Comparative Approaches to Chinese Philosophy Bo Mou, 2017-07-05 This anthology explores how Chinese and Western philosophies could jointly and constructively contribute to a common philosophical enterprise Philosophers with in depth knowledge of both traditions present a variety of distinct comparative approaches offering a refined introduction to the further reaches of Chinese philosophy in the comparative context especially regarding its three major constituents Confucianism philosophical Daoism and the Yi Jing philosophy This book examines various issues concerning philosophical methodology ethics metaphysics epistemology philosophy of language and logic and investigates both the living spring source of Chinese philosophy and its contemporary implications and development through contemporary resources The balanced coverage accessible content and breadth of approaches presented in this anthology make it a valuable resource for students of Chinese Philosophy Comparative Philosophy and other related courses **The Art of Chinese Philosophy** Paul Goldin, 2020-04-07 Goldin thus begins the book by asking the basic question What are we reading while also considering why it has been so rarely asked Yet far from denigrating Chinese philosophy he argues that liberating these texts from the mythic idea that they are the product of a single great mind only improves our understanding and appreciation By no means does a text require single and undisputed authorship to be meaningful nor is historicism the only legitimate interpretive stance The first chapter takes up a hallmark of Chinese philosophy that demands a Western reader's cognizance its preference for non deductive argumentation Chinese philosophy is an art hence the title he demonstrates more than it is a rigorous logical method Then comes the core of the book eight chapters devoted to the eight philosophical texts divided into three parts Philosophy of Heaven Philosophy of the Way and Two Titans at the End of an Age The Bloomsbury Research Handbook of Chinese Philosophy Methodologies Sor-hoon Tan, 2016-08-25 The Bloomsbury Research Handbook of Chinese Philosophy Methodologies presents a new understanding of the changing methods used to study Chinese philosophy By identifying the

various different approaches and discussing the role and significance of philosophical methods in the Chinese tradition this collection identifies difficulties and exciting developments for scholars of Asian philosophy Divided into four parts the nature of Chinese philosophical thought is illuminated by discussing historical developments current concerns and methodological challenges Surveying recent methodological trends this research companion explores and evaluates the methodologies that have been applied to Chinese philosophy From these diverse angles an international team of experts reflect on the considerations that enter their methodological choices and indicate new research directions The Bloomsbury Research Handbook of Chinese Philosophy Methodologies is an important contribution to the education of the next generation of Chinese philosophers

The Metaphysics of Chinese Moral Principles Mingjun Lu, 2022-01-17 In The Metaphysics of Chinese Moral Principles author Mingjun Lu seeks to construct and establish the metaphysics of Chinese morals as a formal and independent branch of learning by abstracting and systemizing the universal principles presupposed by the primal virtues and key imperatives in Daoist and Confucian ethics Lu proposes that the metaphysical foundation of Chinese moral principles as reinstated in this book brings to light not only the universality of its core values and ideals but also a pivotal though hitherto neglected key to the enduring vibrancy of a civilization that has lasted several millennia

Beyond the Troubled Water of Shifei Lin Ma, Jaap van Brakel, 2019-05-21 In recent decades a growing concern in studies in Chinese intellectual history is that Chinese classics have been forced into systems of classification prevalent in Western philosophy and thus imperceptibly transformed into examples that echo Western philosophy Lin Ma and Jaap van Brakel offer a methodology to counter this approach and

illustrate their method by carrying out a transcultural inquiry into the complexities involved in understanding shi and fei and their cognate phrases in the Warring States texts the Zhuangzi in particular The authors discuss important features of Zhuangzi's stance with regard to language meaning knowledge doubt questioning equalizing and his well known deconstruction of the discourse in ancient China on shifei Ma and van Brakel suggest that shi and fei apply to both descriptive and prescriptive languages and do not presuppose any fact value dichotomy and thus cannot be translated as either true false or right wrong Instead shi and fei can be grasped in terms of a pre philosophical notion of fitting Ma and van Brakel also highlight Zhuangzi's idea of walking two roads as the most significant component of his stance In addition they argue that all of Zhuangzi's positive recommendations are presented in a language whose meaning is not fixed and that every stance he is committed to remains subject to fundamental questioning as a way of life

Self-Cultivation in Chinese and Greco-Roman Philosophy David Macheek, 2025-05-15 In early China and ancient Greece self cultivation was considered crucial for leading a flourishing fulfilled life In this cross cultural study David Macheek presents and interprets six influential Greek and Chinese self cultivation theories advocated by Mengzi Zhuangzi and Xunzi as well as Plato Aristotle and the Stoics in order to put forward the overarching narrative that self cultivation amounts to strengthening the best part of the human self the heart in the Chinese context and the mind in the Greek context Advancing new readings of classic texts Macheek shows that Greek approaches to self cultivation privilege intellectual pursuits while Chinese approaches give more weight to non intellectual activities such as learning manual crafts and performing rituals He also demonstrates how both ancient traditions understand the self as a heterogeneous community of organic entities each needing different provisions to flourish which aligns the ancient Greek view closer to the early Chinese view As such this book reinforces the underlying structural and conceptual similarities between the two traditions and makes an important contribution to diversifying philosophical conversations

Fundamentals of Comparative and Intercultural Philosophy Lin Ma, Jaap van Brakel, 2016-03-25 Discusses the conditions of possibility for intercultural and comparative philosophy and for crosscultural communication at large This innovative book explores the preconditions necessary for intercultural and comparative philosophy Philosophical practices that involve at least two different traditions with no common heritage and whose languages have very different grammatical structure such as Indo Germanic languages and classical Chinese are a particular focus Lin Ma and Jaap van Brakel look at the necessary and not so necessary conditions of possibility of interpretation comparison and other forms of interaction and how we can speak of similarities and differences in this context The authors posit that it is necessary to dissolve the question of universalism versus relativism by replacing the ideal language paradigm with a paradigm of family resemblances and that it is not necessary to share a common language to engage in comparison Numerous case studies are presented including many comparisons of Western and Chinese concepts
