Communicating with Kids Stephanie Davies-Arai,2015-01-28 Confused by all the conflicting parenting advice you hear

Not sure who is right or what to do Well relax and read this book Ever wondered why your child gets more upset the nicer you are Or why your child is always arguing with you doesn't listen or seems intent on doing the opposite of what you want Now you no longer have to worry Communicating with Kids has the answers This new book explains how so often children are not resisting our messages but the way we are sending them It demonstrates why some of the ways we communicate lead to exactly the opposite of the behaviour we want and provides methods to tweak your language and approach so that children are willing to help you So much of the parenting advice we hear works against a child's developing brain so this book shows you how to work with it instead which makes all the difference Once you understand the difference between what you are saying and what your child actually hears life with children becomes so much easier This book is all about communication because apart from that there's no other advice you need the best way to bring up your child is to be yourself and do it your way Communicating with Kids is a book guaranteed to help all parents whether they veer towards the methods of Penelope Leach or Supernanny or have never read a parenting book before It is not based on any parenting ideology but on genuine experience with a wide range of children It is a plain talking book that presents communication methods that work so parents gain the confidence to be themselves Rachel the 'write' to speak Sandra Capelin, 2019-07-26 This book tells how Rachel was born with a Language Disorder that went undiagnosed until she was 16 years old but despite struggling through her education with little or no help from professionals she managed to succeed against all odds It is essential reading for any care giver or anyone working with children and young people either voluntary or professionally especially health care and educational professionals whether in training or already qualified in order to understand the difficulties these children face on a daily basis *Teaching for Peace and Social Justice in Myanmar* Mary Shepard Wong, 2022-06-02 Bringing together scholars and educators based in Myanmar the USA the UK Denmark and Thailand this book presents new perspectives and research on the struggle for social justice and peace in Myanmar at this critical juncture It shows how actors from diverse backgrounds and regions of Myanmar are drawing from their identities evoking their agency and using critical pedagogy to advance social justice and peace The chapters provide the compelling life stories of the authors specific examples of what they are doing and insights of how their work might be applied to other contexts The topics discussed include addressing structural violence peace curriculum development identity based conflict teaching the history of the country promoting inclusion civic education critical pedagogy teacher agency and agendas of research funding for peacebuilding The foreword and afterword written by well known scholars of Myanmar address the relevance and importance of the book vis a vis the current social and political crisis following the February 2021 military coup We, the Children Victoria McGuinness, 2015-12-21 Welcome to the world of little ones and their secret poetic language When a five year old adopted from China can express her lack of personal value non verbally in play and name the feeling the pile of none it may be time for adults to tune into childrens play and non verbal communication on a deeper level The metaphorical language of very

young children accurately reflects the story of their experiences and relationships but it is too often dismissed by adults as merely child's play. Parenting plans, weighty court decisions, and child investigations that disregard the non-verbal testimony of children can contribute to bending a child's development in the wrong direction, damaging his or her life-long journey. Because of this miscommunication, children are often forced to spend time with the very people who hurt them and endure years of feeling invalidated, invisible, and powerless. It is common knowledge that childhood stories shape adult lives. In transforming old, worn-out stories about one's identity, the individual may discover how much happiness may be embraced by re-claiming one's true identity. *We the Children* invites the reader to begin the process of becoming empowered by first transforming any story in which he or she is a victim into one in which the reader might emerge feeling fully empowered. Personal empowerment opens the imagination by converting negative messages about oneself learned in childhood into affirmations as to what is good about us now. Ask yourself: what degree of freedom could be obtained?

The second edition of *The Science of Reading* is extensively revised to reflect contemporary theoretical insights and methodological advances. Two entirely new chapters on co-occurrence and complexity are accompanied by reviews of recent findings and discussion of future trends and research directions. Updated chapters cover the development of reading and language in preschools, the social correlates of reading, experimental research on sentence processing, learning to read in alphabetic orthographies, comorbidities that occur frequently with dyslexia, and other central topics. Demonstrates how different knowledge sources underpin reading processes using a wide range of methodologies. Presents critical appraisals of theoretical and computational models of word recognition and evidence-based research on reading intervention. Reviews evidence on skilled visual word recognition, the role of phonology, methods for identifying dyslexia, and the molecular genetics of reading and language. Highlights the importance of language as a foundation for literacy and as a risk factor for developmental dyslexia and other reading disorders. Discusses learning to read in different types of writing systems with a language impairment and in variations of the home literacy environment. Describes the role of contemporary analytical tools such as dominance analysis and quantile regression in modelling the development of reading and comprehension. Sternberg,2012-12-06 We were motivated to edit this book when we began to hear stories of exceptional students who were struggling with reading writing or math but who could solve seemingly any problem with computers or build the most intricate structures with Legos or could draw beautiful pictures or could tell the most creative stories but ended up in tears when asked to write it out How is it possible to have so much talent in some areas and yet to appear to have a disability in another What resources are available for these students How can we ensure that these students abilities are nurtured and developed Our goal in this book is to provide ideas and possibly even tentative answers for educators and to stimulate more questions to be answered by researchers We have

ourselves been addressing related questions for some time Our group at the PACE Center at Yale has explored the development of abilities, competencies and expertise that allow people to be successful in life Through this work we have collaborated with school districts and other educators and researchers across the country to expand the notion of what is traditionally thought of as intelligence We use the concept of successful intelligence to allow for the possibility that the skills traditionally taught in school are not the only ones and often not even the most important ones that allow people to be successful in the world
