War And State Formation In Ancient China And Early Modern Europe:

War and State Formation in Ancient China and Early Modern Europe Victoria Tin-bor Hui, 2005-07-04 The Eurocentric conventional wisdom holds that the West is unique in having a multi state system in international relations and liberal democracy in state society relations At the same time the Sinocentric perspective believes that China is destined to have authoritarian rule under a unified empire In fact China in the Spring and Autumn and Warring States periods 656 221 BC was once a system of sovereign territorial states similar to Europe in the early modern period Both cases witnessed the prevalence of war formation of alliances development of the centralized bureaucracy emergence of citizenship rights and expansion of international trade This book first published in 2005 examines why China and Europe shared similar processes but experienced opposite outcomes This historical comparison of China and Europe challenges the presumption that Europe was destined to enjoy checks and balances while China was preordained to suffer under a coercive universal status **War and State Formation in Ancient China and Early Modern Europe** Victoria Tin-bor Hui, 2005-07-04 There is a common belief that the system of sovereign territorial states and the roots of liberal democracy are unique to European civilization and alien to non Western cultures The view has generated popular cynicism about democracy promotion in general and China s prospect for democratization in particular This book demonstrates that China in the Spring and Autumn and Warring States periods 656 221 BC consisted of a system of sovereign territorial states similar to Europe in the early modern period It examines why China and Europe shared similar processes but experienced opposite outcomes **War and State Formation in Ancient China and Early Modern Europe** Victoria Tin-bor Hui, 2014-05-14 This book first published in 2005 explores why China and Europe s development of state systems began similarly but experienced opposite outcomes War, Revenue, and State Building Sheldon Pollack, 2011-03-15 In a relatively short time the American state developed from a weak highly decentralized confederation composed of thirteen former English colonies into the foremost global superpower This remarkable institutional transformation would not have been possible without the revenue raised by a particularly efficient system of public finance first crafted during the Civil War and then resurrected and perfected in the early twentieth century That revenue financed America s participation in two global wars as well as the building of a modern system of social welfare programs Sheldon D Pollack shows how war revenue and institutional development are inextricably linked no less in the United States than in Europe and in the developing states of the Third World He delineates the mechanisms of political development and reveals to us the ways in which the United States too once was and still may be a developing nation Without revenue states cannot maintain political institutions undergo development or exert sovereignty over their territory Rulers and their functionaries wield the coercive powers of the state to extract that revenue from the population under their control From this perspective the state is seen as a highly efficient machine for extracting societal revenue that is used by the state to sustain itself War Revenue and State Building traces the sources of public revenue available to the American state at

specific junctures of its history in particular during times of war the revenue strategies pursued by its political leaders in response to these factors and the consequential impact of those strategies on the development of the American state

State Formation through Emulation Chin-Hao Huang, David C. Kang, 2022-08-04 Argues that states formed in East Asia a thousand years earlier than in Europe emulating China rather than competing with it *War, Religion and Empire* Andrew Phillips, 2010-12-23 What are international orders how are they destroyed and how can they be defended in the face of violent challenges Advancing an innovative realist constructivist account of international order Andrew Phillips addresses each of these questions in *War Religion and Empire* Phillips argues that international orders rely equally on shared visions of the good and accepted practices of organized violence to cultivate cooperation and manage conflict between political communities Considering medieval Christendom's collapse and the East Asian Sinosphere's destruction as primary cases he further argues that international orders are destroyed as a result of legitimation crises punctuated by the disintegration of prevailing social imaginaries the break up of empires and the rise of disruptive military innovations He concludes by considering contemporary threats to world order and the responses that must be taken in the coming decades if a broadly liberal international order is to survive **Hinduism and the Ethics of Warfare in South Asia** Kaushik Roy, 2012-10-15

This book traces the evolution of theories of warfare in India from the dawn of civilization focusing on the debate between Dharmayuddha Just War and Kutayuddha Unjust War within Hindu philosophy This debate centers around four questions What is war What justifies it How should it be waged And what are its potential repercussions Political Communication in Chinese and European History, 800-1600 Hilde Weerd, Franz-Julius Morche, 2025-10-01 Based on a collaboration between historians of Chinese and European politics *Political Communication in Chinese and European History 800 1600* offers a first comprehensive overview of current research on political communication in middle period European and Chinese history The chapters present new work on the sources and processes of political communication in European and Chinese history partly through juxtaposing and combining formerly separate historiographies and partly through direct comparison Contrary to earlier comparative work on empires and state formation which aimed to explain similarities and differences with encompassing models and new theories of divergence the goal is to further conversations between historians by engaging regional historiographies from the bottom up *Dao Companion to China's fa Tradition* Yuri Pines, 2024-08-14 This volume offers the most comprehensive introduction to the ideas of ancient Chinese thinkers who looked to perfect a political system thru the emphasis on impersonal standards laws and norms fa This book covers the works of these thinkers misleadingly dubbed Legalists as well as the controversies they aroused the legacy they left behind and their potential relevance The fa thinkers contributed decisively to the formation of China's first unified empire in 221 BCE but this contribution was not widely acknowledged Their derision of the moralizing discourse of their rivals dismissal of independent intellectuals as self-serving hypocrites and advocacy of a powerful centralized state did not endear them to most Chinese literati To a certain

extent these reservations remain visible in modern research which explains why a comprehensive study of the fa traditions is still lacking This volume fills that gap The first of four parts introduces major texts and thinkers of the fa tradition from the Warring States 453 221 BCE to the Former Han 206 202 BCE 9 CE periods The second part analyzes the major ideas of the fa texts including concepts of fa and their implementation in political and legal spheres views of human nature state society relations rulership morality in politics the evolutionary view of history and philosophy of language The third part focuses on the changing attitudes toward fa ideas in imperial and modern China The fourth part explores the ideas of fa advocates from a comparative perspective both against intellectual currents in early China and Western traditions such as Machiavellianism and totalitarianism This book serves as a reference for students and researchers in ancient Chinese history and thought and comparatists in the field of political philosophy

Why Did Europe Conquer the World? Philip T. Hoffman, 2017-01-24

The startling economic and political answers behind Europe's historical dominance Between 1492 and 1914 Europeans conquered 84 percent of the globe But why did Europe establish global dominance when for centuries the Chinese Japanese Ottomans and South Asians were far more advanced In *Why Did Europe Conquer the World* Philip Hoffman demonstrates that conventional explanations such as geography epidemic disease and the Industrial Revolution fail to provide answers Arguing instead for the pivotal role of economic and political history Hoffman shows that if certain variables had been different Europe would have been eclipsed and another power could have become master of the world Hoffman sheds light on the two millennia of economic political and historical changes that set European states on a distinctive path of development military rivalry and war This resulted in astonishingly rapid growth in Europe's military sector and produced an insurmountable lead in gunpowder technology The consequences determined which states established colonial empires or ran the slave trade and even which economies were the first to industrialize Debunking traditional arguments *Why Did Europe Conquer the World* reveals the startling reasons behind Europe's historic global supremacy

How to Make Love to a Despot Stephen D. Krasner, 2020-04-07 After generations of foreign policy failures the United States can finally try to make the world safer not by relying on utopian goals but by working pragmatically with nondemocracies Since the end of the Second World War the United States has sunk hundreds of billions of dollars into foreign economies in the hope that its investments would help remake the world in its own image or at the very least make the world safe for democracy So far the returns have been disappointing to say the least Pushing for fair and free elections in undemocratic countries has added to the casualty count rather than taken away from it and trying to eliminate corruption entirely has precluded the elimination of some of the worst forms of corruption In the Middle East for example post 9/11 interventionist campaigns in Afghanistan and Iraq have proved to be long costly and worst of all ineffective Witnessing the failure of the utopian vision of a world full of market oriented democracies many observers both on the right and the left have begun to embrace a dystopian vision in which the United States can do nothing and save no one Accordingly calls to halt all assistance in undemocratic countries

have grown louder But as Stephen D Krasner explains this cannot be an option weak and poorly governed states pose a threat to our stability In the era of nuclear weapons and biological warfare ignoring troubled countries puts millions of American lives at risk The greatest challenge for the United States now Krasner writes is to identify a set of policies that lie between the utopian vision that all countries can be like the United States and the dystopian view that nothing can be done He prescribes a pragmatic new course of policy Drawing on decades of research he makes the case for good enough governance governance that aims for better security better health limited economic growth and some protection of human rights To this end Krasner proposes working with despots to promote growth In a world where a single terrorist can kill thousands or even hundreds of thousands of people the United States does not have the luxury of idealistically ignoring the rest of the world But it cannot remake the world in its own image either Instead it must learn how to make love to despots

On Wars Michael Mann, 2023-08-08 A history of wars through the ages and across the world and the irrational calculations that so often lie behind them Benjamin Franklin once said There never was a good war or a bad peace But what determines whether war or peace is chosen Award winning sociologist Michael Mann concludes that it is a handful of political leaders people with emotions and ideologies and constrained by inherited culture and institutions who undertake such decisions usually irrationally choosing war and seldom achieving their desired results Mann examines the history of war through the ages and across the globe from ancient Rome

to Ukraine from imperial China to the Middle East from Japan and Europe to Latin and North America He explores the reasons groups go to war the different forms of wars how warfare has changed and how it has stayed the same and the surprising ways in which seemingly powerful countries lose wars In masterfully combining ideological economic political and military analysis Mann offers new insight into the many consequences of choosing war

State, Economy and the Great Divergence Peer Vries, 2015-02-26 State Economy and the Great Divergence provides a new analysis of what has become the central debate in global economic history the great divergence between European and Asian growth Focusing on early modern China and Western Europe in particular Great Britain this book offers a new level of detail on comparative state formation that has wide reaching implications for European Eurasian and global history Beginning with an overview of the historiography Peer Vries goes on to extend and develop the debate critically engaging with the huge volume of literature published on the topic to date Incorporating recent insights he offers a compelling alternative to the claims to East West equivalence or Asian superiority which have come to dominate discourse surrounding this issue This is a vital update to a key issue in global economic history and as such is essential reading for students and scholars interested in keeping up to speed with the on going debates

Debate surrounding China's rise and the prospects of its possible challenge to America's preeminence has focused on two questions whether the United States should contain or engage China and whether the rise of Chinese power has inclined other East Asian states to balance against Beijing by alignment with the United States or ramping up their military expenditures By drawing on alternative theoretic approaches most especially balance of threat theory political economic theory and theories of regime survival and economic interdependence Steve Chan is able to create an explanation of regional developments that differs widely from the traditional strategic vision of national interest He concludes that China's primary aim is not to match U S military might or the foreign policy influence that flows from that power and that its neighbors are not balancing against its rising power because in today's guns versus butter fiscal reality balancing policies would entail forfeiting possible gains that can accrue from cooperation economic growth and the application of GDP to nonmilitary ends Instead most East Asian countries have collectively pivoted to a strategy of elite legitimacy and regime survival based on economic performance **The Warrior State** T. V. Paul,2015 As the U S forces withdraw from Afghanistan a Taliban victory in that besieged long suffering country and the further Talibalization of Pakistan itself have become a real possibility This book explores why Pakistan has become such a heavily militarized ideologically driven state yet remains deeply insecure weak and unable to unite itself or pacify its warring ethnic and religious groups
