Tokyo Vernacular Common Spaces Local Histories Found Objects:

Tokyo Vernacular Jordan Sand, 2013-07-19 Preserved buildings and historic districts museums and reconstructions have become an important part of the landscape of cities around the world Beginning in the 1970s Tokyo participated in this trend However repeated destruction and rapid redevelopment left the city with little building stock of recognized historical value Late twentieth century Tokyo thus presents an illuminating case of the emergence of a new sense of history in the city's physical environment since it required both a shift in perceptions of value and a search for history in the margins and interstices of a rapidly modernizing cityscape Scholarship to date has tended to view historicism in the postindustrial context as either a genuine response to loss or as a cynical commodification of the past The historical process of Tokyo's historicization suggests other interpretations Moving from the politics of the public square to the invention of neighborhood community to oddities found and appropriated in the streets to the consecration of everyday scenes and artifacts as heritage in museums Tokyo Vernacular traces the rediscovery of the past sometimes in unlikely forms in a city with few traditional landmarks Tokyo's rediscovered past was mobilized as part of a new politics of the everyday after the failure of mass politics in the 1960s Rather than conceiving the city as national center and claiming public space as national citizens the post 1960s generation came to value the local places and things that embodied the vernacular language of the city and to seek what could be claimed as common property outside the spaces of corporate capitalism and the state

Asia especially as it relates to irrigation food production and marine fisheries Part III consists of two chapters discussing the impact of new technologies on air quality in addition to the history of energy in East Asia which has emerged as an important area of inquiry at the intersection between both environmental history and the history of science and technology Perspectives on Environmental History in East Asia Changes in the Land Water and Air will appeal to students and scholars of East Asian studies environmental history and environmental sciences Rethinking Locality in Japan Sonja Ganseforth,Hanno

Jentzsch,2021-07-19 This book inquires what is meant when we say local and what local means in the Japanese context Through the window of locality it enhances an understanding of broader political and socio economic shifts in Japan This includes demographic change electoral and administrative reform rural decline and revitalization welfare reform as well as the growing metabolic rift in energy and food production Chapters throughout this edited volume discuss the different and often contested ways in which locality in Japan has been reconstituted from historical and contemporary instances of administrative restructuring to more subtle social processes of making and unmaking local places Contributions from multiple disciplinary perspectives are included to investigate the tensions between overlapping and often incongruent dimensions of locality Framed by a theoretical discussion of socio spatial thinking such issues surrounding the construction and renegotiation of local places are not only relevant for Japan specialists but also connected with topical scholarly debates further afield Accordingly Rethinking Locality in Japan will appeal to students and scholars from Japanese studies and human geography to anthropology history sociology and political science **Visual Counterculture in Japan** Marco

Bohr,2025-01-23 This book presents innovative analysis of emergent visual trends in Japan from the late 1960s to the present day Adopting a thematic approach this interdisciplinary text deconstructs the role that visual practices played in shaping a variety of countercultural discourses related to politics gender identity sexuality censorship ethics and disasters The book makes the case that visual practices do not merely function as a way to record counterculture but that such practices are in themselves contributing to dynamics of resistance By considering a wide range of artists photographers film makers and practitioners the book focuses on the way that visual culture transgresses subverts or in the very least questions assumed socio cultural boundaries in Japan In doing so the book foregrounds the crucial role that images play in our society today Images are no just depictions of political shifts as and when they do occur but they form part of this very shift in their own right The book also highlights the interconnectedness between various visual practices and how they fit into wider geopolitical considerations on a global scale **Herder Correspondence** ,1965 **Provincializing Empire** Jun
