Brain/mind and Parapsychology Parapsychology Foundation,1979 Each year the Parapsychology Foundation hosts an international conference during which a different topic relating to parapsychology is discussed The conference was begun by Eileen J Garret and Frances P Bolton shortly after they founded the Parapsychology Foundation They brought together from all over the world some of the men and women working in isolation in a field regarded by many as too remote for respectable research Eileen Garret inaugurated these conference to encourage those early parapsychologists to advance beyond an easy orthodoxy of thought and technique into the broader aspect of physics chemistry and biology and to relate these fields of research to the human personality and the largely unknown extrasensory capacities it contains

The Rehabilitation of Cognitive Disabilities Charles J. Long,J.M. Williams,2012-12-06 The rehabilitation of intellectual impairment resulting from brain injury has become a major professional activity of clinical neuropsychologists In recent years neuropsychology has developed from a professional role stressing assessment and diagnosis to one that now includes treatment and rehabilitation activities Such trends are also manifested in two new research interests of neuropsychologists the study of the generalizability of neuropsychological test findings to everyday abilities often referred to as the ecological validity of tests and outcome studies of cognitive retraining treatments

Discovering the relationships between traditional neuropsychological tests and everyday behavior is important because the referral questions posed to neuropsychologists have changed Now the neuropsychologist is asked to comment on the patient s functional intellectual abilities as they relate to the everyday demands of home work and educational settings Of course the

development of cognitive retraining theory and procedures allows neuropsychologists to intervene in the treatment of the cognitive problems that the neuropsychological evaluation has documented Since these approaches are still in their formative stages they have been the subject of clinical lore great controversy and little systematic research This situation prompted one of our presenters to lament Either you believe Cognitive Retraining is divinely inspired or the work of the devil There is apparently little middle ground Given this state of affairs the program committee of the Mid South Conference on Human Neuropsychology decided to focus on the role of neuropsychologists in rehabilitation
