The World We Made Alex McKays Story From 2050:

The World We Made: Alex McKay's Story from 2050 Jonathon Porritt, 2013-10-08 Our planet's future is too often described in terms of doom and despair. However, there is another perspective that is not only positive but credible too. *The World We Made* describes a planet that is green, fair, connected, and collaborative. Based on extensive research leading environmentalist Jonathon Porritt reveals how we can achieve a genuinely sustainable world by 2050 if we act immediately. Part history, part narrative, *The World We Made* describes the key events, technological breakthroughs, and lifestyle revolutions that could transform our planet, covering topics as wide ranging as 3D printing, personal genomics, urban agriculture, and the digital landscape. The book's innovative ideas are brought to life with futuristic photographs, infographics, and hand-drawn sketches, while an extensive index provides the tools and tips needed to prepare for what's ahead. *The World We Made* is essential reading for anyone interested in preserving our planet. All royalties will support the work of Forum for the Future, one of the world's leading sustainable development nonprofits.

The Art of Classic Planning Nir Haim Buras, 2020-01-28 An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable, demonstrating how we can restore function and beauty to our urban spaces for the long term. Nearly everything we treasure in the world's most beautiful cities was built over a century ago. Cities like Prague, Paris, and Lisbon draw millions of visitors from around the world because of their exquisite architecture, walkable neighborhoods, and human scale. Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years, not because of traffic, population growth, or other practical hurdles, but because of ill-considered theories emerging from Modernism and reactions to it. The errors of urban design over the last century are too great not to question. The solutions being offered today—sustainability, walkability, smart and green technologies—hint at what has been lost and what may be regained, but they remain piecemeal and superficial. In *The Art of Classic Planning*, architect and planner Nir Haim Buras documents and extends the time-tested and holistic practices that held sway before the reign of Modernism. With hundreds of full-color illustrations and photographs that will captivate architects, planners, administrators, and developers, *The Art of Classic Planning* restores and revitalizes the foundations of urban planning. Inspired by venerable cities like Kyoto, Vienna, and Venice, and by the great successes of L'Enfant's Washington, Haussmann's Paris, and Burnham's Chicago, Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world. *The Art of Classic Planning* celebrates the enduring principles of urban design and invites us to return to building beautiful cities.

Imagining Solar Energy Gregory Lynall, 2020-02-20 Shortlisted for the 2022 ESSE Book Awards. How has humanity sought to harness the power of the Sun, and what roles have literature, art, and other cultural forms played in imagining, mythologizing, and reflecting the possibilities of solar energy? What stories have been told about solar technologies, and how have these narratives shaped developments in science and culture? What can solar power's history tell us about its future within a world
