Lukas Peter

Wealth Of The Commons A World Beyond Market And State:

The Wealth of the Commons David Bollier, Silke Helfrich, 2014-05-23 We are poised between an old world that no longer works and a new one struggling to be born Surrounded by centralized hierarchies on the one hand and predatory markets on the other people around the world are searching for alternatives The Wealth of the Commons explains how millions of commoners have organized to defend their forests and fisheries reinvent local food systems organize productive online communities reclaim public spaces improve environmental stewardship and re imagine the very meaning of progress and governance In short how they've built their commons In 73 timely essays by a remarkable international roster of activists academics and project leaders this book chronicles ongoing struggles against the private commoditization of shared resources often known as market enclosures while documenting the immense generative power of the commons The Wealth of the Commons is about history political change public policy and cultural transformation on a global scale but most of all it's about individual commoners taking charge of their lives and their endangered resources This fine collection makes clear that the idea of the Commons is fully international and increasingly fully worked out If you find yourself wondering what Occupy wants or if some other world is possible this pragmatic down to earth and unsentimental book will provide many of the answers Bill McKibben author of *Deep Economy* *The Wealth of Communities* and *The Durable Future* **Routledge**

Handbook of Food as a Commons Jose Luis Vivero-Pol, Tomaso Ferrando, Olivier De Schutter, Ugo Mattei, 2018-12-17 This Handbook provides the first comprehensive review and synthesis of knowledge and new thinking on how food and food systems can be thought interpreted and practiced around the old new paradigms of commons and commoning The overall aim is to investigate the multiple constraints that occur within and sustain the dominant food and nutrition regime and to explore how it can change when different elements of the current food systems are explored and re imagined from a commons perspective The book sparks the debate on food as a commons between and within disciplines with particular attention to spaces of resistance food sovereignty de growth open knowledge transition town occupations bottom up social innovations and organizational scales local food national policies South South collaborations international governance and multi national agreements Overall it shows the consequences of a shift to the alternative paradigm of food as a commons in terms of food the planet and living beings Chapters 1 and 24 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Commons and a New Global Governance Samuel Cogolati, Jan Wouters, 2018-12-28 Given the new found importance of the commons in current political discourse it has become increasingly necessary to explore the democratic institutional and legal implications of the commons for global governance today This book analyses and explores the groundbreaking model of the commons and its relation to these debates *Commons, Sustainability, Democratization* Hans Peter Hansen, Birger Steen Nielsen, Nadarajah Sriskandarajah, Ewa Gunnarsson, 2016-01-22 This book presents theoretical

discussions and practical examples of Action Research from Scandinavia Latin America and Africa primarily dealing with how to combine nature conservation and management with local democratic community development seeing the renewal of Commons as a way to transcend the present dichotomy between these two dimensions **Proleptic Leadership on the Commons** Randal Joy Thompson,2020-10-22 Will capitalism give way to a commons centric society as many scholars and activists predict Viewing the commons as a vehicle for a new world order Randal Joy Thompson proposes proleptic leadership which envisions how leaders will continue to be essential as the custodians of responsible agency and conscious choice

What is Education? A. J. Bartlett,2017-06-23 No detailed description available for What is Education **Democracy, Markets and the Commons** Lukas Peter,2021-01-12 How can we overcome the existing political economic and ecological crises that humanity faces With the notion of the commons Lukas Peter argues that this form of social organization can provide answers to the shortcomings of centralized states and open and competitive markets By building on and going beyond the work of Elinor and Vincent Ostrom he develops an ecological understanding of the commons and human freedom more generally thereby reinterpreting classical thinkers such as John Locke and John Rawls Importantly he does not suggest an end to property states or markets but rather a radical democratization thereof ultimately providing a real alternative for the 21st century **Global Environmental Sustainability** Choy Yee Keong,2020-10-31 Global Environmental Sustainability Case Studies and Analysis of the United Nations Journey toward Sustainable Development presents an integrated interdisciplinary analysis of sustainable development addressing global environmental problems in the contemporary world It critically examines current actions being taken on global and local scales particularly in relation to the UN s efforts to promote sustainable development This approach is supported by empirical analysis drawing upon a host of interweaving insights spanning economics politics ecology environmental philosophy and ethics among others As a result it offers a comprehensive and well balanced assessment of the overall perspective of sustainable development supported by in depth content analysis theoretical evaluation empirical and actual case studies premised on solid data and actual field work Also the book marks a milestone in placing the Covid 19 pandemic into a perspective for understanding the universality of human collective environmental behavior and action By utilizing in depth analysis both quantitative and qualitative and challenging the status quo of what is expected in the global approach to sustainable development Global Environmental Sustainability provides the theory and methodology of empirical sustainable development which is especially germane to our advanced society today which is deeply entrenched in a crisis of environmental morality More particularly it serves as a salient source of moral reconstitution of society grounded in empirical reality to liberate man s excessive spirit of individualism and self aggrandizement to the detriment of the environment Epistemologically the book furnishes a remarkable tour de force with a new level of analytical insight to help researchers practitioners and policymakers in sustainability and environmental science as well as the many other disciplines involved in sustainable development to better

understand sustainability from a new perspective and provides a methodological direction to pursue solutions going forward Provides a systematic exposition of sustainable development in all its complexity with all the chapters complementing each other in an integral way Presents extensive empirical evidence of various environmental problems across the world including China the United States Canada Southeast Asia South America and Africa and the extent to which the United Nations has succeeded in driving toward global environmental sustainability Provides a cogent examination of the treatment of our global commons by some of the world s most powerful leaders Includes data from field studies and in depth interviews with indigenous people in Borneo s rainforests of the Malaysian state of Sarawak most affected by environmental change

Commoning Labour and Democracy at Work Dario Azzellini, Marcelo Vieta, 2025-08-28 This book investigates the return of workers self management in recent decades as responses to recurring neoliberal crises In particular the book homes in on worker recuperated enterprises WREs a promising form of workers self organization whereby workers restart troubled bankrupt or shuttered companies as cooperatives or other forms of democratic workplace The book argues that WREs are prefigurative of new forms of work based on equality and sustainability Framed by the concepts of autogesti n the labour commons and prefigurative ethico political practices the book argues that WREs contribute to the construction of more directly democratic community economies Drawing on a range of contemporary case studies from numerous countries in the Global South and North as well as new theories of workers self management the book contributes a critical development political economic and class struggle Marxist perspective to the re emergent labour question within anti systemic social movements while theorizing the transformative nature of WREs for workers work organizations and communities Bringing a class analysis back into current discourses and debates concerning democracy at work and alternatives to global capital this book will be of interest to researchers across the fields of development studies labour studies political economy sociology of development sociology of work and political science

Perspectives for Digital Social Innovation to Reshape the European Welfare Systems Gianluca Misuraca, 2021-03-15 Social welfare is riddled with ingrained problems that have already defeated all standard approaches and reform calls for counterintuitive action Digital Social Innovation DSI is primarily about promoting grassroots initiatives to address localized societal problems and is not normally talked about in relation to welfare reform but perhaps social innovation initiatives with their localized and case based approach could help to solve the enormous structural problems faced by our welfare democracies today This book addresses the potential and implications of DSI for the reform of the European welfare state The 14 papers collected here focus on key issues such as the nature of social innovation and its effects scaling up to address structural problems and make systemic change new social risks and challenges the role of digital thinking and emerging technologies public governance approaches tolerance of institutions integrating innovation in the welfare system and the empowerment of marginalized citizens These topics are examined from an integrated and multi disciplinary perspective taking into consideration not only

current EU debate on policy trends for social protection but also the nature of digital transformation and its effects on social change The book also highlights barriers to adoption as well as the potential limitations and failures of this emerging approach Digital social innovation is an emerging discipline that deserves more attention from policy makers and more resources from government Drawing on welfare studies political science sociology psychology law and computer science this book will be of interest to researchers practitioners and policy makers alike *Routledge Handbook of the Study of the Commons* Blake Hudson,Jonathan Rosenbloom,Dan Cole,2019-01-04 This comprehensive Handbook serves as a unique synthesis and resource for understanding how analytical frameworks developed within the literature assist in understanding the nature and management of commons resources Such frameworks include those related to Institutional Analysis and Development Social Ecological Systems and Polycentricity among others The book aggregates and analyses these frameworks to lay a foundation for exploring how they apply according to scholars across a wide range of disciplines It includes an exploration of the unique problems arising in different disciplines of commons study including natural resources forests oceans water energy ecosystems etc economics law governance the humanities and intellectual property It shows how the analytical frameworks discussed early in the book facilitate interdisciplinarity within commons scholarship This interdisciplinary approach within the context of analytical frameworks helps facilitate a more complete understanding of the similarities and differences faced by commons resource users and managers the usefulness of the commons lens as an analytical tool for studying resource management problems and the best mechanisms by which to formulate policies aimed at addressing such problems Chapter 26 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Liminal Commons Angelos Varvarousis,2022-07-14 This book is the first attempt to rethink and appraise the role of temporary commoning experiences that develop in contexts of crisis Activist and urban planner Angelos Varvarousis argues that there is a certain type of commons the liminal commons which despite their often short lives play a crucial function in contemporary societies they demarcate and facilitate transitions at the individual collective and ultimately the societal level Through an intense exploration of grassroots projects such as occupied squares self organised refugee camps solidarity food structures and social clinics in crisis ridden Greece the author observes that humans still invent such collectively performed rituals in order to prepare symbolize and practically explore the possibility of transformation and transition In a period in which traditional rites of passage have faded away but many changes are urgently needed liminal commons can be a key element in the process of claiming awareness and control over the mechanisms of individual collective and societal emancipation *Routledge Handbook of Public Diplomacy* Nancy Snow,Nicholas J. Cull,2020-01-20 The second edition of the Routledge Handbook of Public Diplomacy co edited by two leading scholars in the international relations subfield of public diplomacy includes 16 more chapters from the first Ten years later a new global landscape of public diplomacy has

taken shape with major programs in graduate level public diplomacy studies worldwide What separates this handbook from others is its legacy and continuity from the first edition This first edition line up was more military focused than this edition a nod to the work of Philip M Taylor to whom this updated edition is dedicated This edition includes US content but all case studies are outside the United States not only to appeal to a global audience of scholars and practitioners but also as a way of offering something fresher than the US UK centric competition In Parts 1 4 original contributors are retained many with revised editions but new faces emerge Parts 5 and 6 include 16 global case studies in public diplomacy expanding the number of contributors by ten The concluding part of the book includes chapters on digital and corporate public diplomacy and a signature final chapter on the noosphere and noopolitik as they relate to public diplomacy Designed for a broad audience the Routledge Handbook of Public Diplomacy is encyclopedic in its range and depth of content yet is written in an accessible style that will appeal to both undergraduate and postgraduate students Beyond the Social Contract Nicolette Makovicky, Robin Smith, 2023-08-11 Tax and taxation are conventionally understood as the embodiment of social contract This ground breaking collection of essays challenges this truism examining what tax might tell us about the limits of social contract thinking The contributors shed light on contemporary fiscal structures and public debates about the moralities practices and imaginaries of tax systems using tax to explore the nature of citizenship personal freedom and moral and economic value Their ethnographically grounded accounts show how taxation may be influenced by spaces of fiscal sovereignty that exist outside or alongside the state taking various forms from alternative religious communities to economic collectives **Handbook of Critical Environmental Politics** Pellizzoni, Luigi, Leonardi, Emanuele, Asara, Viviana, 2022-10-20 This timely Handbook offers a comprehensive outlook on global environmental politics providing readers with an up to date view of a field of ever increasing academic and public significance Its critical perspective interrogates what is taken for granted in current institutions and social and power relations highlighting the issues preventing meaningful change in the relationship between human societies and their biophysical underpinnings This title contains one or more Open Access chapters **Re-enchanting the World** Silvia Federici, 2018-11-01 Silvia Federici is one of the most important contemporary theorists of capitalism and feminist movements In this collection of her work spanning over twenty years she provides a detailed history and critique of the politics of the commons from a feminist perspective In her clear and combative voice Federici provides readers with an analysis of some of the key issues and debates in contemporary thinking on this subject Drawing on rich historical research she maps the connections between the previous forms of enclosure that occurred with the birth of capitalism and the destruction of the commons and the new enclosures at the heart of the present phase of global capitalist accumulation Considering the commons from a feminist perspective this collection centers on women and reproductive work as crucial to both our economic survival and the construction of a world free from the hierarchies and divisions capital has planted in the body of the world proletariat Federici is clear that the commons should not be understood

as happy islands in a sea of exploitative relations but rather autonomous spaces from which to challenge the existing capitalist organization of life and labor

The Abuse of Property Daniel Loick, 2023-08-01 A fundamental critique of the current property regime calling for radical social and political change In *The Abuse of Property* Daniel Loick offers a multifaceted philosophical critique of the concept of property broadly understood He argues that property should not be the dominant framework in which human beings regulate the use of things that property is not the same as use Property rights in his view are not conditions of freedom or justice but deficient dysfunctional and harmful ways of interacting with other people and the natural environment He dissects not only the classic justifications of property from John Locke's justification of property as a natural right based on individual freedom to Hegel's justification of property as a form of mutual recognition but also the classic critiques of property from Proudhon and Marx up to Adorno and Agamben Through an innovative critical approach to legal studies Loick demonstrates how the concept of property historically applied to things and people and still a linchpin of our distorted relation with the world forms a direct line from the Occupy movement to Black Lives Matter and beyond

Releasing the Commons Ash Amin, Philip Howell, 2016-04-28 This book moves beyond seeing the commons in the past tense an entity passed over from the public into the private to reimagine the commons as a process a contest of force a reconstitution and a site of convening practices It highlights new spaces of gathering opening up such as the digital commons and new practices of being in common such as community economies and solidarity networks The commons is seen as a contested domain of the collective and as a changing way of being in common with the balance poised in the tensile play between political economy and social innovation The book focuses on the possibility of recovering a future in which more can be held by the many focusing on three concepts nation and nature as a commons publics and rights and bodies concerning the management of lives and livelihoods Across these three passage points the book finds evidence of a commons under attack but also defended in fragile though promising ways With contributions from leading scholars this thought provoking book will be of great interest to students and scholars in geography environmental studies politics anthropology and cultural studies

THE SECRET SERVICE CHURCH: FAITH SEEKING RELATEDNESS George Gammack, 2015-08-13 We all know what church is Likewise we are provided with a supply of set notions for God Christ and the Bible which make up the stock in trade equipment for both believer and non believer This study asks fundamental questions about all these from a relational perspective attempting to illumine the faith quest by way of clues from the common realities of human interaction In this it is the appropriate provisions of relationships rather than the assent to doctrines that forms the spiritual basis of community Such a theology of relatedness is urgently needed We must come out of our creedal closets to be part of a new diaspora This demands a secret discipline of servant relationship at work in that no man's land where there is space for all manner of secular saints and doctrinal devils to discover the possibilities of their togetherness the secret service church in odd places and often strange company

Making Commons Dynamic Prateep Kumar Nayak, 2021-03-01 With an emphasis

on the challenges of sustaining the commons across local to global scales Making Commons Dynamic examines the empirical basis of theorising the concepts of commonisation and decommonisation as a way to understand commons as a process and offers analytical directions for policy and practice that can potentially help maintain commons as commons in the future Focusing on commonisation decommonisation as an analytical framework useful to examine and respond to changes in the commons the chapter contributions explore how natural resources are commonised and decommonised through the influence of multi level internal and external drivers and their implications for commons governance across disparate geographical and temporal contexts It draws from a large number of geographically diverse empirical cases 20 countries in North South and Central America and South and South East Asia They involve a wide range of commons related to fisheries forests grazing wetlands coastal marine rivers and dams aquaculture wildlife tourism groundwater surface freshwater mountains small islands social movements and climate The book is a transdisciplinary endeavour with contributions by scholars from geography history sociology anthropology political studies planning human ecology cultural and applied ecology environmental and development studies environmental science and technology public policy Indigenous tribal studies Latin American and Asian studies and environmental change and governance and authors representing the commons community NGOs and policy Contributors include academics community members NGOs practitioners and policymakers Therefore commonisation decommonisation lessons drawn from these chapters are well suited for contributing to the practice policy and theory of the commons both locally and globally
