War Time An Idea Its History Its Consequences:

War Time Mary L. Dudziak, 2012-02-07 Mary Dudziak's original analysis of American wartime and its effect on law policy and our ideas about time itself now available in paperback **War Time** Louis Halewood, Adam Luptak, Hanna Smyth, 2018-07-06 The International Society for First World War Studies ninth conference War Time drew together emerging and leading scholars to discuss reflect upon and consider the ways that time has been conceptualised both during the war itself and in subsequent scholarship War Time First World War Perspectives on Temporality stemming from this 2016 conference offers its readers a collection of the conference's most inspiring and thought provoking papers from the next generation of First World War scholars In its varied yet thematically related chapters the book aims to examine new chronologies of the Great War and bring together its military and social history Its cohesive theme creates opportunities to find common ground and connections between these sub disciplines of history and prompts students and academics alike to seriously consider time as alternately a unifying divisive and ultimately shaping force in the conflict and its historiography With content spanning land and air the home and fighting fronts multiple nations and stretching to both pre 1914 and post 1918 these ten chapters by emerging researchers plus an introductory chapter by the conference organisers and a foreword by John Horne offer an irreplaceable and invaluable snapshot of how the next generation of First World War scholars from eight countries were innovatively conceptualising the conflict and its legacy at the midpoint of its centenary *Number One Realist* Nathaniel L. Moir, 2022-04-01 In a 1965 letter to Newsweek French writer and academic Bernard Fall 1926-67 staked a claim as the Number One Realist on the Vietnam War This is the first book to study the thought of this overlooked figure one of the most important experts on counterinsurgency warfare in Indochina Nathaniel L Moir's intellectual history analyses Fall's formative experiences his service in the French underground and army during the Second World War his father's execution by the Germans and his mother's murder in Auschwitz and his work as a research analyst at the Nuremberg Trials Moir demonstrates how these critical events shaped Fall's trenchant analysis of Viet Minh led revolutionary warfare during the French Indochina War and the early Vietnam War In the years before conventional American intervention in 1965 Fall argued that far more than anything in the United States military arsenal resolving conflict in Vietnam would require political strength willpower integrity and skill Number One Realist illuminates Fall's study of political reconciliation in Indochina while showing how his profound humanitarian critique of war continues to echo in the endless conflicts of the present It will challenge and change the way we think about the Vietnam War **British Literature and Culture in Second World Wartime** Beryl Pong, 2020-05-14 British Literature and Culture in Second World Wartime excavates British late modernism's relationship to war in terms of chronophobia a joint fear of the past and future As a wartime between but distinct from those of the First World War and the Cold War Second World wartime involves an anxiety that is both repetition and imaginary both a dread of past violence unleashed anew and that of a future violence still ungraspable Identifying a constellation of

temporalities and affects under three tropes time capsules time zones and ruins this volume contends that Second World wartime is a pivotal moment when wartime surpassed the boundaries of a specific state of emergency becoming first routine and then open ended It offers a synoptic wide ranging look at writers on the home front including Henry Green Elizabeth Bowen Virginia Woolf and Rose Macaulay through a variety of genres such as life writing the novel and the short story It also considers an array of cultural and archival material from photographers such as Cecil Beaton filmmakers such as Charles Crichton and artists such as John Minton It shows how figures harnessed or exploited their media s temporal properties to formally register the distinctiveness of this wartime through a complex feedback between anticipation and retrospection oftentimes fashioning the war as a memory even while it was taking place While offering a strong foundation for new readers of the mid century the book s overall theoretical focus on chronophobia will be an important intervention for those already working in the field

Speaking the Law Kenneth Anderson, Benjamin Wittes, 2015-05-01 When Barack Obama came into office the strategic landscape facing the United States in its overseas counterterrorism operations was undergoing a shift Even before the rise of drones necessitated the articulation of legal doctrine the Obama administration had to explain itself In Speaking the Law the authors offer a detailed examination of the speeches of the Obama administration on national security legal issues Viewed together here for the first time the authors lay out a broad array of legal and policy positions regarding a large number of principles currently contested at both the domestic and international levels The book describes what the Obama administration has said about the legal framework in which it is operating with respect to such questions as the nature of the war on terrorism the use of drones and targeted killings detention trial by military commission and in federal courts and interrogation The authors analyze this framework examining the stresses on it and asking where the administration got matters right and where they were wrong They conclude with suggestions for certain reforms to the framework for the administration and Congress to consider

War Andrew Clapham, 2021 This book provides an accessible and engaging account of the contemporary laws of war It highlights how even though war has been outlawed and should be finished as an institution states continue to claim that they can wage necessary wars of self defence engage in lawful killings in war and imprison law of war detainees

Fortress America Elaine Tyler May, 2017-12-12 An award winning historian argues that America s obsession with security imperils our democracy in this compelling portrait of cultural anxiety Mary L Dudziak author of *War Time* For the last sixty years fear has seeped into every area of American life Americans own more guns than citizens of any other country sequester themselves in gated communities and retreat from public spaces And yet crime rates have plummeted making life in America safer than ever Why then are Americans so afraid and where does this fear lead to In this remarkable work of social history Elaine Tyler May demonstrates how our obsession with security has made citizens fear each other and distrust the government making America less safe and less democratic *Fortress America* charts the rise of a muscular national culture undercutting the common good Instead of a thriving democracy of engaged
