Unhealthy Places The Ecology Of Risk In The Urban Landscape:

Unhealthy Places Kevin Fitzpatrick, Mark LaGory, 2002-09-11 *Unhealthy Places* focuses on issues of health in today's cities. By arguing that place matters in relation to the population's health, Kevin Fitzpatrick and Mark LaGory make a convincing argument about the general unhealthiness of urban environments and thus of the urban dweller. The authors offer a place-oriented approach to health and cover such topics as the ecology of everyday urban life, the sociology of health needs and risks of the socially disadvantaged, needs and risks of children and the elderly in cities, and strategies for better health services in urban environments.

Unhealthy Health Policy Arachu Castro, Merrill Singer, 2004 This new collection turns a critical anthropological eye on the nature of health policy internationally. The authors reveal the prevailing social inequalities that often represent significant threats to the health and well-being of the poor, ethnic minorities, and women. The authors define an anthropology of policy concerned with decision-making and the impact of health policy on human lives. It will be a critical resource for researchers and practitioners in medical anthropology, medical sociology, public policy, and public health care. Visit our website for sample chapters.

Socioculturally Attuned Family Therapy Teresa McDowell, Carmen Knudson-Martin, J. Maria Bermudez, 2022-09-28 *Socioculturally Attuned Family Therapy* 2nd edition is a fully updated and essential textbook that addresses the need for marriage and family therapists to engage in socially responsible practice by infusing diversity, equity, and inclusion throughout theory and clinical practice. Written accessibly by leaders in the field, this new edition explores why sociocultural attunement and equity matter, providing students and clinicians with integrative, equity-based family therapy guidelines and case illustrations that clinicians can apply to their practice. The authors integrate principles of societal context, power, and equity into the core concepts and practice of ten major family therapy models, such as structural family therapy, narrative family therapy, and Bowen family systems, with this new edition including a chapter on socioemotional relationship therapy. Paying close attention to the how-to's of change processes, updates include the use of more diverse voices that describe the creative application of this framework, the use of reflexive questions that can be used in class and further content on supervision. It shows how the authors have moved their thinking forward, such as in clinical thinking, change, and ethics infused in everyday practice from a third-order perspective and the limits and applicability of SCAFT as a trans-theoretical, transnational approach. Fitting COAMFTE, CACREP, APA, and CSWE requirements for social justice and cultural diversity, this new edition is revised to include current cultural and societal

changes such as Black Lives Matter other social movements and environmental justice It is an essential textbook for students of marriage couple and family therapy and important reading for family therapists supervisors counselors and any practitioner wanting to apply a critical consciousness to their work Toward the Healthy City Jason Corburn,2009-09-04 A call to reconnect the fields of urban planning and public health that offers a new decision making framework for healthy city planning In distressed urban neighborhoods where residential segregation concentrates poverty liquor stores outnumber supermarkets toxic sites are next to playgrounds and more money is spent on prisons than schools residents also suffer disproportionately from disease and premature death Recognizing that city environments and the planning processes that shape them are powerful determinants of population health urban planners today are beginning to take on the added challenge of revitalizing neglected urban neighborhoods in ways that improve health and promote greater equity In Toward the Healthy City Jason Corburn argues that city planning must return to its roots in public health and social justice The first book to provide a detailed account of how city planning and public health practices can reconnect to address health disparities Toward the Healthy City offers a new decision making framework called healthy city planning that reframes traditional planning and development issues and offers a new scientific evidence base for participatory action coalition building and ongoing monitoring To show healthy city planning in action Corburn examines collaborations between government agencies and community coalitions in the San Francisco Bay area including efforts to link environmental justice residents chronic illnesses housing and real estate development projects and planning processes with public health Initiatives like these Corburn points out go well beyond recent attempts by urban planners to promote public health by changing the design of cities to encourage physical activity Corburn argues for a broader conception of healthy urban governance that addresses the root causes of health inequities **Urban Sediment Removal** Robert Brinkmann,Graham A.

Tobin,2012-12-06 There is not an extensive literature on street sweeping Much of the research that has been completed exists in the gray area of technical reports and government documents Furthermore a great deal of this research is locally based and has not been widely published Indeed our review of the scientific literature revealed that while storm water quality has received a lot of attention few academicians have been involved in street sweeping research per se Thus throughout our research into street sweeper effectiveness sweeping protocols and sweeping practices wished that there had been a book summarizing some of the important issues associated with street sweeping As our frustration grew we realized that we were uniquely poised to write such a book as our research had encompassed a variety of different projects including sweeper testing waste management and related storm water quality Also early on in this exercise we recognized that there was a growing demand for information about street sweeping policies and management especially for studies focusing on the effectiveness of different sweeping schedules on waste management operations and on non point pollution reduction practices associated with storm water runoff It was abundantly clear that there was a profound lack of research on

street sweeping that could assist with developing local regional or national policies There was in effect little guidance for city managers on these issues **Epidemiological Criminology** Eve Waltermaurer, Timothy A. Akers, 2014-11-13

Epidemiological criminology is an emerging paradigm which explores the public health outcomes associated with engagement in crime and criminal justice This book engages with this new theory and practice based discipline drawing on knowledge from criminology criminal justice public health epidemiology public policy and law to illustrate how the merging of epidemiology into the field of criminology allows for the work of both disciplines to be more interdisciplinary evidence based enriched and expansive This book brings together an innovative group of exemplary researchers and practitioners to discuss applications and provide examples of epidemiological criminology It is divided into three sections the first explores the integration of epidemiology and criminology through theory and methods the second section focuses on special populations in epidemiological criminology research and the role of race ethnicity age gender and space as it plays out in health outcomes among offenders and victims of crime and the final section explores the role policy and practice plays in worsening and improving the health outcomes among those engaged in the criminal justice system Epidemiological Criminology is the first text to bring together in one source the existing interdisciplinary work of academics and professionals that merge the fields of criminology and criminal justice to public health and epidemiology It will be of interest to academics and students in the fields of criminology epidemiology and public health as well as clinical psychologists law and government policy analysts and those working within the criminal justice system *Hazardous Wastes, Industrial Disasters, and Environmental Health Risks* Francis O. Adeola, 2011-10-24

The sociology of hazardous waste risk and disasters is a relatively new discipline This book focuses on hazardous and toxic wastes releases industrial toxic disasters contamination of communities and the environment and the subsequent adverse health effects among exposed populations *Motherhood, Poverty, and the WIC Program in Urban America* Suzanne Morrissey, 2015-12-24 The study presented here is one of urban poverty household survival and social institutions that both enable and control the decision making of poor women in America First and foremost it is about a public health program the Special Supplemental Nutrition Program for Women Infants and Children known more commonly as WIC and how the institution re inscribes persistent stereotypes of the urban poor on the women it eagerly wishes to serve Despite encountering opposition and occasionally humiliation at the hands of those chosen to serve many low income women throughout the United States and Puerto Rico return to WIC every month because it represents a rite of passage that characterizes pregnancy Enrolling in WIC prenatally signifies to others the importance of providing for one's family in spite of socioeconomic disadvantage Yet whether women access WIC benefits or not their lived realities include a painful and enduring connection between urban poverty and health inequalities particularly inequalities leading to poor birth outcomes and infant mortality as explored in this urban ethnography *Sacred Space for the Missional Church* William R. McAlpine, 2011-02-14 Sacred Space for the Missional Church examines the strong link

between the theology and mission of the Church and the spaces in which and from which that theology and mission are lived out. The author demonstrates that the built environment is not incidental or even subservient to mission. Rather, it is a key player in the fulfillment and the communication of that mission. The book begins with a working definition of the missional church, underscoring the connection between God's mission (*missio Dei*) and the Church's mission. The reader is presented with historical and theological frameworks for sacred space and reminded of the pivotal role of the built environment in the fulfillment of the mission of the Church. The design and construction of sacred spaces are shown to be fundamentally a theological exercise and not solely a matter of function, pragmatics, and fiscal astuteness. The author questions the uncritical application of blanket statements such as "form must follow function" and challenges the conviction that it does not matter where worship occurs, only that it occurs. The book addresses genuine concerns such as legitimizing the cost of church buildings and concludes with practical suggestions and essential questions that must be considered in posturing the built environment within the missional praxis of the Church.
