle commuting grows in the United States the profile of the white middle class cyclist has emerged This stereotype evolves just as investments in cycling play an increasingly important role in neighborhood transformations However despite stereotypes the cycling public is actually quite diverse with the greatest share falling into the lowest income categories Bicycle Justice and Urban Transformation demonstrates that for those with privilege bicycling can be liberatory a lifestyle choice whereas for those surviving at the margins cycling is not a choice but an often oppressive necessity Ignoring these invisible cyclists skews bicycle improvements towards those with choices This book argues that it is vital to contextualize bicycling within a broader social justice framework if investments are to serve all street users equitably Bicycle justice is an inclusionary social movement based on furthering material equity and the recognition that qualitative differences matter This book illustrates equitable bicycle advocacy policy and planning In synthesizing the projects of critical

cultural studies transportation justice and planning the book reveals the relevance of social justice to public and community driven investments in cycling This book will interest professionals advocates academics and students in the fields of transportation planning urban planning community development urban geography sociology and policy **African Economic Outlook 2013 Structural Transformation and Natural Resources** OECD,African Development Bank,United Nations Development Programme,United Nations Economic Commission for Africa,2013-05-27 The African Economic Outlook is the only annual report that monitors in detail the economic performance of 53 individual countries on the continent using a strictly comparable analytical framework The focus of the 2013 edition is structural transformation and natural resources in Africa *OECD Reviews of Digital Transformation: Going Digital in Sweden* OECD,2018-06-15 OECD Reviews of Digital Transformation Going Digital in Sweden analyses recent developments of the digital economy in the country reviews policies related to digitalisation and makes recommendations to increase policy coherence in this area The Global Transformation Barry Buzan,George Lawson,2015-02-05 The long nineteenth century 1776 1914 was a period of political economic military and cultural revolutions that re forged both domestic and international societies Neither existing international histories nor international relations texts sufficiently register the scale and impact of this global transformation yet it is the consequences of these multiple revolutions that provide the material and ideational foundations of modern international relations Global modernity reconstituted the mode of power that underpinned international order and opened a power gap between those who harnessed the revolutions of modernity and those who were denied access to them This gap dominated international relations for two centuries and is only now being closed By taking the global transformation as the starting point for international relations this book repositions the roots of the discipline and establishes a new way of both understanding and teaching the relationship between world history and international relations *Ontology and World Politics* Sergei Prozorov,2013-10-23 Together these two companion volumes develop an innovative theory of world politics grounded in the reinterpretation of the concepts of world and politics from an ontological perspective *Ontology and World Politics* presents a new approach to political universalism grounded in the reinterpretation of world politics from an ontological perspective In the discipline of International Relations the concept of world politics remains ambivalent functioning both as a synonym of international relations and their antonym denoting the aspirations for the overcoming of interstate pluralism in favour of a universalist politics of the global community or the world state Rather than distinguish world politics from international politics by its site level or issues Prozorov interprets it as another kind of politics Drawing on Martin Heidegger s account of world disclosure and Alain Badiou s phenomenology of worlds this book posits world politics as a practice of the affirmation of universal axioms across an infinite plurality of limited and particular situations or worlds Prozorov reinterprets the familiar principles of community equality and freedom in ontological terms as attributes of pure being subtracted from all positive determinations and presents them as axioms of universalist politics valid in any world whatsoever This approach to world

politics serves as the groundwork for a comprehensive reconsideration of the central themes of political and international relations theory. Systematic and accessible, these works will be key reading for all students and scholars of political science and international relations.

Contemporary Demographic Transformations in China, India and Indonesia Christophe Z. Guilmoto, Gavin W. Jones, 2015-12-12 This book examines the profound demographic transformation affecting China, India and Indonesia where 40% of the world's people live. It offers a systematic comparative approach that will help readers to better understand the changing social and regional recomposition of the population in these regions. The chapters present a detailed investigation and mapping of regional trends in mortality, fertility, migration and urbanization, education and aging. Throughout the analysis carefully considers how these trends affect economic and social development. Coverage also raises global theoretical questions about the singular ways in which each of these three countries have achieved their demographic transition. As the authors reveal, demographic trends seem to be somewhat linear and anticipatable, providing Asia's three demographic giants and their governments a formidable advantage in planning for the future. But the evolution of human mobility in China, India and Indonesia closely intertwined as it is with changing economic conditions appears less predictable and ranks high among the major challenges to demographic knowledge in the coming decades. Offering an insightful look into the components, implications and regional variations of a changing population, this book will appeal to social scientists, demographers, anthropologists, sociologists, epidemiologists and specialists in Asian studies.

Encounters with World Affairs Emilian Kavalski, 2016-03-09 This book is designed to familiarise students with leading International Relations (IR) theories and their explanation of political events, phenomena and processes which cross the territorial boundaries of the state. Thus students will be exposed to the interplay between power, interest, ideas, identity and resistance in explaining continuity and change in international relations. Developed to provide students with the analytical tools and intellectual frameworks needed to understand the behaviour of different international actors in contemporary global affairs, this textbook responds to the challenges of a dynamic job market by assisting students to gain both thorough theoretical knowledge and training them to apply this knowledge to real world problems. In short, this textbook delivers a comprehensive and interdisciplinary approach to the examination of national, regional and global trends in politics, economics and socio-cultural developments, allowing students to understand the practice and theory of contemporary international relations, the politics, culture, history and economies of different regions around the world, the role played by international interactions, culture and government in local, national and global settings. Equipping students with the proficiency to understand and interpret the dynamics, patterns and issues of global affairs, to know how to get more information about particular questions, to evaluate that information independently and effectively. To these ends, the textbook provides a number of features that will appeal to students and avoids overwhelming students with chapters on topics which in practice are rarely on courses while nonetheless providing a comprehensive overview of the field. Introduces students to the main debates, topics and terms in the field and allows them to

decide which they would like to focus on in their further studies

Europeanisation and the Transformation of EU Security Policy Petros Violakis, 2018-05-15 The aim of this study is to examine the extent to which the end of the Cold War led to Europeanisation in the Common Security and Defence Policy CSDP The analysis takes into consideration previous studies on Europeanisation and its impact on the transformation of national security and defence and attempts to account for the development of Europeanisation and related mechanisms These mechanisms which have been described as framing mechanisms and negative integration incorporate all the major relevant factors identified here i e a common Strategic Culture new security identity domestic political decision making industrial base and defence spending decline that contributed to the realisation of the CSDP The relevance of these factors for CSDP Europeanisation is examined through an historical and empirical analysis and the relationship between the CSDP and North Atlantic Treaty Organization NATO is also explored This approach facilitates analysis of the debate concerning the emergence of the CSDP and throws light on the political shift that led European Union EU leaders to support the CSDP Another aspect of this study is the empirical examination of the dynamics and limitations of the European defence sector The changes which took place in this sector facilitated the emergence of the CSDP and are therefore analysed in the light of globalisation issues economies of scale economic crises military autonomy new security strategy and Research and Development R D impact This book will be of interest to students of European security EU politics defence studies and International Relations

Welfare State Transformation in the Yugoslav Successor States Marija Stambolieva, 2016-04-28 Welfare states are the product of economic political and social interactions and undergo changes as these interactions transform Existing welfare state theories mainly tend to explain the emergence and development of the welfare state in the western industrialized and capitalist world While the states of Central and Eastern Europe have recently been integrated in the academic discourse the countries of the former Yugoslavia have been predominantly excluded from comparative analysis Issues of nationalism and ethnic polarization have been prevalent there while socio economic issues have been put on the back burner This book explores what happened to the strong social states and relatively equal societies which existed in Slovenia Croatia Serbia and Macedonia and looks into what accounts for these diverse outcomes By investigating the applicability of the theories on welfare state development and typologization it fills in the gap in the welfare state literature It offers an original typology of social citizenship that takes into account the diversity of welfare policy formations across the region The aim of this typology is not to compete with existing ones but rather to offer a framework for better understanding of states that do not necessarily fit into known explanatory categories In a global context of changing economic circumstances and contending political responses macroeconomic policy and welfare state reform become order of the day By featuring the ways that states adjust to new pressures this book s arguments may come in handy to those trying to make sense of the crisis and the powers that drive the policy solutions
