Precision Forming Technology of Large Superalloy Castings for Aircraft Engines Baode Sun, Jun Wang, Da Shu, 2021-02-06

This book describes systematically the theory and technology of the precision forming of large complex and thin walled superalloy castings for aircraft engines covering all the important basic aspects of the manufacturing process including process design wax pattern ceramic molds casting and solidification heat treatment repair casting and dimension precision control The correlation of casting defects structural characteristics and performance of castings is revealed through a range of tests It also discusses the latest technologies and advances in this field such as imaging the solidification process by means of synchrotron radiography 3D computerized tomography and reconstruction of microporosity defects analysis and diagnosis of error sources for dimension over tolerance and adjusted pressure casting technology which are of particular interest Providing essential insights the book offers a valuable guide to the design and manufacture of superalloy casting parts for aircraft engines

Dissimilar Metal Welding Pierpaolo Carlone, Antonello Astarita, 2019-12-12 The combination of distinct materials is a key issue in modern industry whereas the driving concept is to design parts with the right material in the right place In this framework a great deal of attention is directed towards dissimilar welding and joining technologies In the automotive sector for instance the concept of tailored blanks introduced in the last decade has further highlighted the necessity to weld dissimilar materials As far as the aeronautic field is concerned most structures are built combining very different materials and alloys in order to match lightweight and structural performance requirements In this framework the application of fusion welding techniques namely tungsten inert gas or laser welding is quite challenging due to the difference in physical properties in particular the melting point between adjoining materials On the other hand solid state welding methods such as the friction stir welding as well as linear friction welding processes have already proved to be capable of manufacturing sound Al Cu Al Ti Al SS and Al Mg joints to cite but a few Recently promising results have also been obtained using hybrid methods Considering the novelty of the topic many relevant issues are still open and many research groups are continuously publishing valuable results The aim of this book is to finalize the latest contributions on this topic [A](#)
