Zhu Rongji And The Transformation Of Modern China:

Zhu Rongji and The Transformation of Modern China Laurence J. Brahm, 2002 China's astonishing transformation from a centrally planned to a market economy was one of the most remarkable stories of the twentieth century. It has set the stage for what many see as a period of unparalleled future growth. During this spell of delicate and risk-fraught economic transition, one defining figure stands out as the true driving force: Zhu Rongji. A remarkable visionary, Zhu has consistently refused to follow the conventional wisdom of established economics. Instead, he has developed a unique approach for a unique situation. Author Laurence Brahm tells the inside story of Zhu's rise to power, the political obstacles that he has overcome, and the policies that he has engineered to set China on a new path. While other developing countries such as Russia have floundered badly, China continues to excite the world with its phenomenal growth. Brahm skillfully argues that Zhu's policies of managed marketization deserve international recognition as a new economic model for both developing and transitional economies. In *Zhu Rongji and the Transformation of Modern China*, Laurence Brahm provides a fascinating inside account of the man dubbed an economic czar by many western commentators. This is the untold story of Zhu and his strategies and the key events that have shaped China into a modern nation and economic powerhouse. **Zhu Rongji and The**

Take-off John Wong, 2016-04-25 Following Deng Xiaoping's economic reform and opening Gaige Kaifang policy, China experienced unprecedented high growth for over three decades. Crucial in the process was the role of Zhu Rongji, who was hand-picked by Deng initially as Executive Vice Premier and later full Premier to carry through the needed reform and manage the critical marketization process through the turbulent 1990s when China's economy suffered many ups and downs. Dubbed as China's Economic Czar, Zhu tackled many thorny problems associated with the country's then half-reformed

economy ably and effectively thereby laying the ground for subsequent periods of greater dynamic growth Zhu was instrumental in preparing China's economy for its final take off The chapters in this volume were originally written as policy briefings for the Singapore government from 1997 to 2003 when Zhu was Premier They cover a wide variety of topics including how he had applied his own way of macroeconomic control Hongguan Tiaokong how he went about reforming taxation foreign exchange and state owned enterprises and finally his embrace of capitalism Each chapter is preceded by a detailed introduction highlighting the main issues and interpreting them from today's perspective based on updated information and additional new research

China's Reforms and International Political Economy David Zweig, Zhimin Chen, 2009-05-21 Written by an international team of experts this important and interesting text gives vital insights into China's likely development and international influence in the next decade

Civilization and the Chinese Body Politic Yongnian Zheng, 2022-11-22 In this important and hugely ambitious book one of the world's leading political scientists working on China demonstrates how Western views of China are flawed because the long tradition of Western scholarship studying China views China from the Western philosophical and intellectual perspective rather than viewing China on its own terms through the lens of China's own long established and reputable philosophical and intellectual tradition Providing a deep analysis of Western scholarship on China including work from Leibniz to Marx to Weber and then to Wittfogel and a thorough account of the evolution of China's own thinking about governance as expressed in the practices of successive Chinese dynasties the book goes on to examine how the current Chinese body politic fits with and is the natural outcome of China's own long well thought through and well practiced intellectual consideration of what the nature of civilized governance should be By focusing on philosophical and intellectual approaches rather than on theoretical or methodological ones the book shows how the huge and increasing disconnect between non Chinese views of China and Chinese ones has come about

China's Reforms and International Political Economy, *China's capitalist transformation* Yuan Li, 2023-12-31 This book provides a rare account of China's market reform in the own words of the Chinese politicians intellectuals the media and journalists The Chinese rhetoric complex ironic argumentative and abstruse may hold the key to understanding China's unique style of elite politics state citizen relationship and institutional development Topics include the establishment and change of the stock market and the recent institutionalization of the private equity industry Rhetoricizing the Chinese capitalist transformation provides a glimpse into how the Chinese minds work as Chinese people participate in the process of changing the country and themselves Adopting both an indigenous perspective and an outsider view on China this book serves as a guide for anyone interested in learning how Chinese reason persuade debate and resist

Unbalanced Stephen Roach, 2014-01-28 The Chinese and U S economies have been locked in an uncomfortable embrace since the late 1970s Although the relationship initially arose out of mutual benefits in recent years it has taken on the trappings of an unstable codependence with the two largest economies in the world losing their sense of self increasing the risk of their

turning on one another in a destructive fashion In *Unbalanced The Codependency of America and China* Stephen Roach senior fellow at Yale University and former chairman of Morgan Stanley Asia lays bare the pitfalls of the current China U S economic relationship He highlights the conflicts at the center of current tensions including disputes over trade policies and intellectual property rights sharp contrasts in leadership styles the role of the Internet the recent dispute over cyberhacking and more A firsthand witness to the Asian financial crisis of the late 1990s Roach likely knows more about the U S China economic relationship than any other Westerner Here he discusses why America saving too little and China saving too much creates mounting problems for both How China is planning to reboot its economic growth model by moving from an external export led model to one of internal consumerism with a new focus on service industries How America shows a disturbing lack of strategy preferring a short term reactive approach over a more coherent Chinese style planning framework The way out what America could do to turn its own economic fate around and position itself for a healthy economic and political relationship with China In the wake of the 2008 crisis both unbalanced economies face urgent and mutually beneficial rebalancings *Unbalanced* concludes with a recipe for resolving the escalating tensions of codependence Roach argues that the Next China offers much for the Next America and vice versa [Fortifying China](#) Tai Ming Cheung, 2013-04-15 *Fortifying China* explores the titanic struggle to turn China into an aspiring world class military technological power The defense economy is leveraging the country's vibrant civilian economy and gaining access to foreign sources of technology and know how Drawing on extensive Chinese language sources Tai Ming Cheung explains that this transformation has two key dimensions The defense economy is being reengineered to break down bureaucratic barriers and reduce the role of the state fostering a more competitive and entrepreneurial culture to facilitate the rapid diffusion and absorption of technology and knowledge At the same time the civilian and defense economies are being integrated to form a dual use technological and industrial base In Cheung's view the Chinese authorities believe this strategy will play a key role in supporting long term defense modernization For China's neighbors and the United States understanding China's technological industrial and military capabilities is critical to the formulation of economic and security policies *Fortifying China* provides crucial insight into the impact of China's dual use technology strategy Cheung's systems of innovation framework considers the structure dynamics and performance of the defense economy from a systems level perspective

Contemporary China Yongnian Zheng, 2013-01-29 Using new research and considering a multidisciplinary set of factors *Contemporary China* offers a comprehensive exploration of the making of contemporary China Provides a unique perspective on China incorporating newly published materials from within and outside China in English and Chinese Discusses both the societal and economic aspects of China's development and how these factors have affected Chinese elite politics Includes coverage of recent political scandals such as the dismissal of Bo Xilai and the intrigue surrounding the 18th National Congress elections in late 2012 Discusses the reasons for and ramifications of the gap that exists between western

perceptions of China and China itself
