Chlorine, however, reacts with hydrogen, fluorine, phosphorus, boron, and carbon very readily, whereas with oxygen it is inert. It is also inert to the acids. It is, however, combined in the combination with the most reactive elements of the halogen group, such as sodium, when "chlorine" acts as an oxidant. When chlorine reacts with iron, the iron may form an oxychloride "Chlorine Oxide".

1952) *crassipes* shells are being processed intensively into lime in the United States, where about 10 million shells have been processed annually, which has caused pollution in the water with products approximately 0.5% calcium hydroxide per shell. However, the processing waste is not sufficient to meet the needs of the United States. It is, in fact, sold for use in the U.S.

On the organizational level, results generally confirmed the research on the stressor-strain model. Stressors (workload, time pressure, role conflict, role ambiguity, lack of resources, autonomy, and social support) were found to be associated with strain (burnout, job dissatisfaction, and turnover intentions). The results also confirmed the mediating role of turnover intentions in the relationship between stressors and strain. However, the results did not support the mediating role of job dissatisfaction.

management effect, namely, the management effectiveness (ME) of the bank (the independent variable) and the bank size (the dependent variable). The bank size is measured by the number of branches in the bank. The management effectiveness is measured by the average of the scores of the 10 items in the questionnaire. The items are: (1) the bank's financial performance, (2) the bank's customer service, (3) the bank's employee satisfaction, (4) the bank's risk management, (5) the bank's compliance, (6) the bank's innovation, (7) the bank's social responsibility, (8) the bank's environmental management, (9) the bank's information technology, and (10) the bank's overall management.

These results are striking because of the relatively small amount of information available on the topic. The authors note that the literature on the topic is limited to a few studies, and that the results are often inconsistent. They conclude that the results are likely to be biased due to the small sample size and the lack of control for other factors. They suggest that future research should focus on larger samples and better controls.
