Analysis and Application , *Computer Analysis of Images and Patterns* Wladyslaw Skarbek, 2003-06-30 Computer analysis of images and patterns is a scientific field of longstanding tradition with roots in the early years of the computer era when electronic brains inspired scientists Moreover the design of vision machines is a part of humanity s dream of the artificial person I remember the 2nd CAIP held in Wismar in 1987 Lectures were read in German English and Russian and proceedings were also only partially written in English The conference took place under a different

political system and proved that ideas are independent of political walls A few years later the Berlin Wall collapsed and Professors Sommer and Klette proposed a new formula for the CAIP let it be held in Central and Eastern Europe every second year There was a sense of solidarity with scientific communities in those countries that found themselves in a state of transition to a new economy A well implemented idea resulted in a chain of successful events in Dresden 1991 Budapest 1993 Prague 1995 Kiel 1997 and Ljubljana 1999 This year the conference was welcomed at Warsaw There are three invited lectures and about 90 contributions written by more than 200 authors from 27 countries Besides Poland 60 authors the largest representation comes from France 23 followed by England 16 Czech Republic 11 Spain 10 Germany 9 and Belarus 9 Regrettably in spite of free registration fees and free accommodation for authors from former Soviet Union countries we received only one accepted paper from Russia
