Xs Small Structures Green Architecture:

XS Phyllis Richardson, 2007-03-13 A follow up to the highly successful XS Big Ideas Small Buildings this book features contemporary solutions to two of today's most challenging problems how to conserve space and help save the environment The design goals of the 40 houses included here are to build as small as possible to harmonize with the site to use natural heating and cooling techniques and above all to combine aesthetic beauty with ecological sensitivity The houses are striking in appearance inexpensive to build and totally functional and will serve as inspiration for architects and potential owners Designed by a variety of young international architects among them Patkau Shop Sean Godsel and Klein Dytham the projects featured here reveal an extraordinary degree of ingenuity within a tight creative context or budget As homeowners become more environmentally savvy and demand environmentally sound choices a new generation of architects and builders is creating warm inviting homes that cause only a fraction of the ecological impact of conventional building methods The book is also a compelling manifesto that illustrates how ecological responsibility can reinvigorate contemporary architecture Sustainability is not just good for the environment it also propels architects toward new innovations and greater creativity

XS Green Phyllis Richardson, 2007 What does it mean to be green This book a follow up to the cult hit XS is a celebration of idiosyncratic small buildings and asks what we mean by building green and how doing so enriches the world around us The projects here are not only about building well but about seeing well They embrace the spectrum of small structures from traditional nature huts and ornamental follies to the charmingly surreal Buildings that look after people can also be the ones that look after the earth Dwell, 2007-06 At Dwell we're staging a minor revolution We think that it's possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines

Eco-Architecture V C.A. Brebbia, R. Pulselli, 2014-09-24 This book contains the proceedings of the fifth International Conference on Harmonisation between Architecture and Nature Eco Architecture 2014 Eco Architecture implies a new approach to the design process intended to harmonise its products with nature This involves ideas such as minimum use of energy at each stage of the building process taking into account the amount required during the extraction and transportation of materials their fabrication assembly building erection maintenance and eventual future recycling Another important issue is the adaptation of the architectural design to the natural environment learning from nature and long time honoured samples of traditional constructions The papers in this book deal with topics such as building technologies design by passive systems design with nature cultural sensitivity life cycle assessment resources and rehabilitation and many others Also included are case studies from many different places around the world Eco Architecture by definition is a highly multi disciplinary subject Eco Architecture V Harmonisation between Architecture and Nature will therefore be of interest to in addition to architects many other professionals including
