Sports Crazy Steven J.

Overman,2019-02-11 Sports Crazy How Sports Are Sabotaging American Schools exposes the excesses of middle and high school sports and the detrimental effects our sports obsession has on American education Institutions are increasingly emulating college and professional sports models and losing sight of a host of educational and health goals Steven J Overman describes how this agenda is driven largely by partisan fans and parents of athletes who exert an inordinate influence on school priorities and he explains how and why school administrators shockingly and consistently capitulate to these demands The author underscores the incongruity of public schools involved in an entertainment business and the effects this diversion has on academic integrity learning life experience and overall educational outcomes Overman examines out of control school sports within the context of a school s educational mission and curriculum with telling reference to impacts on physical education He explores as well the outsized place of interscholastic sports beyond the classroom and scrutinizes the distorted relationship between intramural or recreational sports and elitist varsity athletics Overman s chapter on tackle football explains many reasons why this sport should be eliminated from the school extracurriculum and replaced by flag or touch football Overman presents a brief history of interscholastic sports and he compares and contrasts the American experience of school sponsored sport to the European model of community based clubs Which approach better serves students Overman recommends reforms in the context of a radical proposal to phase out interscholastic sports in favor of an intramural or club model This approach would alleviate such problems as elitism and gender bias and reign in hypercompetitiveness while freeing schools to educate students rather than provide public entertainment Marx at the Movies Lars

Kristensen,2014-09-09 Marx and the Moving Image approaches cinema from a Marxist perspective It argues that the supposed end of history marked by the comprehensive triumph of capitalism and the end of cinema calls for revisiting Marx s writings in order to analyse film theories histories and practices **The Youth Sports Crisis** Steven J. Overman,2014-10-14 This provocative critique of the youth sports movement examines the various issues surrounding children in sports and provides a plan for reform based on a change in philosophy and practice Many American children spend more than 20 hours a week in organized sports forgoing free time and unstructured recreational activities for the rigors of training and competition This book offers a comprehensive critique of the youth sports movement pitting the reality of adult run sports programs against the needs and interests of children It examines whether the tradeoff of normal play time for structured sports activities teaches discipline and leads to stronger character development or if the pressures of the game the physical strain of practicing and the general overscheduling of children s lives have eroded the benefits associated with playing sports Educator and former coach Steven J Overman contends that youth based sports programs require a radical change for the well being of the young participants The book explores the various problems in organized sports including stress on the family physical health hazards violence emotional duress elitism and hyper competitiveness Incorporating the perspectives of coaches athletes parents physicians and social scientists the narrative scrutinizes the role of adults as promoters and coaches

and concludes with a discussion of current and needed reforms
