The new edition of the Oxford Textbook of Palliative Care for Children brings together the most up to date information, current knowledge, evidence and developments of clinical practice in the field. The book is structured into four sections: Foundations of Care describes core issues, the foundations on which paediatric palliative care is based; Child and Family Care looks at different aspects of psychological, social and cultural care for the sick child or young person and their family. These chapters cover the time course of the illness, around the time of death and support for the bereaved family; Symptom Care focuses on the uses of medication, specific symptoms and their management.
