The Case Against Homework Sara Bennett, Nancy Kalish, 2007-08-28 Does assigning fifty math problems accomplish any more than assigning five Is memorizing word lists the best way to increase vocabulary especially when it takes away from reading time And what is the real purpose behind those devilish dioramas The time our children spend doing homework has skyrocketed in recent years Parents spend countless hours cajoling their kids to complete such assignments often without considering whether or not they serve any worthwhile purpose Even many teachers are in the dark Only one of the hundreds the authors interviewed and surveyed had ever taken a course specifically on homework during training The truth according to Sara Bennett and Nancy Kalish is that there is almost no evidence that homework helps elementary school students achieve academic success and little evidence that it helps older students Yet the nightly burden is taking a serious toll on America's families It robs children of the sleep play and exercise time they need for proper physical emotional and neurological development And it is a hidden cause of the childhood obesity epidemic creating a nation of homework potatoes In The Case Against Homework Bennett and Kalish draw on academic research interviews with educators parents and kids and their own experience as parents and successful homework reformers to offer detailed advice to frustrated parents You'll find out which assignments advance learning and which are time wasters how to set priorities when your child comes home with an overstuffed backpack how to talk and write to teachers and school administrators in persuasive nonconfrontational ways and how to rally other parents to help restore balance in your children's lives Empowering practical and rigorously researched The Case Against Homework shows how too much work is having a negative effect on our children's achievement and development and gives us the tools and tactics we need to advocate for change Also available as an eBook **Que's**
