The Company Town John Garner, 1992-10-01 Built by industrialists whose early businesses contributed to the escalation
of the Industrial Revolution company towns flourished in countries that embraced capitalism and open market trading In

many instances the company town came to symbolize the wrecking of the environment especially in places associated with extractive industries such as mining and lumber milling Some resident industrialists however took a genuine interest in the welfare of their work forces and in a number of instances hired architects to provide a model environment Overtaken by time these towns were either abandoned or caught up in suburban growth The most thorough going and only international assessment of the company town this collection of essays by specialists and authorities of each region offers a balanced account of architectural and social history and provides a better understanding of the architectural and urban experiences of the early industrial age **West Coast logging, 1840-1910** Mary Shakespeare,Rodney H. Pain,1977-01-01 Utilizing anecdotal technical and documentary data as well as historical photographs and photographs of logging and associated artifacts curated by the Museum the author of this text offers insights into West Coast logging from the contact period to the demise of the use of steam power in the logging industry Published in English Ghost industries Irene Curulli,2018-08-03 What is the role of water in the conversion of former industrial areas How is water used in engaging the public to experience these sites both as physical and cultural places Can ecological design foster the coexistence of industry and environment The book addresses these core questions by examining the impact of the former Oregonian industry 1830 1940 on the Willamette River landscape and discussing how projects of transformation interpret the triangular interplay among industry landscape and water This book is a source of suggestions and ideas for scholars students and professionals in architecture landscape architecture planning and their related fields who want to manage the urban landscapes successfully **Shades of Green** Ruth Tittensor,2016-10-31 This book takes a fresh look at the most disliked tree in Britain and Ireland explaining the reasons it was introduced and why it became ubiquitous in the archipelagos of northwest Europe Sitka spruce has contributed to the Pacific Coast landscapes of North America for over ten millennia For the Tlingit First Nation it is the most important tree in terms of spiritual relationships art and products in daily use such as canoes containers fish traps and sweet cakes Since the late nineteenth century it has also been the most important tree to the timber industry of west coast North America The historical background to the modern use of Sitka spruce is explored The lack of cultural reference may explain negative public response when treeless uplands in the UK and Ireland were afforested with introduced conifer species particularly Sitka spruce following two World Wars The multipurpose forestry of today recognizes that Sitka spruce is the most important tree to the timber industry and to a public which uses its many products but fails to recognize the link between growing trees and bought goods The apparently featureless and wildlife less Sitka spruce plantations in UK uplands are gradually developing recognizable ecological features Sitka spruce has the potential to form temperate rain forests this century as well as to produce much needed goods for society The major contribution of Sitka spruce to landscapes and livelihoods in western North America is by contrast widely accepted But conserving natural old growth forests sustaining the needs of First Nations and producing materials for the modern timber industry will be an intricate task American Cycle Larry

The logging industry in the Central Sierra was essential to the expanding economies of both California and Nevada for well over 150 years During the Gold Rush harvested timber in the foothill region of the Sierra was used for mining activities in the construction of early day communities and as fuel Extensive logging of forestland in the higher elevations came with the advent of hard rock mining which required incredible quantities of timber During the 1860s the Comstock Lode of Nevada put a tremendous demand for lumber on the east slope of the Sierra By the time the Comstock had concluded much of the eastern face was denuded with over one quarter of the prehistoric forest gone Advances in technology further fueled the logging industry during the first half of 20th century The Sierra s logging days are waning now but as this volume shows it once played a vital role in the mountains economy lifestyle and identity
