Design and Plan in the Country House Andor Harvey Gomme, Austin Harvey Gomme, Alison Maguire, Maguire Alison, 2008-01-01 The way a man thinks about his day to day living and the needs of his household reveals a great deal about his ambitions his idea of himself and his role in the community And his house or castle offers many clues to his habits as well as those of the members of his household This intriguing book explores the evolution of country house plans throughout Britain and Ireland from medieval times to the eighteenth century With photographs and detailed architectural plans of each house under discussion the book presents a whole range of new insights into how these homes were designed and what their varied designs tell us about the lives of their residents Starting with fortified medieval tower houses the book traces patterns

that developed and sometimes repeated in country house design over the centuries It discusses who slept in the bedchambers where food was prepared how rooms were arranged for official and private activities what towers signified and more Groundbreaking in its depth the volume offers a rare tour of country houses for scholar and general reader alike

The Poetics of Scientific Investigation in Seventeenth-Century England Claire Preston, 2015-12-17 The writing of science in the period 1580-1700 is artfully diffidently carelessly boldly and above all self-consciously literary The Poetics of Scientific Investigation in Seventeenth-Century English Literature considers the literary textures of science writing its rhetorical figures neologisms its uses of parody romance and various kinds of verse The experimental and social practices of science are examined through literary representations of the laboratory of collaborative retirement of virtual epistolary conversation and of an imagined paradise of investigative fellowship and learning Claire Preston argues that the rhetorical generic and formal qualities of scientific writing are also the intellectual processes of early modern science itself How was science to be written in this period That question which piqued natural philosophers who were searching for apt conventions of scientific language and report was initially resolved by the humanist rhetorical and generic skills in which they were already highly trained At the same time non-scientific writers enthralled by the developments of science were quick to deploy ideas and images from astronomy optics chemistry biology and medical practices Practising scientists and inspired laymen or quasi-scientists produced new adjusted or hybrid literary forms often collapsing the distinction between the factual and the imaginative between the rhetorically ornate and the plain Early modern science and its literary vehicles are frequently indistinguishable scientific practice and scientific expression mutually involved Among the major writers discussed are Montaigne Bacon Donne Browne Lovelace Boyle Sprat Oldenburg Evelyn Cowley and Dryden Comfort in the Eighteenth-Century Country House Jon Stobart, 2021-09-21 Country houses were grand statements of power and status but they were also places where people lived This book traces the changes in layout the new technologies and the innovations in furniture that made them more convenient and comfortable It argues that these material changes were just one aspect of comfort in the country house feeling comfortable was just as important as being comfortable Achieving this involved the comfort and solace to be found in daily routines religious faith and above all relationships with family and friends Such emotional comforts and the attachment to things and places that embodied and memorialized them made country houses into homes *The Philadelphia Country House* Mark E. Reinberger, Elizabeth McLean, 2015-10-21 A highly readable beautifully illustrated study of the homes built by elite colonial Philadelphians as retreats which balanced English models with developing local taste Colonial Americans if they could afford it liked to emulate the fashions of London and the style and manners of English country society while at the same time thinking of themselves as distinctly American The houses they built reflected this ongoing cultural tension By the mid-eighteenth century Americans had developed their own version of the bourgeois English countryseat a class of estate equally distinct in social function and form from townhouses rural plantations

and farms The metropolis of Philadelphia was surrounded by a particularly extraordinary collection of country houses and landscapes Taken together these estates make up one of the most significant groups of homes in colonial America In this masterly volume Mark Reinberger a senior architectural historian and Elizabeth McLean an accomplished scholar of landscape history examine the country houses that the urban gentry built on the outskirts of Philadelphia in response to both local and international economic forces social imperatives and fashion What do these structures and their gardens say about the taste of the people who conceived and executed them How did their evolving forms demonstrate the persistence of European templates while embodying the spirit of American adaptation The Philadelphia Country House explores the myriad ways in which these estates which were located in the country but responded to the ideas and manners of the city straddled the cultural divide between urban and rural Moving from general trends and building principles to architectural interiors and landscape design Reinberger and McLean take readers on an intimate tour of the fine fashionable elements found in upstairs parlors and formal gardens They also reveal the intricate working world of servants cellars and kitchen gardens Highlighting an important aspect of American historic architecture this handsome volume is illustrated with nearly 150 photographs more than 60 line drawings and two color galleries
