Workable Sisterhood Workable Sisterhood:

Workable Sisterhood Michele Tracy Berger, 2010-07-28 *Workable Sisterhood* is an empirical look at sixteen HIV positive women who have a history of drug use conflict with the law or a history of working in the sex trade What makes their experience with the HIV AIDS virus and their political participation different from their counterparts of people with HIV Michele Tracy Berger argues that it is the influence of a phenomenon she labels intersectional stigma a complex process by which women of color already experiencing race class and gender oppression are also labeled judged and given inferior treatment because of their status as drug users sex workers and HIV positive women The work explores the barriers of stigma in relation to political participation and demonstrates how stigma can be effectively challenged and redirected The majority of the women in Berger s book are women of color in particular African Americans and Latinas The study elaborates the process by which these women have become conscious of their social position as HIV positive and politically active as activists advocates or helpers She builds a picture of community based political participation that challenges popular medical and scholarly representations of crack addicted prostitutes and HIV positive women as social problems or victims rather than as agents of social change Berger argues that the women s development of a political identity is directly related to a process called life reconstruction This process includes substance abuse treatment the recognition of gender as a salient factor in their lives and the use of nontraditional political resources *Workable Sisterhood* ,2006 **Workable Sisterhood** ,

Dworkin, 2015-12-04 Presents a unique approach to HIV prevention at the intersection of sociological and public health research Although the first AIDS cases were attributed to men having sex with men over 70% of HIV infections worldwide are now estimated to occur through sex between women and men In Men at Risk Shari L Dworkin argues that the centrality of heterosexual relationship dynamics to the transmission of HIV means that both women and men need to be taken into account in gender specific HIV AIDS prevention interventions She looks at the costs of masculinity that shape men s HIV risks such as their initiation of sex and their increased status from sex with multiple partners Engaging with the common paradigm in HIV research that portrays only women and not heterosexually active men as being vulnerable to HIV Dworkin examines the gaps in public health knowledge that result in substandard treatment for HIV transmission and infection among heterosexual men both domestically and globally She examines a vast array of structural factors that shape men s HIV transmission risks and also focuses on a relatively new category of global health

programs with men known as gender transformative that seeks to move men in the direction of gender equality in the name of improved health Dworkin makes suggestions for the next generation of gender transformative health interventions by calling for masculinities based and structurally driven HIV prevention programming Thoroughly researched and theoretically grounded Men at Risk presents a unique approach to HIV prevention at the intersection of sociological and public health research
