Life Sculpted Anthony J. Martin, 2023-06-02 There is much to love between this book's covers There are many eureka moments in *Life Sculpted* and some truly beautiful ones Eugenia Bone Wall Street Journal Meet the menagerie of lifeforms that dig crunch bore and otherwise reshape our planet Did you know elephants dig ballroom sized caves alongside volcanoes Or that parrotfish chew coral reefs and poop sandy beaches Or that our planet once hosted a five ton dinosaur crunching alligator cousin In fact almost since its fascinating start life was boring Billions of years ago bacteria algae and fungi began breaking down rocks in oceans a role they still perform today About a half billion years ago animal ancestors began drilling scraping gnawing or breaking rocky seascapes In turn their descendants crunched through the materials of life itself shells wood and bones Today such bioeroders continue to shape our planet from the bacteria that devour our teeth to the mighty moon snail always hunting for food as evidenced by tiny snail made boreholes in clams and other moon snails There is no better guide to these lifeforms than Anthony J. Martin a popular science author paleontologist and co-discoverer of the first known burrowing dinosaur Following the crumbs of lichens sponges worms clams snails octopi barnacles sea urchins termites beetles fishes dinosaurs crocodilians birds elephants and of course humans *Life Sculpted* reveals how bioerosion expanded with the tree of life becoming an essential part of how ecosystems function while reshaping the face of our planet With vast knowledge and no small amount of whimsy Martin uses paleontology biology and geology to reveal the awesome power of life's chewing force He provokes us to think deeply about the past and present of bioerosion while also considering how knowledge of this history might aid us in mitigating and adapting to climate change in the future

Yes Martin concedes sometimes life can be hard but life also makes everything less hard every day *Crab* Cynthia Chris, 2021-03-15 What is a crab What significance do crabs play in the world In *Crab* Cynthia Chris reveals that these charming creatures are social by nature creative problem solvers and invaluable members of the environments in which they live Their formidable physical forms their hard to harvest and quick to spoil flesh and their sassy demeanor have inspired artists and writers from Vincent van Gogh to Jean Paul Sartre Chris sketches vivid portraits of these animals tracing the history of the crab through its ancient fossil record to its essential role in protecting its own habitats from the threat of climate change **Crabs** Peter J. F. Prescott, Paul F.M.J. Verschure, 2019-07-05 This book constitutes the proceedings of the 8th International Conference on Biomimetic and Biohybrid Systems Living Machines 2019 held in Nara Japan in July 2019 The 26 full and 16 short papers presented in this volume were carefully reviewed and selected from 45 submissions They deal with research on novel life like technologies inspired by the scientific investigation of biological systems biomimetics and research that seeks to interface biological and artificial systems to create biohybrid systems **Growing Sideways in Twenty-first Century British Culture** Anne Malewski, 2021-12-15 This volume examines changing boundaries between childhood and adulthood in British society and culture at the beginning of the twenty first century where these age boundaries are widely debated policed and contested to investigate alternatives to conventional ideas of growing up Building on observations especially in children's literature criticism that human growth is shaped by a grand narrative that privileges adulthood and on terminologies of non normative

growth particularly in queer theory this monograph develops growing sideways as a concept that queers this grand narrative by destabilising childhood and adulthood and the boundaries between them The concept is refined through close readings of twenty first century British children s literature television series film and participatory events troubling age boundaries via specific strategies in three conceptual areas appearance play and space Exploring power structures around age and gender this monograph traces growing sideways as a distinct and important alternative discourse of human growth *Things That Make You Go Yuck!* Jennifer Dlugos, Charlie Hatton, 2021-09-16 It takes two to tango but in the wild two can do much crazier things than dance In *Things That Make You Go Yuck* Odd Couples you ll find out about nature s strangest dating rituals cooperative couples and parasitic pests You ll explore symbiotic pairings like crabs that carry sea urchins on their backs and hybrid franken species that seem like something out of a science fiction tale Whether it s nature s slimiest organisms or the weirdest mutations *Things That Make You Go Yuck* celebrates survival of the fittest grossest craziest and creepiest things in nature proving once and for all that life in the wild is anything but ordinary Ages 9 12 **Vanishing Treasures** Katherine Rundell, 2024-11-12 A MOST ANTICIPATED BOOK FROM BOSTON GLOBE CHICAGO TRIBUNE AND MORE From the 1 New York Times bestselling author Katherine Rundell comes a rare and magical book Bill Bryson reckoning with the vanishing wonders of our natural world This celebration of seahorses lemurs and others doubles as a wake up call look around and protect what you love Boston Globe The world is more astonishing more miraculous and more wonderful than our wildest imaginings In this brilliant and passionately persuasive book Katherine Rundell takes us on a globe spanning tour of the world s most awe inspiring animals currently facing extinction Consider the seahorse couples mate for life and meet each morning for a dance pirouetting and changing colors before going their separate ways to dance again the next day The American wood frog survives winter by allowing itself to freeze solid its heartbeat slowing until it stops altogether Come spring the heart kick starts itself spontaneously back to life As for the lemur it lives in matriarchal troops led by an alpha female it s not unusual for female ring tailed lemurs to slap males across the face when they become aggressive Whenever they are cold or frightened they group together in what s known as a lemur ball paws and tails intertwined to form a furry mass as big as a bicycle wheel But each of these extraordinary animals is endangered or holds a sub species that is endangered This urgent inspiring book of essays dedicated to 23 unusual and underappreciated creatures is a clarion call insisting that we look at the world around us with new eyes to see the magic of the animals we live among their unknown histories and capabilities and above all how lucky we are to tread the same ground as such vanishing treasures Beautifully illustrated and full of inimitable wit and intellect *Vanishing Treasures* is a chance to be awestruck and lovestruck to reckon with the beauty of the world its fragility and its strangeness **Urban Biodiversity** Erik Kiviat, Kristi MacDonald, 2022-07-26 In a case study of urban biodiversity Erik Kiviat and Kristi MacDonald present two decades of data and assessment of the habitats and biota of the Meadowlands *Urban Biodiversity* The Natural History of the New Jersey

Meadowlands documents the mammals birds reptiles amphibians fish butterflies bees dragonflies seed plants mosses and lichens of the Meadowlands region and their patterns of occurrence The work records the natural history of an urban industrial region helping decision makers foster the biodiversity that thrives in cities and giving planners tools to reduce the biological degradation that occurs with urbanization For more info please visit this link <https://www.hudsonia.org/nj-meadowlands>

Wonderbaarlijke dieren Katherine Rundell, 2023-03-30 Schitterend bestiarium voor jong en oud Een gierzwaluw vliegt tijdens zijn leven een afstand van twee miljoen kilometer Even ver als twee keer heen en weer naar de maan en nog een keertje terug naar de maan Ooit kreeg de koning van Frankrijk een giraffe cadeau Die paradeerde door de straten van Parijs in de mooiste haute couture regenjas van dat moment De tong van een schubdier is langer dan zijn lichaam Hij zit netjes opgeborgen bij zijn heupgewricht In *Wonderbaarlijke dieren* die echt bestaan zijn eenentwintig van de meest fascinerende wonderschone schepsels verzameld die onze aarde bevolken en helaas met uitsterven worden bedreigd Katherine Rundell beschrijft ze op geestige en scherpzinnige wijze en nodigt de lezer uit om nog beter naar onze fragiele en onwaarschijnlijk mooie planeet te kijken
