real and well warranted indictment of the entire American system both to the Public Private sectors for all the failures and fallacies that cause a major sector of our youth and future to be all but forgotten and LOST forever AND The evolution out of that which is now able to be realized and understood of a worthy and all encompassing ANSWER SOLUTION in the non profit charity organization called TIME OUT FOR KIDS INC *What's Wrong with My Child?* Sandra Surace, 2010 At least six million American children have difficulties that are diagnosed as serious mental disorders according to government surveys a number that has tripled since the early 1990s But there is little convincing evidence that the rates of illness have increased in the past few decades Rather many experts say it is the frequency of diagnosis that is going up in part because doctors are more willing to attribute behavior problems to mental illness and in part because the public is more aware of childhood mental disorders NY Times 2006 According to the US Attorney General Mental disorders are characterized by abnormalities in cognition emotion or mood or the highest integrative aspects of behavior such as social interactions or planning of future activities The process of diagnosing these disorders comes with a great deal of controversy Before a diagnosis is accepted the practitioner must be able to explain how the behaviors differ from normal developmental behaviors In Hope's case medical treatment would not be effective in reducing symptoms because her environment never changed The sexual abuse never stopped and Hope was merely medicated into submission Once the need for medications for such a young girl reached three the psychiatrist should have started asking other questions However since psychiatry categorizes the individual once labeled it stops questioning the diagnosis as being potentially false and thereby confines treatment to the social standard of normal
