

Workplace First Aid Guidance

Danger

When you approach an incident, confirm it's safe for you to reach.

Be aware of:

- Gas / electricity
- Fighting drivers
- Running machinery
- Traffic

If it is unsafe, deal with the hazards, only moving the casualty if there is no chance of harm to the help of others in the vicinity and from their own actions.

Be aware of the extent and if aware of:

- The nature of the incident
- The number of casualties and how seriously they are injured

1

Summoning Aid

Where possible wait further assistance. Try to get the attention of witnesses who may help. If you cannot do this, do not leave the casualty but make sure help is on the way.

Emergency Assistance:

1. Dial 999
2. Request an ambulance
3. Give a clear, concise, accurate description of the incident and the location

2

Responsiveness

They may be unconscious. You should make a timely assessment of the casualty's condition.

The first step is to confirm the injured person is responsive:

1. Ask them to open their eyes and move their arms and legs if possible.
2. Try to get the casualty to gently shake their shoulders or other possible injuries.

Do not move the casualty unless there is an immediate risk to them or yourself.

3

Airways

Where the casualty is unconscious:

1. Check the mouth for obstructions to breathing and remove them.
2. Tilt the head to open the airway by gently tilting the head back and lifting the chin up.

4

Breathing

Check the casualty is breathing:

1. Look for the rise and fall of the chest or listen close to the mouth to hear the sounds of breathing.

If the casualty is breathing:

1. Do not touch the airway and follow the "Unconscious & Breathing" guidance.

If the casualty is NOT breathing:

- Call the emergency services or have someone nearby do this.
- Follow the "Unconscious & Not Breathing" guidance.

Confirm that a pulse is present by checking the pulse point at the carotid artery, pressing with your first two fingers.
