**Timor-Leste** Abraham Joseph, Takako Hamaguchi, 2014-06-25 Timor Leste The History and Development of Asia s Newest Nation is a study of how a small Asia Pacific nation has emerged from protracted conflict and successfully navigated a path to durable peace and sustainable development Despite early setbacks Timor Leste has made an amazing turnaround and today finds itself in a new era in which it will certainly continue its advance toward the goal of long term stability and prosperity leaving permanently behind the past that was once marked by a descending spiral of destruction Yet a number of development challenges lie ahead for Timor Leste particularly in strengthening human institutional and infrastructural capacities in the short to medium term and in transforming the national economy from oil based to more diversified and better balanced in the longer run Other countries may draw valuable lessons from Timor Leste s experience especially those that are emerging from as well as are currently affected by conflict and instability Such lessons would center on the questions such as management of natural resources empowerment of the vulnerable implementation of transparent and accountable governance advancement of women and mobilization of civil society and the public in general for democratization and the national development process *National Power and International Geostructure* Daniel Morales Ruvalcaba, Alberto Rocha Valencia, 2024-04-18 This book addresses three innovative aspects for the study of International Relations first proposes a novel theoretical methodological framework for the study of national power and based on this a quantitative analysis technique is formulated that allows us to study the evolution of state power over almost five decades Second states play a fundamental role in the international system which is why the study of their roles in the world cannot be limited to old insufficient and contradictory categorizations Having new categories of states becomes an even more urgent task in the rapidly changing international order than it is today This book proposes nine categories of powers and states that cover all the countries that currently exist Third the international geostructure of world power is proposed which represents a new theoretical notion that helps to explain how the international insertion of states and their possibilities of action are conditioned by the unequal distribution of national power and by their structural positioning in the international system This book is for all students of International Relations academics and people who want to understand national power as a fundamental factor in relations between countries *Indigenous Spirits and Global Aspirations in a Southeast Asian Borderland* Michael Rose, 2025-10-01 Over the past 40 years life in Timor Leste has changed radically Before 1975 most of the population lived in highland villages spoke local languages and rarely used money Today many have moved to peri urban lowland settlements and even those whose lives remain dominated by customary ways understand that those of their children will not For the Atoni Pah Meto of Timor Leste s remote Oecussi Enclave the world was neatly divided into two distinct categories the meto indigenous and the kase foreign Now matters are less clear the good things of the globalised world are pursued not through rejecting the meto ways of the village or collapsing them into the kase but through continual crossing

between them In this way the people of Oecussi are able to identify in the struggles of lowland life the comforting and often decisive presence of familiar highland spirits *Historical Dictionary of the United Nations* Jacques Fomerand,2017-12-29

At a time of profound transformations in international relations the second edition of *Historical Dictionary of the United Nations* maps out the continuing and deepening role and relevance of the United Nations in the maintenance of peace and the promotion of development and human rights Focusing on the past two decades developments this book contributes to a reasoned and fuller understanding of an organization which remains the cornerstone of a changing world fraught with challenges which simply cannot be addressed either unilaterally or bilaterally This second edition of *Historical Dictionary of the United Nations* contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 1 000 cross referenced entries on its basic organizations subsidiary bodies related specialized and other agencies and nongovernmental actors as well as outstanding figures in its history This book is an excellent resource for students researchers and anyone wanting to know more about the United Nations *Asian Communication Handbook 2008* Indrajit Banerjee,Stephen Logan,2008

*Sustainable Minerals Operations in the Developing World* Geological Society of London,2005 The sustainable development of minerals which are non renewable resources is a major challenge in today s world In this regard the true definition of sustainability is a debating point in itself can such a concept exist with respect to non renewable resources Perhaps the ideal sustainability model is one that minimizes negative environmental impact and maximizes benefits to society the economy and regional national development Developed and near developed economies rely for commodity supplies on developing countries where major mining operations are often a mainstay of the domestic economy Limited environmental regulation and low wages lead to charges of exploitation Also large numbers of people have no alternative to living by informal often dangerous artisanal mining This Special Publication gives examples from developing countries from all scales of mineral extraction The volume reviews environmental economic health and social problems and highlights the need to solve these before sustainability can be achieved The better solutions require mutual understanding through full involvement of all stakeholders education training and investment so that small scale and artisanal mines can grow into well managed operations At larger scales most major international mining companies have now improved their practices and are monitoring their progress although there is no room for complacency in this rapidly changing area The New United Nations John Allphin Moore, Jr.,Jerry Pubantz,2015-09-21 A comprehensive guide to the world body s institutions procedures policies specialized agencies historic personalities initiatives and involvement in world affairs The New United Nations is organized thematically blending both topical and chronological explanations making reference to current scholarly terms and theories The first textbook of its kind on the market it presents the UN in its evolving role in this new era since the Cold War and shows its responsibilities for meeting challenges to the global community **International Peacebuilding and Local Involvement** Dahlia Simangan,2019-05-01 This book interrogates the common perception that liberal peace is in

crisis and explores the question can the local turn save liberal peacebuilding Presenting a case for a liberal renaissance in peacebuilding the work interrogates the assumptions behind the popular perception that liberal peace is in crisis It re examines three of the cases igniting the debate Cambodia Kosovo and Timor Leste and evaluates how these transitional administrations implemented their liberal mandates and how local involvement affected the conduct of their activities In so doing it reveals that these cases were neither liberal nor peacebuilding It also demonstrates that while local involvement is imperative to peacebuilding illiberal local involvement restores an elite centred status quo and reinforces or creates new forms of conflict and violence Using both liberal and critical lenses the author ultimately argues that the conceptual and operational departure from the holistic and comprehensive origins of liberal peacebuilding in fact paved the way for the liberal peace crisis itself Drawing on analysis from in depth field research and interviews this book will be of much interest to students of peacebuilding peacekeeping statebuilding security studies and International Relations in general
