 and viruses in the wake of the recent outbreak of the Sasser worm, the FBI is warning citizens to be vigilant against phishing attacks. Phishing is a type of fraud in which criminals attempt to steal sensitive information from victims by impersonating a trustworthy entity, such as a bank or government agency, and using email, instant messaging, or other online communication methods to trick them into providing their personal information. Thursday May 26 1955:

Eyeing the Red Storm Robert M. Dienesch, 2016-04 In 1954 the U S Air Force launched an ambitious program known as WS 117L to develop the world's first reconnaissance satellite. The goal was to take photographic images from space and relay them back to Earth via radio. Because of technical issues and bureaucratic resistance, however, WS 117L was seriously behind schedule by the time Sputnik orbited Earth in 1957 and was eventually cancelled. The air force began concentrating instead on new programs that eventually launched the first successful U S spy satellites. *Eyeing the Red Storm* examines the birth of space-based reconnaissance not from the perspective of CORONA, the first photo reconnaissance satellite to fly, but rather from that of the WS 117L. Robert M. Dienesch's revised assessment places WS 117L within the larger context of Dwight D. Eisenhower's presidency, focusing on the dynamic between military and civilian leadership. Dienesch demonstrates how WS 117L promised Eisenhower not merely military intelligence but also the capacity to manage national security against the Soviet threat. As a fiscal conservative, Eisenhower believed a strong economy was the key to surviving the Cold War and saw satellite reconnaissance as a means to understand the Soviet military challenge more clearly and thus keep American defense spending under control. Although WS 117L never flew, it provided the foundation for all subsequent satellites, breaking theoretical barriers and helping to overcome major technical hurdles which ensured the success of America's first working reconnaissance satellites and their photographic missions during the Cold War. *Congressional Record* United States. Shades of Gray L. Parker Temple, 2005 In this work Temple tracks the evolution of space reconnaissance systems from their seeds in the painful lessons of Pearl Harbor through the challenges of today. *The Benign Aristocrats* David Potter, 2022-10-31 The years 1951 to 1964 were years of undeniable prosperity and progress. They were the years in which Conservative Governments decided not to dismantle Labour's National Health Service and Welfare State and for this they must be given a certain amount of credit. The four prime ministers concerned were all from an aristocratic background but they had learned very quickly that times had changed and that they had to change with them. The result was that these years and the periods of Labour rule before and after saw possibly the best governance that Britain has ever experienced. This book, written from an uncompromising Socialist and working class background, gives a great deal of credit to the benign aristocrats but does not minimise their failures, in particular the Suez affair of 1956.
