Classically studies of the Japanese government are both tantalizing and frustrating as scholars standing outside of the system draw conclusions from significant events like crises disasters and moments of reform This has led to a sense of mystery as scholars have developed sophisticated competing theories about how the system actually operates often with resigned comments that there is a black curtain kuromaku drawn over the system The primary challenge is gaining access to the actual process of policymaking on a daily basis given the seemingly impenetrable nature of the bureaucracy This study is unusual as it cracks open the curtain to see the wheels and rotating gears along with those pulling the levers Specifically

through the Maureen and Mike Mansfield Fellowship program the only congressionally authorized opportunity allowing American officials to be placed directly inside a foreign government the reader is given a firsthand account of these machinations Through their eyes readers will be introduced to Japan s messy policymaking process in telecommunications regulation pharmaceutical approvals diplomatic relations and much more This approach also allows the author to refine existing theories of Japan s bureaucratic elite and assess the weak system of control exercised over them by the National Personnel Authority NPA This understudied agency is the last vestige of MacArthur s legacy as the Supreme Commander of the Allied Powers in Japan following World War II Thus this study ambitiously hopes to lend a realistic glimpse into the only developed non western industrialized democratic state in the world More boldly this study intends to lend a greater appreciation of the complex tug of war between democracy and technocracy in other national contexts **Yojana** ,2008
