Sound for Moving Pictures Neil Hillman, 2021-04-26 Sound for Moving Pictures presents a new and original sound design theory called the Four Sound Areas framework offering a conceptual template for constructing, deconstructing, and communicating all types of motion picture soundtracks and a way for academics and practitioners to better understand and utilize the deeper emotive capabilities available to all filmmakers through the thoughtful use of sound design. The Four Sound Areas framework presents a novel approach to sound design that enables the reader to more fully appreciate audience emotions and audience engagement and provides a flexible practical model that will allow professionals to more easily create and communicate soundtracks with greater emotional significance and meaning. Of obvious benefit to sound specialists as well as motion picture professionals such as film producers, directors, and picture editors, Sound for Moving Pictures also provides valuable insight for others interested in the subject such as those involved with teaching soundtrack analysis or those researching the wider topics of film studies and screen writing.
