Architectural Excursions Donald L. Johnson, Donald Langmead, 2000-08-30 Soon after 1900 in both North America and Europe the evolution from the tradition of Mediterranean and Gallic architectural styles to modernism began This phenomenon was due in part to American industrial architecture and the work of Frank Lloyd Wright Wright's building and architectural treatises of 1898-1908 with the additional help of Dutch propaganda on his behalf significantly influenced European practitioners and theorists European architecture within and outside of Holland reflects an adaptation of Wright's theories along with the structural determinism of American industrial buildings With new evidence and fresh analysis culled from Dutch and American archives personal correspondence and professional material this study examines the weight of Wright's works and words and those of the Dutchmen H P Berlage Theo van Doesburg Jan Wils J J P Oud William Dudok and Hendrik Theodor Wijdeveld This new insight on the effects of Wright's architectural theories and designs coupled with an extensive guide for further research will attract art and architecture scholars and historians on both sides of the Atlantic and will also be of interest to social historians artists and architects Events and new theories including the assertion that Hendrik Theodor Wijdeveld was the catalytic source behind Wright's Taliesin Fellowship established in 1932 are presented in clear accessible language Tied to the text are numerous visual presentations of significant designs and buildings

Frank Lloyd Wright's SC Johnson Research Tower Mark Hertzberg, Frank Lloyd Wright, 2010 Frank Lloyd Wright's SC Johnson Research Tower in Racine Wisconsin is one of modern architecture's most significant landmarks Completed in 1950 the fifteen story skyscraper is the only existing example of Wright's ambitious taproot design Like limbs from a tree trunk alternating square floors and round mezzanines branch out from the weight bearing central core a truly revolutionary idea at the time and an engineering marvel today In 1943 H F Johnson Jr president of the SC Johnson Son Company commissioned Wright 1867-1959 to create a new laboratory space that would be as innovative as the research and development team working inside it The architect eagerly accepted the challenge envisioning a vertical complement to the firm's streamlined Administration Building designed by Wright seven years prior The result was a new kind of skyscraper one with double height spaces windows made of Pyrex glass tubing and stripes of Wright's signature Cherokee red brick all balanced on a small pedestal base the Tower's sinewy core Although the Tower opened to great acclaim in 1950 it closed just thirty one years later Despite its ingenious

structure the building ultimately proved to be an impractical model of urban industrial architecture Frank Lloyd Wright's SC Johnson Research Tower investigates the rise and fall of this remarkable building Bruce Brooks Pfeiffer director of the Frank Lloyd Wright Foundation Archives provides an insightful Foreword while Mark Hertzberg's text explores the design the construction and through interviews with Johnson employees the experience of working within Wright's iconic Tower A photo essay titled The Tower Rises chronicles the construction with historical photographs and Hertzberg's artful photographs document the Tower inside and out as it appears today
