Kālacakra and the Tibetan Calendar Edward Henning, 2007 Kalacakra and the Tibetan Calendar describes the contents of current Tibetan almanacs from basic mathematics to symbolic and historical information Essential for understanding the Kalacakra Tantra's first chapter this book describes the origin of the calendrical systems in this Tantra and translates and elucidates the relevant sections from its famous commentary the Vimalaprabha The main calendars in use in Tibet today have remained unchanged since the 15th century when lamas in several different traditions tried to make sense of the calculation systems they had inherited from India and to adjust them to remove increasingly obvious errors This book analyzes the main systems that survive today assessing their accuracy and comparing them with the methods described in the original Tantra Published by American Institute of Buddhist Studies AIBS

Encyclopaedia of Historical Metrology, Weights, and Measures Jan Gyllenbok, 2018-04-25 This second volume of Gyllenbok's encyclopaedia of historical metrology comprises the first part of the compendium of measurement systems and currencies of all sovereign states of the modern World A I Units of measurement are of vital importance in every civilization through history Since the early ages man has through necessity devised various measures to assist him in everyday life They have enabled and continue to enable us to trade in commonly and equitably understood amounts and to investigate understand and control the chemical physical and biological processes of the natural world The encyclopaedia will be of use not only to historians of science and technology but also to economic and social historians and should be in every major academic and national library as standard reference work on the topic

Frontier Tibet Stéphane Gros, 2025-10-01 Frontier Tibet Patterns of Change in the Sino Tibetan Borderlands addresses a historical sequence that sealed the future of the Sino Tibetan borderlands It considers how starting in the late nineteenth century imperial formations and emerging nation states developed competing

schemes of integration and debated about where the border between China and Tibet should be. It also ponders the ways in which this border is internalised today creating within the People's Republic of China a space that retains some characteristics of a historical frontier. The region of eastern Tibet called Kham the focus of this volume is a productive lens through which processes of place making and frontier dynamics can be analysed. Using historical records and ethnography the authors challenge purely externalist approaches to convey a sense of Kham's own centrality and the agency of the actors involved. They contribute to a history from below that is relevant to the history of China and Tibet and of comparative value for borderland studies.

My Appeal to the World His Holiness The Dalai Lama, 2015-03-10 His Holiness the Fourteenth Dalai Lama is the foremost spokesperson for the people of the Tibetan Plateau although his home is in India in the Himalayan foothills where he has been forced to live in exile since 1959. As a Buddhist monk his main focus has been the spiritual life and the leadership of his people in exile ensuring their survival and preserving their unique Buddhist culture while appealing to the world to stop the destruction of their homeland and the six million Tibetans oppressed within it. Every March 10th from 1961 until 2011 in commemoration of the greatest uprising of the Tibetan people against the Chinese military occupation the Dalai Lama delivered an appeal to the world on behalf of his people. Each statement is a heartfelt call to recognize the truth and the factual reality of Tibet's history and situation a cry for help a plea for justice and a pledge of determination to withstand the worst and to overcome. In these annual addresses he began to articulate and fully express his overarching appeal to humanity. All of the Dalai Lama's March 10th speeches at their most poignant and eloquent are collected here introduced and historically contextualized by Sofia Stril-Rever an author and scholar of Tibetan history and culture and Buddhist spirituality who has long served as his French translator. Here in this book is his appeal to us all. The people of all nations have heard it and have tried to help but their governments still have not dared to stand up effectively for justice on behalf of the Tibetan people and for recognition of the basic human rights to which we all are entitled. The question therefore remains: Who will finally respond to this appeal in time to prevent the ultimate disaster that is looming on the roof of the world?

Histories of Tibet Kurtis R. Schaeffer, William A. McGrath, Jue Liang, 2023-07-25 The thirty-four essays in this volume follow the particular interests of Leonard van der Kuijp whose groundbreaking research in Tibetan intellectual and cultural history imbued his students with an abiding sense of curiosity and discovery. As part of Leonard van der Kuijp's research in Tibetan history he patiently and expertly revealed treasures of the Tibetan intellectual tradition in fourteenth century Tsang, seventeenth century Lhasa or eighteenth century Amdo. The thirty-four essays in this volume follow the particular interests of the honoree and express the comprehensive research that his international cohort has engaged in alongside his generous tutelage over the course of forty years. His inquisitiveness can be experienced through every one of his writings and can be found as well in these new essays in intellectual, cultural and institutional history by Christopher Beckwith, Yael Bentor, the late Hubert Decleer, Franz Karl Ehrhard, Jörg Heimbel and David Jackson.
