China—Art—Modernity David Clarke, 2019-01-22 China Art Modernity provides a critical introduction to modern and contemporary Chinese art as a whole It illuminates what is distinctive and significant about the rich range of art created during the tumultuous period of Chinese history from the end of Imperial rule to the present day The story of Chinese art in the twentieth and twenty first centuries is shown to be deeply intertwined with that of the country's broader socio political development with art serving both as a tool for the creation of a new national culture and as a means for critiquing the forms that culture has taken The book's approach is inclusive In addition to treating art within the Chinese Mainland itself during the Republican and Communist eras for instance it also looks at the art of colonial Hong Kong Taiwan and the Chinese diaspora Similarly it gives equal prominence to artists employing tools and idioms of indigenous Chinese origin and those who engage with international styles and contemporary media In this way it writes China into the global story of modern art as a whole at a moment in intellectual history when Western centred stories of modern and contemporary culture are finally being recognized as parochial and inadequate Assuming no previous background knowledge of Chinese history and culture this concise yet comprehensive and richly illustrated book will appeal to those who already have an established interest in modern Chinese art and those for whom this is a novel topic It will be of particular value to students of Chinese art or modern art in general but it is also for those in the

wider reading public with a curiosity about modern China At a time when that country has become a major actor on the world stage in all sorts of ways accessible sources of information concerning its modern visual culture are nevertheless surprisingly scarce As a consequence a fully nuanced picture of China's place in the modern world remains elusive China Art Modernity is a timely remedy for that situation Here is a book that offers a comprehensive account of the dizzying transformations of Chinese art and society in the twentieth and twenty first centuries Breaking free of conventional dichotomies between traditional and modern Chinese and Western that have hobbled earlier studies Clarke's highly original book is exactly what I would assign my own students Anyone eager to understand developments in China within the global history of modern art should read this book Robert E Harrist Jr Columbia University Clarke's book presents a critically astute mapping of the arts of modern and contemporary China It highlights the significance of urban and industrial contexts migration diasporas and the margins of the mainland while imaginatively seeking to inscribe its subject into the broader story of modern art A timely and reliable intervention and indispensable for the student and non specialist reader Shane McCausland SOAS University of London

Eco-Art History in East and Southeast Asia De-nin D. Lee, 2019-01-29 The essays in this anthology examine artwork and sites in East and Southeast Asia through the lens of eco art history In these regions significant anthropogenic changes to terrain watercourses and ecosystems date back millennia as do artwork and artefacts that both conceptualize and modify the natural world The rising interest in earth conscious modes of analysis or eco art history informs this anthology which explores the mutual impact of artistic expressions and local environments in East and Southeast Asia Moreover conceptual tools and case studies focused on these regions impart important insights bearing on the development of eco art history The book includes case studies examining the impact of the Little Ice Age on court painting and systems of representing marine life in the Joseon period in Korea Other contributors consider contemporary artistic strategies such as developing a sustainability aesthetics and focusing attention to non human agents to respond to environmental damage and climate change in the present Additional essays analyse the complicated art historical ecology of heritage sites and question the underlying anthropocentrism in art historical priorities and practices As a whole this anthology argues for the importance of ecological considerations in art history
