

WEBER CARBURETOR TROUBLESHOOTING GUIDE

This guide is designed to find problems by diagnosing engine symptoms associated with specific vehicle operating conditions.

For successful troubleshooting, complete these steps:

1. Do all steps in a given box and those which may follow in the guide.
2. Do all these steps in order; they are listed in order of common occurrence, and will help eliminate secondary problems.
3. Fully replace, adjust, or clean as directed by the diagnosis.
4. Do only those procedures and adjustments when given as a part of the steps shown in the guide.

Weber carburetors are manufactured under stringent quality controls and are thoroughly factory tested. Experience has shown that most apparent carburetor problems are actually due to trouble with other components.
