Free Culture Lawrence Lessig, 2004 From the most important thinker on intellectual property in the Internet era The New Yorker a landmark manifesto about the genuine closing of the American mind Lawrence Lessig could be called a cultural environmentalist One of America's most original and influential public intellectuals his focus is the social dimension of creativity how creative work builds on the past and how society encourages or inhibits that building with laws and technologies In his two previous books Code and The Future of Ideas Lessig concentrated on the destruction of much of the original promise of the Internet Now in Free Culture he widens his focus to consider the diminishment of the larger public

domain of ideas In this powerful wake up call he shows how short sighted interests blind to the long term damage they re inflicting are poisoning the ecosystem that fosters innovation All creative works books movies records software and so on are a compromise between what can be imagined and what is possible technologically and legally For more than two hundred years laws in America have sought a balance between rewarding creativity and allowing the borrowing from which new creativity springs The original term of copyright set by the Constitution in 1787 was seventeen years Now it is closer to two hundred Thomas Jefferson considered protecting the public against overly long monopolies on creative works an essential government role What did he know that we ve forgotten Lawrence Lessig shows us that while new technologies always lead to new laws never before have the big cultural monopolists used the fear created by new technologies specifically the Internet to shrink the public domain of ideas even as the same corporations use the same technologies to control more and more what we can and can t do with culture As more and more culture becomes digitized more and more becomes controllable even as laws are being toughened at the behest of the big media groups What s at stake is our freedom freedom to create freedom to build and ultimately freedom to imagine
