War In Darfur And The Search For Peace Studies In Global Equity:

War in Darfur and the Search for Peace Alexander De Waal, 2007 This series of essays provides in depth analysis of the origins and dimensions of the conflict in Darfur including detailed accounts of the evolution of ethnic and religious identities the breakdown of local administration the emergence of Arab militia and resistance movements and regional dimensions to the conflict Darfur David Hoile, 2008 In 2003 and 2004 Darfur became the epicentre of an international crisis The three Darfur states the size of Texas lie in the largest African state Sudan Darfur itself has a complex tribal ethnic and linguistic composition and the complexities of the conflict have been magnified by international and regional events But this is no excuse for the disinformation and confusion about Darfur This book analyses the causes and course of the war as well as the obstacles to peace In so doing it challenges accusations of genocide and racism made against the government of Sudan It is also critical of much of the simplistic and often inaccurate media coverage of the war Most important of all the book examines the road map to peace in Darfur

The International Criminal Court in Ongoing Intrastate Conflicts Patrick S. Wegner, 2015-10-09 In recent decades international courts have increasingly started investigating armed conflicts However the impact of this remains under researched Patrick S Wegner closes this gap via a comprehensive analysis of the impact of the International Criminal Court in the Darfur and Lord s Resistance Army conflicts He offers a fresh approach to peace and conflict studies while avoiding the current quantitative focus of the literature and polarisation between critics and supporters of applying justice in conflicts This is the first time that the impact of an international criminal court has been analysed in all its facets in two conflicts The consequences of

these investigations are much more complex and difficult to predict than most of the existing literature suggests Recurrent claims such as the deterrent effect of trials and the danger of blocking negotiations by the issuing of arrest warrants are put to the test here with some surprising results

Ceasefires Govinda Clayton, Simon J. A. Mason, Valerie Sticher, Andreas Wenger, 2025-03-03 A policy relevant study of when and how ceasefires lead to peace Almost all intrastate conflicts involve ceasefire agreements yet little is known about which factors make a ceasefire effective in stopping violence and ultimately ending intrastate conflict Ceasefires explores the complex relationship between the ceasefire and political negotiation processes and examines how they can either reinforce or impede each other Case studies from the joint perspectives of practitioners and scholars cover conflicts in Bosnia Burundi Colombia Darfur El Salvador Myanmar the Philippines Sudan North South and Syria This in depth analysis of ceasefires offers a unique framework for future mediators and negotiators as well as scholars of the intrastate peace process to enable them to identify a spectrum of potentially acceptable ceasefire agreements and sequencing approaches

The Political Invention of Fragile States Sonja Grimm, Nicolas Lemay-Hebert, Olivier Nay, 2016-04-14 This book investigates the emergence the dissemination and the reception of the notion of state fragility It analyses the process of conceptualisation examining how the fragile states concept was framed by policy makers to describe reality in accordance with their priorities in the fields of development and security Contributors investigate the instrumental use of the state fragility label in the legitimisation of Western policy interventions in countries facing violence and profound poverty They also emphasise the agency of actors on the receiving end describing how the elites and governments in so called fragile states have incorporated and reinterpreted the concept to fit their own political agendas A first set of articles examines the role played by the World Bank the OECD the European Union and the G7 in the transnational diffusion of the concept which is understood as a critical element in the new discourse on international aid and security A second set of papers employs three case studies Sudan Indonesia and Uganda to explore the processes of appropriation reinterpretation and the strategic use of the fragile state concept This book was originally published as a special issue of Third World Quarterly

People Changing Places Isabelle Côté, Matthew I. Mitchell, Monica Duffy Toft, 2018-07-04 While migration and population settlement have always been an important feature of political life throughout the world the dramatic changes in the pace direction and complexity of contemporary migration flows are undoubtedly unique Despite the economic benefits often associated with global regional and internal migration the arrival of large numbers of migrants can exacerbate tensions and give rise to violent clashes between local populations and recent arrivals This volume takes stock of these trends by canvassing the globe to generate new conceptual empirical and theoretical contributions The analyses ultimately reveal the critical role of the state as both an actor and arena in the migration conflict nexus
